American Railroad Journal.

Saturday, October 14, 1871.

Stock Exchange and Money Market.

The awfully destructive fire at Chicago and its consequences, as well in an industrial, financial and commercial, as in a social point of view, have been the chief topics of conversation in this city, as well as elsewhere throughout the country, since our last. The first thoughts of our business public—to the credit of our citizens, be it remembered—have been, far less generally of their losses by the fire—which must, in any event be very heavy—than of the dreadful sufferings and pressing needs of the population of the hapless city, and of how most promptly and generously to succor the afflicted. As was to have been expected, Money has been in very active request in the local market for mercantile and speculative use, and with less liberality on the part of lenders to extend accommodation to operators, the price has been exceptionally high. On call, Money, on Monday and Tuesday, commanded quite generally a commission of a quarter to half of one per cent., in addition to seven per cent. interest; but this was the worst. Houses of the best standing were supplied at plain seven per cent. in currency, or, at most, seven per cent. in coin. At the close, large balances were undoubtedly carried over, both from fear of lending, and as the result of the two days' liquidation. There was a considerable hesitancy on the part of lenders to accept railway collaterals for cash loans, and parties who depend upon this class of vouchers were in many cases obliged to submit to severe rates. In the discount line, first class commercial paper maturing within four months was quoted by dealers at 7@7½ per cent. per annum discount, but the business in progress was on a restricted scale. At the close, there was a calmer and steadier temper apparent. More weight was given to the great agencies at work in the business operations of the country at large. The condition of the markets for Cotton, Breadstuffs, and our other products cannot be permanently affected by the disaster at Chicago, great and prostrating as that may be. The advices from Europe were of an encouraging nature. Our people are now called on to gauge precisely the extent of the calamities resulting from this Chicago fire, with the view of restoring, at the earliest moment, the interests and agencies which have been so very seriously injured. The city banks, in their latest return, show a reduction of $676,200 of legal tender notes, $2,854,200 of specie, and $5,554,000 of deposits; also a reduction of $3,199,900 in their loan and discount averages, and an increase of $6,300 in their item of circulation. The city bank exchanges, last week, averaged $99,843,000; and thus far, this week, 95½ millions daily. The banks now hold only $1,661,400 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act.

The U. S. Sub-Treasury reduced its currency balance $731,894 and enlarged its coin reserve $702,009, as the result of the week's business. The receipts of the office were $4,889,461 in coin, and $5,088,099 in currency; payments, $4,187,452 in coin, and $5,819,994 in currency. The office received $3,056,000 in coin or its equivalent, from customs; and disbursed $183,779 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,757,621 of coin certificates, received for customs.

The specie reserve of the city banks according to the latest return is $10,276,100, against $12,597,641 same time last year. The city bank deposits are now $222,583,100 against $187,701,117 week ending Oct. 1, 1870. The legal tender reserve amounts to $54,596,100 against $50,275,226 same time last year. The circulation now stands at $30,260,100, against $32,593,209 same time last year. The loans are now $298,156,200, against $264,981,329 at this date last year.

Government revenues have been quite liberal since our last. The excises yielded last week about 3¼ millions, and thus far since July 1, $39,377,129. The customs at the port of New York, last week were $2,981,621; and at the outports, equal to about $950,000 more, all in coin, or coin certificates.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $366,205,800; and as security for deposits of public money, United States bonds for $15,519,500. The aggregate of the outstanding circulation of the National Banks of the country is $323,259,270.

The Gold speculation, though fairly active, has been quite variable in temper, and spirit. The pressure in the Money line was against buoyancy. The customs call was to a full average, while the

export drain was light. The range of the price during the week, has been from 113⅝@115, and the closing quotation on Wednesday was 114@114⅛ against 114 the preceding Wednesday. The specie outflow, last week, was $500,127; on Tuesday of this week, $3,200; and on Wednesday $163,548. The Gold Exchange Bank clearances have been as follows: Oct. 5, $60,170,000; Oct. 6, $87,452,000; Oct. 7, $73,166,000; Oct. 9, $56,205,000; Oct. 10, $93,882,000; Oct. 11, $55,419,000.

Government disbursed through the U. S. Sub Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 30, 1871, $65,754,791, against $67,071,180 same time in 1870.

The export drain of specie was $500,127 last week, against $802,174, same week preceding year The shipments since January 1, 1871, have been $58,355,874, against $49,666,486 same time in 1870.

The customs demand for Gold last week, averaged $509,333 a day; thus far, this week, it has averaged $463,900 a day, or equal to a weekly aggregate of $2,783,400. The arrivals of specie from Europe, Havana and other foreign ports last week, were $453,502, and since Jan. 1, 1871, $8,141,756 against $8,259,754 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $125,752,279 against $114,038,488 same time in 1870.

Foreign exchange has been firmer, and offered with less freedom, on a moderate movement. At the close, however, the market was depressed and weaker. Bankers' sixty day bills on London closed on Wednesday at 108½@108¾; sight bills on London, 109¾@110.

The produce exports from this port, week ending with Oct. 10, were to the currency value of $5,009,052.

Government securities have been weaker as to price, but not offered freely, and have been in fair demand at the modified figures.

Under the Treasury Department programme for October, Government proposes to sell Gold, as follows: Thursday, Oct. 19—Two Million. Thursday, Oct. 26—Two Million. And to buy in, Five-Twenties, as follows: Wednesday, Oct. 18—Two Million. Wednesday, Oct. 25—Two Million.

On Wednesday, Government bought in four millions of Five-Twenties at 111 70@111 77 nett. The amount of bonds offered was $10,610,000.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅞@116⅛; U. S. Five-Twenties of 1862, 114⅜@114⅝; U.S. Five-Twenties of 1864 at 114@114¼; U. S. Five-Twenties of 1865, 112⅞@113; U. S. Five-Twenties of 1865 consolidated, 112⅝@113; U. S. Five-Twenties of 1867, 113@113⅛; U. S. Five-Twenties of 1868, 113¼@113½; U. S. Ten-forties at 109@110; U. S. Six per cent. currency bonds, 111¾@112¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 27.	Oct. 4.	Oct. 11.
Consols	92⅝	93 3/16	92½
U.S. 5-20's of 1862	92⅝	93⅛	92⅛
U. S. 5-20s, 1865	92⅞	93¼	92½
" 1867	92	93⅛	92½
" 10-40s	89¾	90⅛	89
Erie	25	25⅛	22⅝

The new Funding Five per cent. Loan was quoted in London on Wednesday at 2⅝ per cent. discount.

State bonds have been in less demand at easier and irregular prices.

Railway bonds have been in fair request chiefly for investment purposes at comparatively well supported prices. Central Pacific Sixes have been 101⅜@101½. The six per cent. First Mortgage Loan of the Chesapeake and Ohio Railroad is being quite rapidly closed out at the present price of 93 per cent. and accrued interest. About eleven millions of this Loan have already been disposed of, out of an aggregate issue of fifteen millions. The bonds are a favorite with home investment purchasers.

The St. Joseph and Denver City eight per cent. gold bonds have been selling with comparative freedom at the established price of 97½ and accrued interest.

Railway and miscellaneous share property has been pressed for sale and quoted very decidedly lower, influenced in the main, by the reports from Chicago, of the great destruction of railway property at that business centre, by the dreadful fire of Sunday and Monday. The dealings have been unusually extensive at the reduced figures. The activity in Money was also against values. At the close, there was more steadiness apparent.

The earnings of the Central Pacific R. R. Co., in September, show an increase of $245,617; the figures having been $1,032,800 September this year, against $787,183 September last year. The earnings from Jan. 1, to Sept. 30—nine months—show an increase of $1,147,888, the total having been $6,952,352 against $5,805,464 same time in 1870.

General business has shown less activity, with values more or less unsettled. Middling upland cotton closed on Wednesday at 19⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 154,316 bales, against 233,997 bales same time in the preceding year; exports 50,578 bales, against 36,676 bales in the previous year; stock at the ports at latest dates, 113,772 bales, against 143,506 bales same date 1870.

At the Live Stock Markets, Beeves have been in less request at from 8½@13 cts.; Veals at 5@10½ cts.; Sheep at 3½@6 cts.; Lambs at 5@7½ cts.; Swine, 4¾@5¼ cts per lb., all live weight. The week's receipts were 9,197 Beeves, 1,394 Veal Calves, 32,641 Sheep and Lambs; and 43,763 Swine.

Foreign goods less demand yet generally steady as to price. The week's imports of foreign goods reached $7,033,388, including $2,679,566 of dry goods.

Ocean freights have been quiet and rates have been much easier.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Virginia 6s, consol., 63; do., Deferred Certificates, 26½; Georgia 7s, 92½; do., 7s, gold, 96¾; North Carolina 6s, special tax, 16; South Carolina 6s, new, Jan. and July, 48; do. ☞ The West Wisconsin Railway is now very nearly finished, and trains will be running through from Tomah to St. Paul by November 1. The earnings of the Road from local traffic on the completed portion constitute already a profitable business; and arrangements and connections are about perfected which will make it the Great Air-Line Route from Chicago to the North-West, effecting a saving of more than 100 miles over the present route. The Bonds are a First Mortgage on the road itself and on a valuable Land Grant of 1,000,000 acres. They bear interest in gold at the rate of 7 per cent per annum, and are sold now at 90 and accrued interest in currency by White, Morris & Co., 18 Wall-st., and Gwynne, Johnson & Day, 16 Wall-st., where pamphlets and further information may be obtained.

☞ Work on the Ashtabula and Youngstown road is progressing between Girard and Niles. The company has purchased the track of the Liberty and Vienna road from Girard to Youngstown.

☞ Rails are now laid on the Sugar River Railroad to Maxons, two miles beyond the Summit "Cut." Maxons is the height of land between the river and Claremont.

☞ The Portsmouth, Great Falls and Conway Railroad has been opened to West Ossipee, N. H.

St. Joseph and Denver City Railroad.

At a recent meeting of this company at St. Joseph, Mo., the following gentleman were elected directors for the ensuing year: Henry C. Tanner, Jas. Symington, Thos. Pickney, Augustus Prentice, Frank A. Coffin, Wm. C. Tanner, R. W. Donnell, and John H. Haar, of New York, and Milton Tootle, Dudley M. Steele, A. Beattie, and Geo. H. Hall, of St. Joseph, and T. W. Waterson, of Kansas. Upon the assemblage of the new board Mr. D. M. Steele was unanimously elected President; Robert W. Donnell, Vice-President, and an Executive Committee of three, consisting of Messrs. Tanner, Prentice, and Donnell. At a subsequent meeting of the Executive Committee, Mr. Henry C. Tanner was unanimously elected Chairman, and Francis A. Coffin, Secretary and Treasurer, to reside in New York. The St. Joseph *Gazette* says: "The entire line to Fort Kearney is under contract. Twelve thousand five hundred tons of iron have been bought by contract with Jay Cooke & Co., agents of the Darlington Iron Company, of England, to be delivered as fast as it can be used. Just as rapidly as men and money can do the work, and the elements will permit, the track will be put down."

New Jersey Steel and Iron Company.

This company ranks among the largest establishments of the kind in the United States, and for the present is the largest manufacturing company in Trenton, employing 550 men. This is an incorporated company, and their property and machinery is valued at $750,000. Rolled wrought iron beams and bars, iron and steel headed rails, merchant iron, and the Martin steel are among the products of this mill. The works occupy 12 acres and are very extensive. The annual capacity of the mill is for 20,000 tons of rails, or 10,000 tons of beams, for flooring, bridges, &c. The flooring beams for the New York city post office are furnished by this company. They have the exclusive control in the United States of the right to manufacture the celebrated Martin steel, under a French patent, and have one furnace producing five tons at a charge. Their steel is used mostly for engine and machine work. The iron bars made by this company are not as hard as some of those in this city.

☞ Upon the application of James E. Tyson, of Baltimore, an injunction order has been granted by the United States Circuit Court, prohibiting any consolidation of the Virginia and Tennessee Railroad Company with other roads, and the issuing and selling of bonds and securing the same by lien upon the stock. The order will be heard on the 20th inst. The charge is that the President and officers propose to issue bonds to the amount of eight millions, securing the same on the consolidated roads and their earnings including the Virginia and Tennessee, South Side, and Norfolk and Petersburg roads, under the name of the Atlantic, Mississippi and Ohio Railroad Company.

☞ The Wilmington (N. C.) *Journal* learns that the contract has been executed for the completion of the Wilmington, Charlotte and Rutherford Railroad.

☞ The Chesapeake and Ohio Railroad is relaying the track with fish joint rails, between Charlottesville and Gordonsville, Va.

☞ CHESAPEAKE AND OHIOS—FIVE-TWENTIES—CENTRAL PACIFICS.

Banking Office of FISK & HATCH,

No. 5 Nassau-st., New York, Oct. 9, 1871.

Of the Fifteen Million Chesapeake and Ohio Six Per Cent. Loan, less than one third remain unsold, and this remainder is rapidly being taken up. These bonds have thirty years to run, are especially desirable for investment, can now be bought

17 per cent. less than ten-forties,

20 per cent. less than five-twenties,

25 per cent. less than sixes of 1881,

and are equally sure to be paid principal and interest in gold coin. Price (at present) 93 and accrued interest, that is, with coupon attached, payable November 1.

$1,000 Chesapeake and Ohio Bond costs to-day $956 47.
$500 Chesapeake and Ohio Bond costs to-day $478 23.
$100 Chesapeake and Ohio Bond costs to-day $95 65.

We have but a limited supply left of the smaller denominations. Bonds are in coupon or registered form, same as Five Twenties.

When the railroad is completed, in 1872, and the Bonds are dealt in at the Stock Exchanges of the world, we have no doubt they will be equally popular with the Central Pacifics, which now command a premium, and are a favorite security here and in Europe; both roads being prominent lines, and under substantially the same fiscal management. Principal and interest of the Central Pacific and Chesapeake and Ohio Bonds, are specifically payable in gold coin in New York; the interest on the former being paid January and July, and of the latter, May and November, corresponding with the two classes of Five twenties. We recommend either of them to our friends and customers with the same confidence as we did the Five-twenty bonds, when we were selling millions of them for the United States Government.

We buy and sell Five-Twenties, Ten-Forties, Eighty-Ones, and Central or Western Pacifics, or receive them in payment for Chesapeake and Ohio Bonds at their current market price. Orders for Chesapeake and Ohio Bonds, accompanied with Drafts or Checks, may be forwarded to us by mail, and the bonds will be sent by express, charges paid.

FISK & HATCH.

P. S.—Accounts of Banks, Bankers and others received, on which we allow Four per Cent. interest.

Certificates of deposit issued and collections made in all parts of the Union.

Harvey Fisk,
A. S. Hatch.

☞ Mr. W. T. Walters, of Baltimore has been elected a director in the Charlotte, Columbia and Augusta Railroad.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 30th of September inclusive, during the years 1870 and 1871, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1870..	290,000	10,563,600	3,531,700	390,800
1871..	161,500	12,067,900	16,418,400	396,600
Dec.	128,500	*1,504,300	*12,886,700	3,800

* Increase.

The receipts of new crop barley are 354,200 bush., against 308,400 bush in 1870.

By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a increase of 172,360 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of September, in the years indicated:

	1869.	1870.	1871.
Canal opened—	May 6.	May 10.	April 24.
Flour, bbls.	349,300	200,000	161,500
Wheat, bushels..	11,614,000	10,563,600	11,067,900
Corn, bushels...	4,596,800	3,531,700	16,418,400
Barley, bushels.	30,900	390,800	394,600
Oats, bushels...	2,220,200	3,723,400	3,014,300
Rye, bushels....	231,200	358,700	446,100
Malt, bushels...	175,300	555,200	819,600
Feed, lbs.....	7,766,800	7,913,400	5,073,400

Journal of Railroad Law.

RAILROAD COMPANIES—DAMAGES FOR TAKING LAND—BY WHOM IT IS RECOVERABLE AFTER ALIENATION OF THE LAND—WHEN OFFSET ALLOWED.

The facts in the recent case of Pomeroy, Exr., *vs.* The Chicago and Milwaukee Railroad Company (25 Wis., 641,) are as follows:

In 1864 commissioners duly appointed awarded $1,026 81 in favor of Mary A. Pomeroy, the present plaintiff's testatrix, for the value of her land taken for a railroad in 1854, and for damages to other lands adjacent thereto, of which she was also the owner at the time of such taking. On appeal by the railroad company to the circuit court, it was permitted to show the subsequent alienation of most of the land by said Mary A. Pomeroy, to different parties (as stated in the opinion, *infra*). The only part not thus alienated was a strip actually taken by the railroad company; and the deed conveying that portion of the land which would otherwise have included this strip, contained the following reservation: "The said party reserving to herself all that part of the land above described, which The Chicago and Milwaukee Railroad Company occupy in crossing said land, either for right of way or any other (use), and reserving to herself the right to claim and receive any and all damages which the land above described sustained or does not sustain, by reason of said railroad crossing said tract of land or running near to said land," etc. The company also put in evidence, against objection, the record of a former suit in which Mary A. Pomeroy recovered $55 as damages against it for a trespass in entering upon and digging up her close (being the premises here in question), and obstructing access thereto on the adjoining street, in constructing and running said Railroad, see 16 Wis., 640.

The circuit court instructed the jury, in substance that they should allow plaintiff as damages, 1. The full value of the land actually taken by the defendants. 2. The depreciation in the value of the rental of certain other portions of the land, which had been occupied by plaintiff's testatrix as a homestead, caused by the construction and operation of defendant's road, during the several periods while she continued to own these portions respectively. After a verdict in accordance with these instructions, a new trial was denied, and the plaintiff took his writ of error to reverse the judgment.

The following is the opinion of the court delivered by

PAINE, J.—This case presents a question which it would seem would have been thoroughly settled before this, but which we believe has never been decided by this court, and we find few instances in which it has been determined by any other. Stated in its simplest form, it is this: Where land is taken for a railroad, which is constructed, and the owner has a claim for damages to the entire tract of which the land taken formed a part, if, before the damages are assessed or paid, the owner sells the tract without any provision in the contract of sale respecting the damages, what effect does such sale have upon the claim? Does it still belong to the original owner, or does it run with the land and pass to the purchaser?

Upon principle it ought still to belong to the original owner. Where there is a sale of a tract of land upon which there is an obvious existing easement or burden of any kind, like an ordinary highway, a railroad, or mill-pond, the fair presumption, in the absence of any express provision in the contract upon the subject, is, that both parties act with direct reference to the apparent existing burden, and that the vendor demands, and that the purchaser pays, only the value of the land subject to it. This presumption is independent of the question whether the party enjoying the easement has perfected his title as against the vendor or not. Nothing being said upon the subject, they deal with the property in its existing condition, and upon the assumption that it is subject to all the burdens to which it appears to be subject. This doctrine was established by this court in the case of Kutz *vs.* McCune 22 Wis. 628, and it is directly applicable to the solution of the question now under consideration.

For, if such is the fair construction of such a contract of sale, it follows, that, if the land were damaged, the original owner ought still to be entitled to the compensation, because he has suffered the loss, in deducting the amount of the damage from the contract price. The purchaser, who has paid only what the land was worth, subject to the burden, and upon the assumption that it was to continue, has lost nothing and ought to receive nothing. This conclusion is also in harmony with the rule that has been established requiring the value of the land taken, and the damages for the taking, to be assessed with reference to the condition of the property at the time of the taking. See Kennedy *vs.* The Mil. and St. P. Railway Company 22 Wis. 581; Parks *vs.* Boston, 15 Pick. 198; Whitman *vs.* Railroad Company 7 Allen 313.

The same reasoning which shows that the damages should be assessed with reference to the time when the land was taken, shows also that they accrued to the party who was then the owner, and should be paid to him. And such is the result of the only authorities we have found bearing directly upon the question. See Rand *vs.* Townshend 26 Vt. 670 and Lewis *vs.* Railroad Co. 11 Richardson Law (S. C.) 91.

This view of the law upon this point makes it necessary to reverse the judgment, for erroneous rulings in respect to the amount of damages to which the plaintiff in error was entitled. It appears that his testatrix was the owner of a tract of land in the City of Kenosha, which was laid out in lots and blocks. The north block she occupied as a homestead. The railroad was located and constructed across the tract along one of the streets upon which the lots fronted. Subsequently, she sold a part of the tract south of her homestead to her son, by whom it was mortgaged to third parties; and it was afterward sold on a foreclosure. This part so sold was actually crossed by the railroad. Afterward she sold the western part of the block constituting the homestead, but the portion sold did not anywhere border on the land taken for the railroad, the road being at the east side of the block. She, still later, sold the remainder of the homestead, reserving, however, all that part of it actually occupied by the railroad company, "and reserving to herself the right to claim and receive any and all damages which the land above described sustained or does not sustain by reason of said railroad crossing said tract of land or running near to said land."

The case was argued by the counsel of the company upon the assumption that some reservation was necessary in every such sale, in order to enable the vendor to retain the claim for compensation. And he then urged that the damages so reserved were only those caused to the piece of land last described in the deed, immediately preceding this reservation, which was the land actually occupied by the railroad company which the grantor had also just reserved. Such a construction of the language would have been contrary to its plain meaning, and wholly inadmissible. But as upon our view of the law, the right of the vendor to the compensation after the sale does not depend upon any reservation, it becomes unnecessary to consider more particularly the construction of the one here made. The rulings of the court below denied to the plaintiff in error the right to recover any damages to that part of the land sold by his testatrix to her son, even while she owned it; and they limited the right, so far as the homestead block was concerned, to the difference in rentable value of the portions sold separately, down to the time when they were respectively sold.

This was all erroneous. The true rule was, that the plaintiff in error, as the personal representative of his testatrix, who owned the entire tract at the time it was taken for a railroad, was entitled to recover the entire damage to the tract, a part of which was taken, to be assessed upon principles governing the assessment of such damages, and without any reference to any subsequent sales by her; though the amount of her recovery in the trespass suit should probably be deducted.

The judgment must be reversed, and the cause remanded for a new trial.

So ordered.

European and North American Railway.

A correspondent of the Boston *Journal*, writing from Bangor, Me., says:

The announcement has already been made that the last rail on the European and North American Railway has been laid, and thus uninterrupted communication opened with St. John, N. B. A new era is thus as it were opened to our city, as the whole track is now very nearly completed, so as to make the great highway of European travel pass this way. Less than five years have now elapsed since the first blow was struck upon the enterprise, when it was predicted that in less than ten years the largest portion of travel between the two continents would pass from Boston to Halifax by rail, and thence by steamers to Liverpool, leaving on the arrival of the cars every day.

The distance from Bangor to Halifax is 478 miles, almost to a mile the same as from Bangor to New York. The road is already completed to Amherst, N. S., 342 miles, and from Truro to Halifax, 61 miles; across the intervening space from Amherst to Truro 75 miles remain, the grading of which is completed, or nearly so, and the road will be open for travel in a few months. When this is accomplished it is estimated that from 12 to 20 hours time in travel will be saved between Halifax and New York without materially increasing the expense. The great amount of seasickness and discomfort, as well as danger, which will thus be saved must inevitably give the route a great advantage over the steamboat to all travelers, as is ever true in all cases of competition between land and water travel by steam.

To this city this enterprise is regarded as one of vast consequence and importance, by opening up a large field to our business men for trade and manufacturing art. Already it has caused some six or seven of the largest tanneries in America to be built or commenced, and corresponding villages to spring up. Other industries are being brought into activity and new projects continually started. The building of the road in queston has also led to the completion of the Piscataquis road to Dover and Foxcroft, now pushing its way to MooseheadLake and thence on to Richmond, Canada. The branch road to the Aroostook is also ready to be begun upon as soon as the E. and N. A. is fully completed, bringing all that rich territory to our very doors. The completion of the European road places us in connection by rail with the whole territory adjacent to the St. Andrews road, and thus enabling travel by rail at once to pass from this city to Houlton and St. Andrews, or Calais.

The event has been regarded as one altogether sufficiently auspicious to be worthy of a public celebration on occasion of its being opened, the same to come off on the 18th inst. The President of the United States members of his Cabinet, and many other distinguished persons are to be present, and it is anticipated that our city will on that occasion have such a season of festivities as Maine has never before enjoyed.

North Pennsylvania Railroad.

The Allentown *Chronicle* says that the new track on the North Pennsylvania Railroad is rapidly going forward, and it is expected that the double track will be completed from Philadelphia to Fort Washington in time to be used under the winter arrangement of trains. The new iron bridge over the Wissahickon is being put in place, and this is nearly the only gap between the two points. The second track between North Wales and Lansdale is also nearly ready for the iron. When this is done there will be a continuous double track from North Wales to Souder's, a distance of about eight miles. These stretches of double track road enable the coal trains to make part of their trips during the day, instead of running altogether at night. It will probably be two years or more before the double track is finished to Bethlehem, as a good deal of grading will be needed at different points.

Osage Valley and Southern Kansas R. R.

This road is advertised to be sold in St. Louis on the 16th of October, to pay the interest now due on the bonds, amounting to about $20,000. Boonville is at present its northern terminus, and Warsaw, in Benton County, is its southwestern. Before the late civil war the road was nearly graded from Boonville to a point about ten miles south of Tipton, but the war coming on, operations were suspended until 1867, when additional aid to the amount of $175,000 was furnished by Cooper County, and $23,000 by Willow Fork Township of this county, the work was resumed and the roadbed completed and ironed between Boonville and Tipton, a distance of twenty-six miles. In 1868 it was leased to the Missouri Pacific Railroad Company for a term of thirty years, they paying 35 per centum of the gross earnings of the road, since which time that company has operated it. The sale in no wise affects the Pacific Company's lease. The interest in that part of the road south of Tipton was also revived in 1868 by the people of Morgan and Benton counties, the former subscribing $100,000 and the latter $200,000, which sums have been expended in the grading of the road throughout those counties. The road is graded to Versailles, in Morgan County, and also about twenty-five miles in Benton County, leaving yet to be graded that part of the road from Versailles to the Benton County line, a distance of fourteen miles, and about six miles in Benton County.—*St. Louis Journal of Commerce.*

Portland and Rochester Railroad.

At the annual meeting of this company held in Portland on the 4th inst., John Lynch, Frederick Robie, Henry P. Dean, A. K. Shurtleff, Winthrop G. Ray, John McDuffee, J. S. Richer, H. J. Libby and Rufus E. Wood were re-elected directors.

The earnings of the road for the year have been $85,569 90, giving a nett over expenses of $30,617 44, an increase over the previous year of $11,143 72, chiefly derived from the opening of the road to Rochester, N. H., on the first of September last.

The directors in their report recommend the issue of second mortgage bonds to an amount not exceeding $450,000, the avails to be devoted to relaying iron on the older portion of the road, the repairs and construction of station houses and the purchase of additional rolling stock, which the fast increasing business of the road demands.

A proposition to build a branch from some point near the Saco river to Moderation and Bonny Eagle Falls was referred to the Directors, with power to encourage the building thereof and furnish such aid as the financial condition of the road will warrant.

Informal but gratifying statements were made concerning the progress of the Nashua and Rochester and Concord and Rochester roads which are to connect with the Portland and Rochester and give lines from Portland to Worcester and Rutland.

☞ The Hartford *Post* says that work has been renewed on the Boston, Hartford and Erie Railroad, near Putnam, Ct. About a dozen laborers are laying the old track and extending it, and a gravel train will soon be put on to convey material for a fill about two miles out of that village. The road is nearly ready for the temporary track the entire distance between Putnam and Willimantic, and the iron will soon be forthcoming.

☞ The National Junction Railway Company will shortly begin to tunnel N street, Washington. They will commence at Rock creek and come out at New Jersey avenue, about a mile and a half from the starting point. The work is estimated to cost $1,200,000, all of which has been paid in.

Erie Railway.

The annual meeting of the stockholders of the Erie Railway company was held in the Grand Opera House building at 11 A.M., on the 10th inst. Shortly before assembling, a meeting of the directors was held, to which was presented a letter of resignation from Messrs. Jay Gould, James Fisk., Jr., and Frederick A. Lane. The reasons given for the resignations were the persistent occurrence of attacks upon what is known as the "classification act," it having been charged that the object of this statute was solely to perpetuate the office and power of Fisk, Gould and Lane. They had always been willing to submit to the vote of the stockholders, and offered this as a practical test of their readiness to abide by such decision. They would not again take up the trusts which they laid down unless freely restored to them. On motion of Mr. Eldridge, the resignations were accepted.

The stockholders meeting was presided over by Mr. Henry W. Rathbone. The proceedings of the Board of Directors were ratified by a unanimous vote. Mr. Swan the representative of the English stockholders, was present during the whole meeting, as were also some German stockholders belonging to the opposition.

Resolutions endorsing the administration of the affairs of the company were unanimously adopted. The poles were closed at two o'clock. Messrs. Jay Gould, James Fisk, Jr., and Frederick A. Lane were elected directors for the full term of five years without a dissenting vote. The amount of stock represented was $33,365,000.

At the afternoon session of the Board of directors, Messrs. Gould and Fisk were reappointed President and Vice President, and Messrs. Fisk, Gould, Lane, Archer and Armsdale were continued on the Executive Committee. All the other officers were unanimously re-elected.

☞ At the adjourned annual meeting of the stockholders of the Alabama and Chattanooga Railroad, held in New York on the 9th inst., the following gentlemen were elected: President, Wm. F. Drake, New York city; Directors, Russel Sage, New York, A. J. Drexel, Philadelphia, R. T. Wilson, New York, John S. Barbour, Alexandria, Va., J. Lowber Welch, Philadelphia, Henry A. Symthe New York, Philo C. Calhoun, New York, Wm. C. Sheldon, New York, C. W. Leavitt, Philadelphia, G. Hilton Scribner, New York, A. F. Higgins, New York, Wm. D. Bishop, Bridgeport, Josiah Morris, Montgomery, Ala., John S. Kennedy, Tuscaloosa, Ala.

☞ The Fitchburg *Reveille* says the stock of the Ashburnham Railroad has been all taken up, and at a meeting of the stockholders in Ashburnham the following persons were elected directors: G. C. Winchester, O. Whitney, David Nevins, A. Whitney, H. A. Blood, O. T. Ruggles, and A. A. Walker. A contract has been made with Patrick Lynch of East Boston to build the road for $51,000 and it is to be completed by the first of June next.

☞ The Detroit *Journal of Commerce* says that H. E. Smith, President of the Detroit, Lansing and Lake Michigan Railroad, has been elected President of the road being commenced, known as the Greenville, Staunton and St. Louis Railroad. The contract for building the road was let on Thursday.

New Census and Patent Laws.

We are indebted to Munn & Co., publishers of the *Scientific American*, for a neat little bound volume of 120 pages, entitled as above. It contains the complete census of 1870, showing the population, by counties, of all the States and Territories, with their areas, and the population of the principal cities. Also, the new patent laws in full, with forms, official rules, directions how to obtain patents, copyrights, regulations for trade marks, assignments, how to sell patents, etc. Also, a large variety of valuable information relating to waterwheels, steam engines, and other mechanism, with many useful tables and recipes, 175 diagrams, of mechanical movements, etc. Price, 25 cents. A more valuable compendium, for so small a price has rarely been published.

Michigan Railroad Aid Bonds.

The case raising the question of the validity of the railroad aid bonds was submitted in the United States Circuit Court yesterday, Judges Emmons and Longyear sitting. It is the case of Bickwell against the city of Port Huron, and is brought to recover interest and principal on certain municipal bonds issued in aid of a railroad. The case was submitted on briefs and without argument, or rather one side was thus submitted and the other side was allowed ten days in which to prepare a brief. It is understood that Judges Emmons and Longyear will certify a division for the purpose of having the case taken to the United States Supreme Court, and the case has been submitted at this early day in order to bring it before the United States Supreme Court at the next January term. It is understood that all the questions involved will be raised on the hearing, so that this vexed question of railroad aid bonds may be disposed of by the Supreme Court finally and forever.—*Detroit Post, Oct.* 5.

☞ At a meeting of the stockholders of the Cincinnati and Gt. Northern R. R. Co., in Cincinnati on the 30th ult., the following gentlemen were elected directors: Col. S. W. Morton, Gen. J. C. Fremont, Judge J. C. McKeemy, Jas. T. Brady, Esq., Hon. F. C. Le Blond, Gen. Durbin Ward, W. A. Weston, Judge A. S. Latta, Davis Johnson, A. J. Hodder, and H. D. Faulkner. At a subsequent meeting of the Board, Col. S. W. Morton, was elected President; Jas. T. Brady, Esq., of Pittsburg, the Treasurer, and Hon. T. Wrightson, Secretary.

☞ The earnings of the Chicago and Alton Railroad for the month of September, 1871, were $505,904.92, against $497,519.20 in September, 1870, an increase of $8,385.72. For the nine months from January 1, 1871, $3,970,676.56, against $3,528,385.48 for the corresponding period of the previous year, an increase of $442,341.08.

☞ The gravitation railway at East Dorset, Vt., for bringing marble from the summit of Dorset mountain, is over a mile long with a grade of 1240 feet. It has two tracks, so arranged that the loaded train down draws the empty one up. The cost of the road was $30,000, and it is the longest road of the kind in the country.

☞ The officers of the Albany Street Railway Company, recently elected, are: President, Henry Crandell; Vice-President, Abram Van Vechten; Secretary, John W. McNamara; Treasurer, Henry Crandell.

☞ The Newburyport *Herald* says the Directors of the Eastern Railroad have decided to lay a second track from Boston to that city.

Atlantic, Mississippi and Ohio Railroad.

The Lynchburg *Republican* thus gives vent to its indignation over the proceedings in the United States Circuit Court against the Atlantic, Mississippi and Ohio Railroad:

The telegraph this morning gives us the rather startling piece of intelligence that Mr. James E. Tyson, of Baltimore, has obtained from Judge Bond, one of the District Judges of the United States, an injunction against General Mahone and the Atlantic, Mississippi and Ohio Railroad Company, restraining said Company and its President from the exercise of any of the powers and rights attached to them by law, and intended to contest the constitutionality of the laws of the State which consolidated the railroads from Bristol to Norfolk. These railroads have been consolidated for more than two years, and for nearly one year have been lawfully styled the Atlantic, Mississippi and Ohio Railroad Company. This has been done by the consent and action of the stockholders of said companies—almost every one of them, we think, and all opposition to said movement has been hushed, as the public thought, forever. Of course we have no means of deciding positively this morning the motives that prompted this strange action on the part of Tyson, but we think it not too harsh to infer that the movement has been made at this particular moment by the enemies of our line of road, in order to prevent Gen. Mahone from perfecting his financial negotiations now going on in New York, or to extort from him concessions which he will never make. In any aspect of view, the movement certainly comes at a late period, and on too questionable a ground to suppose that it is dictated by any other than malicious and corrupt motives.

Monadnock Railroad.

At the recent annual meeting of the stockholders of this company at Peterborough, N. H., the following directors were chosen for the ensuing year: Jonas Livingston and H. K. French, Peterborough; Oscar H. Bradley and Peter Upton, Jaffrey; J. H. Fairbanks, Winchendon; H. A. Blood, Fitchburg, and Willis Phelps, Springfield. Mr. Livingston was elected president and C. A. Parks, clerk and treasurer. The entire debt of the corporation is $99,825 14, which covers various purchases of real estate, money due from delinquent subscribers to stock, and $22,500 to be paid by Peterborough when the extension from Peterborough to Hillsborough shall be put under contract. In the seven months all or part of the road has been operated, $11,395 has been earned, but since completion to Peterborough receipts have been very largely increased, making a good profit for operating it. The stockholders voted to fund the debt.

A Wooden Railroad in Michigan.

The Marquette (Mich.) *Journal* states that the Morgan Wooden Railway is completed and a great success. The road was built by the Morgan Furnace Company, for the purpose of transporting charcoal to the furnace from Dead River, where the company owns several thousand acres of valuable wood land. The road is about nine miles in length, with a grade of about four feet per mile to the summit between Carp and Dead rivers, whence the descent is gradual to the Carp River Valley. The road cost about $5,000 per mile though there are some deep cuts and considerable trestle work. The cars are at present drawn by mules, but it is probable the company will put on a small locomotive. The cars hold about six hundred bushels of charcoal. It is found that coal can be transported over such a road a distance of ten or fifteen miles cheaper than it can be hauled three or four miles in wagons. It is the intention to extend the road two miles further, to another set of kilns being constructed. The Jackson Company has also built a wooden road six miles in length, upon which it is running a small locomotive.

Illinois Central Railroad.

The statement of this Company for the month of September, 1871, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,072.08 for	$40,398 55
Acres Int. Fund Lands sold	80.00 for	938.00
Acres Free Lands sold	335.27 for	7,470 59
Total sales during month of September, 1871	4,487.35 for	$48,807 14
To which add Town Lot Sales		1,252 15
Total of all	4,487.35 for	$50,059 29
Cash collected in September, 1871		$137,864 45

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 402 Miles.	Total. 1109 Miles.
Freight	$499,575 00	$102,915 00	$592,490 00

Other sources	89,000 00	2 940 67	91,940 67
Tot. Sept., '71.	$731,461 57	$154,384 30	$885,845 87
Tot. act'l earn'gs, Sept., '70	$752,698 73	$148,536 56	$901,235 29

Comparative Shipments from Lake Ports.

The following shows the aggregate shipments of flour and each variety of grain from the ports of Chicago, Milwaukee, Toledo and Duluth, including those by Lake and rail, from January 1 to and including September 30, 1871, and for the corresponding period in the other years indicated, viz.:

	1871. Bbls.	1870.* Bbls.	1869.* Bbls.
Flour	2,575,211	1,727,332	1,578,831
	Bush.	Bush.	Bush.
Wheat	25,765,017	22,521,884	21,881,816
Corn	38,833,871	13,911,867	16,050,810
Oats	11,264,480	7,390,100	5,378,403
Barley	2,129,325	1,729,573	81,825
Rye	1,198,474	579,130	208,926
Total	79,191,167	46,132,644	44,501,783

* Rail shipments from January 1 to opening of navigation not included.

☞ The citizens of Provincetown, Mass., have voted to subscribe for stock or bonds in the extension of the Cape Cod Railroad from Wellfleet to Provincetown, to the amount of $98,300, at the rate of $100 per share. Since this action of the town, individuals are subscribing liberally. One of the insurance companies has taken fifty shares. It is hoped the cars will be running into Provincetown by next June.

☞ Ground was broken on the 9th inst. at the Wells estate for the building of the Shawmut Branch Railroad, which is to run through a thickly settled portion of Ward 16, and connect at Harrison square, Boston, with the Old Colony and Newport Railroad.

☞ The Lake Shore Railway Company is surveying the route and letting contracts for the building of a road from its branch near Kinsman, Ohio, to Youngstown, Ohio. The road is promised to be finished within a year.

☞ The formal opening the Missisquoi Railroad from St. Albans, Vt., to Richford took place on Saturday. Trains will hereafter run regularly over the entire road, a distance of twenty-eight miles.

☞ The *San Francisco Bulletin* says that a new company has been organized at Logan, Cache county, to build the Utah Northern Railroad, narrow gauge, from Ogden to Soda Springs, through all the principal northern settlements and towns. Sufficient capital was subscribed, officers elected, and work commenced. The road is expected to be in running order to Logan by December next. John W. Young was elected President and Superintendent.

Notice to Contractors.

PENN. & SODUS BAY RAILROAD CO.,
CHIEF ENGINEER'S OFFICE,
SENECA FALLS, N. Y., Sept. 25th, 1871.

PROPOSALS for furnishing and laying the Iron and Ties on the graded portion of this Road, will be received at this office until noon of Wednesday, the 25th of October. Said portion consists of the Southern Division, 25 miles long, extending from Spencer, in Tioga county, through Tompkins county to the Seneca county line; and the Middle Division, 33 miles long, from the Seneca county line to Waterloo; in all about 58 miles.

Proposals will be received for either or both Divisions, and are to be based on the following terms of payment, viz: twenty per cent. to be in the capital stock of the company; thirty per cent. in town bonds or cash, at the option of the company, and the remaining fifty per cent. in the first mortgage bonds of the Road. The Company reserves to itself the right to reject any or all bids that are not deemed consistent with their interests.

Specifications may be procured by application to the undersigned. ALFRED F. SEARS,
3t30 Chief Engineer.

Notice to R. R. Contractors.

PROPOSALS for grading and masonry for about twenty miles of the Nashua, Acton and Boston Railroad, will be received at the office of the engineers until the evening of the 23rd of October next. Proposals may be made for grading one or more sections into which the work will be divided. Profiles and specifications may be seen at this office. The corporation reserves the right to reject any or all proposals.

E. H. SPALDING, President.
NASHUA, Sept. 25, 1871.

The Euphrates Valley Route to India.

The report of the Select Committee appointed to examine the subject of railway communication between the Mediterranean and the Black Sea and the Persian Gulf has been published. The committee report that they have examined several witnesses, including Sir Henry Rawlinson, General Chesney, Sir John Macneill and others, and recommend that they be re-appointed next session to continue their enquiry. The evidence adduced goes to show that the route from Alexandretta on the Mediterranean to the head of the Persian Gulf, passing, as may hereafter be determined, either along the valley of the Euphrates or the Tigris, but generally known as the Euphrates valley route, is that in every respect it is best adapted for the construction of a railway; that it is the shortest and most direct route between Great Britain and her Eastern possessions, that it is the cheapest route for a railway, the most free from engineering difficulties, the most surely defended by England, and the most likely to prove remunerative. Both in an engineering and political and strategical point of view, this route would appear to possess great advantages over any of the others which have been proposed. The various routes which have been suggested from Trebizond and other points on the Black Sea, are all open to the serious objection that while they would be of the greatest service to Russia, they would be altogether beyond the control of Great Britain, while the engineering difficulties with which they are surrounded are of themselves sufficient to exclude them from practical consideration.

The larger undertaking from Constantinople to the Persian Gulf, of which the Euphrates Valley line would naturally form a part, though not open to political objection, is said to be so beset with difficulties in an engineering sense as regards the portion from Constantinople to the place of junction with the Alexandretta and Persian Gulf line, that its early realisation appears improbable, although its ultimate achievement may be regarded as certain to follow that of the minor undertaking. On the other hand, the practicability of the Euphrates Valley line, from Alexandretta to the Persian Gulf, and its political and strategic importance to this country, appear to be fully established.—*Herapath.*

Western Union Telegraph.

At the annual meeting of the stockholders of this company on the 11th inst., the following Board of Directors was chosen: Hugh Allan, James H. Banker, Nathan A. Baldwin, William D. Bishop, Horace F. Clark, Ezra Cornell, Alonzo B. Cornell, Harrison Durkee, William E. Dodge, Sheppard Gandy, Norvin Green, Augustus W. Greenleaf, John A Griswold Wilson G. Hunt, George Jones, C. Livingston, Edwin D. Morgan, William Orton, O. H. Palmer, E. S. Sandford, Augustus Schell, Hiram Sibley, Z. G. Simmons, John Steward, Moses Taylor, Daniel Torrance, George Walker, E. B. Wesley, Stillman Witt.

The Executive Committee for the ensuing year is as follows: James H. Banker, Horace F. Clark, A. B. Cornell, H. Durkee, A. W. Greenleaf, E. D. Morgan, Wm. Orton, O. H. Palmer, Augustus Schell, John Steward, and E. B. Wesley.

The following is a list of the executive officers chosen: President, William Orton; vice-presidents, A. B. Cornell, Augustus Schell and O. H. Palmer; secretary, G. H. Mumford; treasurer, R. H. Rochester; auditor, W. H. Abel. The total share capital of the company is $41,071,710. About thirty million dollars were voted. In the new board of direction there are four new members compared with last year.

☞ The Camden (Ark.) *Democrat* says the books of the Camden and Red River Railroad Company are now open in that city for subscription to the capital stock. It estimates that $200,000 is sufficient to grade and tie the road from Camden to Washington.

☞ Thirty locomotives to be used on the Intercolonial Railway are in course of construction at the Iron Foundary of Alderman Montgomery, Freshwater, Halifax.

The Intermediate Section of the Chesapeake and Ohio Railroad.

The following description of the progress of the Chesapeake and Ohio Railroad is extracted from the letters of Charles Nordhoff to the *Tribune*, and may be accepted as the late and very reliable intelligence from that great work. There are 227 miles of the road opened on the eastern end, and about 60 miles at the western in operation. The interval between the two portions, it will be seen, is in a forward state:

More than two years were consumed in the survey of the wild country between the White Sulphur Springs and the Falls of Kanawha. The result is a roadway which passes through the mountains on an easier grade by far than any other of the great East and West lines connecting the Atlantic with the West. The Erie Railway has grades as high as 84 feet to the mile; the Pennsylvania has 95 feet to the mile; the New York Central, though in general it has easy grades, runs up to 95 feet to the mile; the Baltimore and Ohio runs up to 116 feet to the mile. The Chesapeake and Ohio will have no grades over 80 feet to the mile facing west, and west of Howard's Creek it has none over 20 feet to the mile. It will have the lowest grades of all the great East and West lines, and this, joined to the fact that it taps the Ohio at a point, Huntington, so low down that it is always accessible to steamboats, and that it will give the South-West its shortest connection with the Atlantic, would make it a great enterprise, important to the country, even if it did not pass through a region of unexampled richness in coal, iron, and timber, which has heretofore been shut out from a market, and closed against capital and industry.

The New River and the Greenbrier have, in the course of ages, worn their way through the mass of hills and mountains which lie between the Falls of Kanawha and the White Sulphur Springs. In all this country, so far as I could notice, there are very few signs of the upheaval strata. The rocks lie in their beds as they were deposited, and the river seems to have worn its way down from the tops of the mountains to its present level. It was to carry an easy grade that the engineers of the Chesapeake and Ohio Road selected the course of the New River for their line. There, Nature had done, in the course, perhaps, of millions of years, a work of excavation for them, which gave them the means of laying a road bed so nearly level that it presents no obstacle to travel or transportation. They had only to take care that the road should run above the level of high water; and as the river rises sometimes 40 or 50 feet, this has placed the line high above the low water

which prevails at this season of the year. At two great bends which the New River makes, tunnels are building. One of these, 6,400 feet long, will be the longest in the United States until the Hoosac tunnel is completed. It saves nearly five miles of difficult road building. In these tunnels large gangs of men are employed at several points; and the whole line is in a good state of forwardness. With the exception of some miles of easy work near the Greenbrier, which can be done so rapidly that it was not advisable to put it under contract until next Spring, the whole line of the New River and Greenbrier is under contract, and everywhere the contractors' gangs are busily at work. A great part of the road-bed has already been completed, and all is so planned and carried on that the whole line shall be done simultaneously with the tunnel at Great Bend. There is no reason to doubt that, as the work is now going on, the road can be opened by or before next October, which I believe the engineers expect to accomplish. Indeed, though there is still some heavy work to be done—for it is all, or nearly all, heavy work—it seemed to me that the worst had been done first, and that what remains is neither so difficult nor likely to be so costly or tedious as what is finished. The piers of the bridge at the crossing of the New River, at Miller's Ferry for instance, the longest bridge on the road, are completed; and one span of the bridge will be laid this Fall. This bridge will be 670 feet long, and the span which was being raised when I passed there was 250 feet in length.

There is very little bridging needed on the New River (I believe there is only one other bridge besides that mentioned above,) and there will be no trestle-work at all for 110 miles of road. Eventually, I believe, it is intended to replace all the trestle-work there is with masonry or with dirt embankments. I noticed that every bridge, since we left the Ohio River, is completed, for a double track; and I am told that all the tunnels but two on the whole line are made to take a double track also. Indeed, *Thorough* seems to be the motto of the engineers. About 5,000 men are now employed on the work of construction along the unfinished part of the line. The main road from Colesmouth to Kanawha Falls lies almost constantly in sight of the railroad, and frequently crosses it, and thus we had an opportunity to see the condition of this work, so important to all this region. The grading is completed, with a few unimportant breaks, to the Falls; the ties are either laid on at hand and all is ready for the iron. The work has not been very heavy so far, for the country is comparatively easy. The mountain torrents, which pour into the Kanawha, have made necessary a good deal of masonry, and it is very plain that the Company's Chief Engineer Major H. D. Whitcomb, has known how to select good masons. The high stone arches, bridges, and culverts are admirably solid, and the sandstone of the country has been laid in so workmanlike a manner that our party often stopped in admiration of it. I do not know of a road in the country whose stonework will compare with that of the Chesapeake and Ohio Railroad, so far as I have seen it.

☞ The Baltimore *Sun* says that the subject of a narrow gauge railway from that city to Cantonsville is engaging the attention of those interested in the matter, and that the preliminary surveys for a route for the contemplation road has been ordered.

☞ Recently two narrow gauge locomotives were shipped from Pittsburg for the Cherokee Railway Company of Georgia. These were the first narrow gauge locomotives built west of the Allegheny mountains.

☞ The Guilford extension of the Bangor and Piscataquis Railroad is progressing finely. Four miles of track have been laid, and half that distance has been ballasted.

Lake Shore and Michigan Southern Railway.

The earnings of this road for the year ending December 31, 1870, were as follows:

From passengers		$4,153,512 11
" freight		8,658,661 81
" express		282,088 87
" mails		142,190 67

The Lake Shore and Michigan Southern Railway Company is a consolidation of the following roads:

The Buffalo and State Line Railroad—extending from the city of Buffalo, in the State of New York, westward, to the State line of Pennsylvania — 68 miles.

The Erie and North-East Railroad—extending from the State line of Pennsylvania to the city of Erie, in the State of Pennsylvania — 20 miles.

These two roads were consolidated, under the name of the Buffalo and Erie Railroad Company, in the year 1867, in pursuance of laws of the States of New York and Pennsylvania.

The Cleveland, Painesville and Ashtabula Railroad—extending from the city of Erie, in the State of Pennsylvania, to the city of Cleveland, in the State of Ohio — 95 miles.

The Cleveland and Toledo Railroad—extending from the city of Cleveland, in the State of Ohio, to the city of Toledo, in the State of Ohio — 118 miles.

With a Branch, (or Northern Division,) extending from Elyria, (twenty-six miles west of Cleveland,) to the city of Sandusky, in the State of Ohio — 35 miles.

Also, extending from Oak Harbor, (twenty-six miles west of Sandusky,) to Millbury, (near Toledo) — 15 miles.

These two roads last mentioned were consolidated, under the name of the Lake Shore Railway Company, in March, 1869, pursuant to the laws of the States of Ohio and Pennsylvania.

The Michigan Southern and Northern Indiana Railroad—extending from the city of Toledo, in the State of Ohio, to the city of Chicago, in the State of Illinois — 244 miles.

This road was consolidated with the Lake Shore Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, in May, 1869, pursuant to the laws of Pennsylvania, Ohio, Michigan, Indiana and Illinois.

In August, 1869, the Buffalo and Erie Railroad Company was consolidated with the Lake Shore and Michigan Southern Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, pursuant to the laws of the State of New York, Pennsylvania, Ohio, Michigan, Indiana and Illinois, thus forming a continuous line of Railway, five hundred and forty miles in length, between the cities of Buffalo, in the State of New York, and Chicago, in the State of Illinois.

This company owns and controls branches as follows:

Elyria, Ohio, to Sandusky, Ohio — 35 miles.
Oak Harbor, Ohio, to Millbury, Ohio — 15 miles.
Toledo, Ohio, to Elkhart, Indiana, (Air Line) — 133 miles.
Adrian, Michigan, to Jackson, Michigan — 46 miles.
Adrian, Michigan, to Monroe, Michigan — 33 miles.

The following roads are under separate organizations, but the capital stock thereof is owned wholly by this company:

The Detroit, Monroe and Toledo Railroad—extending from Toledo, in the State of Ohio, to the city of Detroit, in the State of Michigan — 65 miles.

The Kalamazoo and White Pigeon Railroad—extending from White Pigeon, Michigan, to Kalamazoo, Michigan — 37 miles.

The following roads are operated by this company under leases:

The Jamestown and Franklin Railroad—extending from Jamestown, Pennsylvania, (where it connects the Erie and Pittsburg Railroad,) to Oil City, Pennsylvania — 51 miles.

It is contemplated at an early day to construct the line from Jamestown to our Main Line at Ashtabula, Ohio.

This company has a large proprietary interest in this road, and operates it under a lease for sixty per cent of the earnings. We also operate

The Kalamazoo, Allegan and Grand Rapids Railroad—extending from Kalamazoo, Michigan, to Grand Rapids Michigan — 58 miles.

The terms of this lease are the payment of interest on bonds and stock amounting to $103,800 per annum.

That portion of our Main Line from Toledo, Ohio, to Adrian, Mich., thirty-three miles, was acquired by a perpetual lease from the Erie and Kalamazoo Railroad Company, by the terms of which this company pays the sum of $30,000 per annum.

The whole number of miles of Railroad owned and leased by this company is one thousand and thirteen.

The company also has thirty-six miles of double track, mainly between Erie and Cleveland, and two hundred and thirty-nine miles of side tracks.

To meet the rapidly increasing business of the road it was found necessary, during the past year, to increase equipment to the extent of twenty-five

new engines, and six hundred and one additional cars of various classes, at a cost of $654,309 45.

The equipment at the close of the fiscal year stood as follows:

Engines	299
Passenger cars—all classes	247
Freight cars—all classes	6,077

The authorized capital stock is $50,000,000. Of this sum there has been issued to the stockholders of the various companies entering into the consolidation $35,000,000, leaving the sum of $15,000,000, which, under the provisions of the consolidation agreement, a copy of which is hereto appended, can be issued only by authority of a previous vote of the stockholders.

Of the $35,000,000 of stock issued, the sum of $533,500 is claimed to have been guaranteed by the late the Michigan Southern and Northern Indiana Railroad Company, as entitled to dividends at the rate of ten per cent. per annum. A claim is being preferred by holders of a portion of the guaranteed stock for dividends from 1857 to 1863, when the regular payment of dividends was commenced, which claim is in litigation.

The claim for back dividends has been released on three thousand five hundred and six shares, leaving one thousand eight hundred and twenty-nine shares unassented.

The bonded debt of the company (including the debt of the Detroit, Monroe and Toledo Railroad Company, and the Kalamazoo and White Pigeon Railroad Company, the stock of both of which roads is owned by this company) amounts to $22,283,000.

The annual charge for interest on this debt, and the $466,000 bonds of the late Cleveland and Toledo Railroad Company, in the hands of the sinking fund Commissioners, is $1,594,430.

The rate of intereft is seven per cent. on all except $200,000, which is eight per cent.

Of this debt nineteen classes of bonds are secured by mortgages on distinct portions of the several roads entering into the consolidation.

The company, on July 1, 1870, executed a consolidated mortgage, with a provision for a sinking fund, to secure the payment of bonds registered and coupon, to the amount of $25,000,000, bearing interest at the rate of seven per cent. per annum.

The interest on the registered bonds is payable quarterly (January, April, July and October), and on the coupon bonds semi-annually (January and July), both at the office of the Union Trust Company of New York.

Of the bonds secured by this mortgage, a sufficient amount has been set apart to secure the payment of the bonded debt at maturity and the proceeds of the residue will be appropriated to double tracking the Main Line and procuring additional equipment.

There has been built at Elkhart, Indiana, (the intersection of the Main and Air Lines,) a machine shop of brick and iron, six hundred feet in length by one hundred and twenty in width, with a blacksmith shop connected therewith, one hundred feet in length, by seventy-two in width, with other improvements, at a cost of $141,881 26.

This construction has enabled the Company to dispense, substantially, with the machine shops at Adrian and Laporte. The machine shop at Adrian has been appropriated to the Car Department. The shop at Laporte has been entirely discontinued. This has resulted in the saving of a large annual outlay, and in greatly increased facilities in the transaction of the business of the company.

New depots and other structures, where none had previously existed, have been erected at other points upon the road at a cost of $139,567 57.

Additional second track and side tracks, thirty-four miles in extent, have been constructed, at a cost of $314,406.

There has been expended in bridge masonry and permanent embankment, the sum of $391,039 93.

There has been expended in permanent work upon the Kalamazoo Division the sum of $73,800.

A further sum $39,449 65 has been expended in miscellaneous construction.

There has been advanced, for the purpose of the construction of the extension of the Jamestown and Franklin Railroad, from Franklin to Oil City and beyond, during the past year, the sum of $421,262 26. The completion of this extension has contributed to a large increase of the traffic of this company.

There been placed in the track, during the past year, eighteen thousand six hundred and sixty-one tons of new and re-rolled rails, including three thousand and fifty-four tons of steel rails. The cost of these rails, with the exception of the iron used in the construction of new side tracks, has been charged to operating expenses.

The business of the last year has demonstrated the necessity of additional double track, and it has been determined to construct, during the present year, one hundred and fourteen miles between the cities of Buffalo and Toledo, that being the part of the road where additional facilities are more immediately and imperatively required.

This includes the rebuilding of that portion of the Northern Division of the late Cleveland and Toledo Railroad, extending from Sandusky, Ohio, to Oak Harbor, about twenty-six miles.

The expenditures for construction during the year, as stated in the Report of the President, amounted to $1,099,644 41; real estate purchased, $13,916 49; new engines, $266,316 45; new cars, $387,993; advances for construction of Jamestown and Franklin Railroad ($421,262 26, less $300,000 their 2d mort. bonds at 85c., $255,000 and 40 per cent. earnings of that road, $51,694 67) $114,567 59—total, $1,882,437 94.

The means to meet the above expenditures have been derived from the following sources, viz: surplus earnings, as already shown, $559,157 36; proceeds of $718,817 82 increase of debt—funded and floating—$685,817 82; sales real estate, Chicago, etc., $475,865 61; note, Le Grand Lockwood, paid, $139,989 90; decrease in other available assets, $21,607 25—total, as above, $1,882,437 94.

The number of engines on the road December 31, 1870, was 299. Miles run by engines, 8,229,447. Cost per mile run, 6.67 cents. The cars are classified as follows: first-class passenger 125, second class and smoking 15, emigrant 38, railroad postal 5, baggage and postal 12, baggage 48, directors' 2, paymasters' 2, box freight 3,329, stock and oil 1,001 platform, 1,247, coal 362, caboose 138.

Tons of through freight moved eastward, 1,815,984; do., westward, 448,217—total, 1,759,201. Way freight, eastward, 691,287; do., westward, 495,286—total, 1,186,573. Through and way eastward bound freight, 2,007,271; do., westward, 938,503—total freight movement, 2,945,774. Tons carried one mile eastward, 411,047,535; do., westward, 158,786,131—total, 569,833,666.

Number of through passengers carried, (between Buffalo and Chicago only) 1st class 61,474; 2d class, 8,277; 3d class, 3,277—73,028. Way passengers, 1st class, 1,880,088; 2d class, 22,859; 3d. class, 24,854—total, 1,927,796. Total of all classes, 2,000,824. Passengers carried westward, 1,039,646; do., eastward, 961,178. Miles traveled by through passengers, 39,435,120; do., way passengers, 119,955,817—total mileage of passengers, 159,390,937.

Tons of eastward bound freight carried on the Jamestown and Franklin Railroad, 87,079; do., westward, 85,039—total, 122,118. Tons carried one mile, 4,201,905. Through passengers carried, 5,869; way do., 58,747—total, 64,616. Total mileage of passengers, 1,109,177.

CONDENSED BALANCE SHEET, Dec. 31, 1870.

American Railroad Journal.

Saturday, October 21, 1871.

Stock Exchange and Money Market.

The reports of the great Chicago fire unfavorably influenced the course of Money, Stock and Produce values through the week. The heavy drain of currency diminished the city bank reserves, and brought their aggregate hoard of lawful money below the 25 per cent. of their liabilities, called for by the national banking act. The U. S. Sub-Treasury currency balance was also materially reduced. The offerings of Money in the open market have been on a less liberal scale, and loans and discount rates have been quoted very firm at extreme figures, to the prejudice of even the most responsible borrowers, whose wants have been less promptly provided for at even the ruling quotations, which on Tuesday of the current week were full 7 per cent. to the Government houses, 7 per cent. in currency and gold and a commission to the Stock Exchange firms, and 7@ 12½ per cent. per annum in the discount form, with very few mercantile negotiations reported at the legal rate, which was an inside price. On Wednesday the demand continued urgent, for both speculative and commercial purposes, the latter largely for remittance to Chicago, whence came reports on Tuesday of the pretty general resumption of business by the banks of that city. The city banks, in their latest return, show a reduction of $3,754,200 of legal tender notes, $998,400 of specie, and $7,401,000 of deposits; also a reduction of $4,645,200 in their loan and discount averages, and an increase of $73,900 in their item of circulation. The city bank exchanges, last week, averaged $135,793,734; and thus far, this week, 132½ millions daily. The banks now hold $1,359,425 less of specie and legal tender notes, than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $9,277,700, against $11,610,708 same time last year. The city bank deposits are now $215,182,100 against $187,489,715 week ending Oct. 15, 1870. The legal tender reserve amounts to $50,841,900 against $50,526,279 same time last year. The circulation now stands at $30,334,000, against $32,967 705 same time last year. The loans are now $293,511,000, against $265,275,790 at this date last year.

The U. S. Sub Treasury reduced its currency balance $2,203,849 and enlarged its coin reserve $1,698,281, as the result of the week's business. The receipts of the office were $3,997,031 in coin, and $4,630,031 in currency; payments, $2,298 750 in coin, and $6,833,871 in currency. The office received $2,938,717 in coin or its equivalent, from customs; and disbursed $111,462 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,541,863 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $336,368,650; and as security for deposits of public money, United States bonds for $15,619,500. The aggregate of the outstanding circulation of the National Banks of the country is $323,509,652.

Government revenues were up to a fair average yield during the week. The excises yielded last week about 2¼ millions, and thus far since July 1, $41,581,736. The customs at the port of New York, last week were $2,809,063; and at the outports, equal to about $900,000 more, all in coin, or coin certificates.

Gold has been less confidently dealt in, and the price has declined materially, influenced, in good part by the Money pressure. The speculative call has been less active. The customs drain, up to a fair average; the export movement light. The range of the price during the week, has been from 113@114¼, and the closing quotation on Wednesday was 113⅛ against 114⅛ the preceding Wednesday. The specie outflow, last week, was $515,308; on Tuesday of this week, $53,000; and on Wednesday $200,000. The Gold Exchange Bank clearances have been as follows: Oct. 12, $55,007,000; Oct. 13, $82,946,000; Oct. 14, $70,913,000; Oct. 16, $35,783,000; Oct. 17, $52,967,000; Oct. 18, $38,446,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 30, 1871, $65,866,253, against $67,374,186 same time in 1870.

The export drain of specie was $515,308 last week, against $654,323, same week preceding year. The shipments since January 1, 1871, have been $58,871,182, against $50,320,907 same time in 1870.

The customs demand for Gold last week, averaged $489,786 a day; thus far, this week, it

has averaged $665,000 a day, or equal to a weekly aggregate of $3,990,000. The arrivals o specie from Europe, Havana and other foreign ports last week, were $54,852, and since Jan. 1 1871, $8,311,267 against $8,489,011 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $128,690,993 against $117,269,670 same time in 1870.

Foreign exchange has been decidedly lower, under a pressure to sell, but closes more firmly, with a moderate inquiry for prime bills. Bankers' sixty day bills on London closed on Wednesday at 108¼@108½; sight bills on London, 109¼@109½.

The produce exports from this port, week ending with Oct. 17, were to the currency value of $5,831,474.

Government securities have been in very moderate request and weak as to price, yet not offered with remarkable freedom.

Under the Treasury Department programme for October, Government proposes to sell Gold, as follows: Thursday, Oct. 26—Two Million. And to buy in, Five-Twenties, as follows: Wednesday, Oct. 25—Two Million.

On Wednesday, Government bought in four millions of Five-Twenties at 110 08@110 47 nett. The amount of bonds offered was $6,264,100.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅞@116⅛; U. S. Five-Twenties of 1862, 114¼@114½; U.S. Five-Twenties of 1864 at 113@113⅜; U. S. Five-Twenties of 1865, 114¼@114½; U. S. Five-Twenties of 1865 consolidated, 112@112⅛; U. S. Five-Twenties of 1867, 112⅜@112½; U. S. Five-Twenties of 1868, 112½@112¾; U. S. Ten-forties at 109⅛@109⅜; U. S. Six per cent. currency bonds, 110⅛@111.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 4.	Oct. 11.	Oct. 18.
Consols	93 3/16	92½	93 3/16
U.S. 5-20's of 1862	93⅛	92½	90¼
U. S. 5-20s, 1865	93¼	92½	91 11/16
" 1867	93⅛	92½	91 11/16
" 10-40s	90⅛	89	88 11/16
Erie	25⅛	22⅝	22¾

The new Funding Five per cent. Loan was quoted in London on Wednesday at 2¾ per cent. discount.

State bonds have been in quite moderate demand at depressed and unsettled prices.

Railway bonds have been comparatively firm, and in fair demand for investment purposes. Central Pacific Sixes closed at 100¾@101. The six per cent. First Mortgage Loan of the Chesapeake and Ohio Railroad is meeting with a ready sale at the present price of 93 per cent. and accrued interest.

The St. Joseph and Denver City eight per cent. gold bonds have been in fair request at the established price of 97½ and accrued interest.

Railway and miscellaneous share property has been moderately active at very variable prices, closing quite feverishly and irregularly.

General business has shown less activity. Values of Domestic Produce have been unsettled. Bread Stuffs closed weak: Provisions firm. Middling upland cotton closed on Wednesday at 19⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 230,571 bales, against 312,587 bales same time in the preceding year; exports 65,650 bales, against 66,140 bales in the previous year; stock at the ports at latest dates. 146,427 bales, against 177,851 bales same date 1870.

At the Live Stock Markets, Beeves have been in more demand at from 7½@13 cts.; Veals at 3½@11 cts.; Sheep at 4½@6½ cts.; Lambs at 6@7¾ cts.; Swine, 5¼@5½ cts per lb., all live weight. The week's receipts were 9,783 Beeves, 1,854 Veal Calves, 36,877 Sheep and Lambs; and 31, 846 Swine.

Foreign goods less active, as a rule; groceries have shown more firmness as to prices. The week's imports of foreign goods reached $6,244,-339, including $2,338,509 of dry goods.

Ocean freights have been fairly active and rates have been quoted firmer.

☞ The Catoctin (Md.) *Clarion* says of the Western Maryland Railroad, that Mr. Placide, bridge builder, and his army of track layers, some fifty or sixty persons, are now at work on the summit of the mountain, and descending to the Washington county side, putting down from one-fourth to one-third of a mile per day. In a few weeks the road ready for the cars will be built to Smithsburg.

Short Line to Europe.

The completion of the new rail connection with Halifax, Nova Scotia, which has just been accomplished, will shorten the present quickest time to England by several hours. We see it stated that it is intended to still further diminish the length of the sea voyage by building a road from Truro to White Haven Bay at the extreme eastern end of Nova Scotia, which is about 125 miles nearer Liverpool than Halifax. White Haven is a good harbor, with sufficient depth of water to accommodate large ocean steamers. A line of steamers from Liverpool to that place, connecting there with a railroad direct to New York, would be the shortest and quickest possible route between England and the United States.

Martinsburg and Potomac Railroad.

We have just seen the report of Mr. Edward Watts, Chief Engineer of the above railroad company, addressed to the Directors. It bears date September 23, 1871, and very forcibly demonstrates the importance of this particular road as a connecting link between Virginia and the Pennsylvania system of railroads. Major Watts looks to the intersecting of that line of Virginia improvements which extends from the James river to the Kanawha river, as well as the railroad from Charleston to Cincinnati. Major Watts estimates that the probable cost of grading and laying the track from Powell's Bend, on the Potomac, to Martinsburg, a distance of 10.72 miles, will be $284,865 05; and from Martinsburg to the Frederick county (Va.) line, in the direction of Winchester, 13.78 miles, $350,889 10.—*Hagerstown Mail.*

☞ The West Wisconsin Railway is now very nearly finished, and trains will be running through from Tomah to St. Paul by November 1. The earnings of the Road from local traffic on the completed portion constitute already a profitable business; and arrangements and connections are about perfected which will make it the Great Air-Line Route from Chicago to the North-West, effecting a saving of more than 100 miles over the present route. The Bonds are a First Mortgage on the road itself and on a valuable Land Grant of 1,000,000 acres. They bear interest in gold at the rate of 7 per cent per annum, and are sold now at 90 and accrued interest in currency by White, Morris & Co., 18 Wall-st., and Gwynne, Johnson & Day, 16 Wall-st., where pamphlets and further information may be obtained.

☞ The litigation heretofore pending between Mr. Lord and the Indianapolis, Cincinnati and Lafayette Railroad Company has been amicably settled, and the contesting creditors have agreed to come into the arrangement of reorganization. All of the rest of the unsecured debt had previously signed the agreement. Within a few months the concern will be completely out of trouble, and under its reorganization the managers are confident of a rapid and substantial development. By arrangements with the Ohio and Mississippi and other roads, the company will receive $100,000 annually from its real estate.

☞ The Bucksport and Bangor Railroad Company have made choice of their Directors, who have elected Sewell B. Swazey of Bucksport President of the road. The Directors have been empowered to issue first mortgage bonds, not to exceed $20,000 per mile, at 6 per cent. interest, payable in gold. Col. Gowen of Boston, has subscribed for $10,000 worth of stock.

Railways in India.

The annual report of Mr. Juland Denvers, the Government Director of Indian Railway Companies, furnishes the following information:

The extent of railway communication now open in India is 5,050 miles, of which 556 miles were completed last year, and 211 since the beginning of the present year. The three Presidency towns, and the capitals of the Northwest Provinces and of the Punjab are now united, and the system of trunk lines laid out by the late Lord Dalhousie may be regarded as completed. Commencing at Negapstam, the most southern terminus of the present Madras system, and proceeding by Bombay, Jubbulpore, Allahabad, and Lahore, to Moultan, on the Indus, a continuous length of about 2,800 miles of railway has been formed. All this has been effected at a cost of about £70,000,000, and profits at the rate of 3½ per cent. upon this sum were earned last year. A further sum or about £18,000,000 has been expended upon the other lines open for traffic, and upon those which are in progress, making a total outlay of £88,000,000 upon railways up to 31st of March last.

☞ Chancellor Zabriskie, at Trenton, has pronounced a decision sustaining the validity of the lease of the property and franchises of the United Companies of New Jersey to the Pennsylvania Railroad Company, and refusing the injunction against it. He holds, among other things, that all the property of the roads and their appendages may be leased and operated without the unanimous consent of the stockholders; and that the directors have been clothed with such powers by the statute of the State. An appeal was taken to the Court of Errors, but the Chancellor refused to continue the temporary injunction pending the decision of that court.

☞ There is one link in the European and North American Railway yet unfinished, that running west from Truro, about 75 miles in length. The work upon it is rapidly advancing, so that by next July it is probable that passenger trains will run through from Boston to Halifax without change.

☞ The Kent *News* understands that the directors of the Kent County Railroad Company have entered into a contract with Philadelphia people for the completion of the road to Chestertown by the 15th of November next.

☞ The Ware River Railroad will be graded from Gilbertville to Winchendon in six weeks. The first shipment of one thousand tons rails is at hand, and the track will be laid from Baldwinville to Winchendon before December first.

☞ The officers of the Albany, Sand Lake and Stephentown Railroad Company, recently elected, are: Albert R. Fox, President; Geo. Ellis, Vice-President; Horatio F. Averill, Secretary; and George Maguire, Treasurer.

☞ The first rail of a new street railway to connect Pottsville, St. Clair, Minersville, Port Carbon and Palo Alto, was laid at Pottsville on the 16th inst.

☞ The Wilmington, Columbia and Augusta Railroad has been completed from Sumter to Columbia, S. C., thus giving a through and direct communication by rail between Wilmington, N. C., and Augusta, Ga.

☞ The first sod of the Prince Edward Railway was turned at Charlottetown on the 5th inst.

☞ CHESAPEAKE AND OHIOS—FIVE-TWENTIES—CENTRAL PACIFICS.

Banking Office of FISK & HATCH,

No. 5 Nassau-st., New York, Oct. 16, 1871.

Of the Fifteen Million Chesapeake and Ohio Six Per Cent. Loan, less than one third remain unsold, and this remainder is rapidly being taken up. These bonds have thirty years to run, are especially desirable for investment, can now be bought at 93 and accrued interest, that is, with coupon attached, payable November 1.

$1,000 Chesapeake and Ohio Bond costs to-day $957 62.
$500 Chesapeake and Ohio Bond costs to-day $478 81.
$100 Chesapeake and Ohio Bond costs to-day $95 76.

We have but a limited supply left of the smaller denominations. Bonds are in coupon or registered form, same as Five Twenties.

When the railroad is completed, in 1872, and the Bonds are dealt in at the Stock Exchanges of the world, we have no doubt they will be equally popular with the Central Pacifics, which now command a premium, and are a favorite security here and in Europe; both roads being prominent lines, and under substantially the same fiscal management. Principal and interest of the Central Pacific and Chesapeake and Ohio Bonds, are specifically payable in gold coin in New York; the interest on the former being paid January and July, and of the latter, May and November, corresponding with the two classes of Five-twenties.

We recommend either of them to our friends and customers with the same confidence as we did the Five-twenty bonds, when we were selling millions of them for the United States Government.

We buy and sell Five-Twenties, Ten-Forties, Eighty-Ones, and Central or Western Pacifics, or receive them in payment for Chesapeake and Ohio Bonds at their current market price. Orders for Chesapeake and Ohio Bonds, accompanied with Drafts or Checks, may be forwarded to us by mail, and the bonds will be sent by express, charges paid.

FISK & HATCH.

P. S.—Accounts of Banks, Bankers and others received, on which we allow Four per Cent. interest.

Certificates of deposit issued and collections made in all parts of the Union.

Harvey Fisk.
A. S. Hatch.

☞ The Springfield (Mo.) and Little Rock (Ark.) railroad company was chartered May 16th 1871, with W. P. Egan president, A. B. Gaylor, treasurer, and B. C. Coblentz, secretary, with a capital stock of $3,000,000. The charter requires that the road shall begin at the state line, in the northern part of Boone county, at or near where White river crosses the state line, and run in a southeast course through Boone, Marion, Searcy, Van Buren, Conway and Pulaski counties, terminating at Little Rock.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of September, were:

☞ The Williamsport (Md.) *Pilot* asserts that "Mr. Bokee president of the Western Maryland Railroad, says that the appropriation will be exhausted in constructing the Owing's Mill end, and consequently there will be no funds with which to construct the Williamsport end." It was at Williamsport that the railroad was to connect with the Chesapeake and Ohio canal coal trade.

Journal of Railroad Law.

RAILROAD COMPANIES—PERSONS STANDING UPON PLATFORM—WHAT IS NEGLIGENCE OF PERSON AND WHAT OF COMPANY.

The facts in the recent case of Quinn *vs.* The Illinois Central Railroad Company (51 Ill., 495), are fully and clearly stated in the following opinion by

LAWRENCE, J.—This suit was brought by the administratrix of Bernard Quinn, deceased, to recover damages for his death. On the trial, the court, after the plaintiff closed his evidence, on motion of the defendant, withdrew it from the consideration of the jury, who thereupon returned a verdict for the defendant.

It appears that the deceased was one of a large funeral party, had taken passage on the cars of the appellee at Cairo for a point a few miles distant from that city. The cars were quite full, but the conductor thinks there were unoccupied seats in one of them, and there was standing room in all. The deceased with several other persons, was standing on the platform when the conductor passed along collecting fares. In making change for a bank note which the deceased paid for his fare, the wind carried away the paper as it was passing from the hand of the conductor to that of the deceased. The latter attempted to regain it, and as he was then standing on the edge of the platform, or on the step, he lost his foothold and fell to the ground. As he fell he struck against the embankment, was thrown back under the cars and killed.

This brief statement of the facts, about which there is no controversy, shows there is no ground whatever for maintaining this action. It was the negligence of the deceased, not that of the railway company, which caused his death. He was chargeable with extreme carelessness, and we can not see on what grounds any material negligence can be attributed to the company. He had voluntarily taken a dangerous position which resulted in his death, and there is no reason why the company should be made to pay damages therefor. Admitting, however, as claimed by appellant's counsel, that the conductor should have advised the deceased to enter the car, at least while paying his fare, his failure to do so was as nothing when compared with the gross negligence of the deceased. The death of the unfortunate man can be attributed only to his own carelessness.

It is urged, however, that this question should have been left to the jury. The practice adopted by the court can not be safely followed in many cases. Whenever there is evidence tending to prove the issue, the plaintiff has a right to take the verdict of a jury. But if this had gone to the jury and they had found for the plaintiff, the court should have set aside the verdict, or if it had refused to do so, it would have been set aside by this court. As no injustice has been done the plaintiff we can not reverse the judgment.

Judgment affirmed.

At the September term 1870, a petition for a rehearing of this cause was presented on behalf of the appellant, whereupon the court delivered the following additional opinion by

LAWRENCE, CH. J.—A petition for rehearing having been presented in this case we have again considered it, but see no reason to change the conclusion heretofore announced. Counsel cite in their petition Colegrove *vs.* N. Y. and N. H. R. R. Co., 20 N. Y., 492, and Willis *vs.* Long Island R. R. Co., 32 Barb. 399, and same case 34 N. Y., 681. These cases do not sustain the claim to recover made upon this record. In both of these cases the defendant was guilty of great negligence, independently of all question as to insufficient room within the cars, and the substance of the decision is, that a railway company may be guilty of such negligence as to be liable for an injury to a passenger, notwithstanding he is standing upon the platform, and would have been safe if within the car. To this proposition we should probably not disagree. But in this case the only negligence which can be attributed to the company is the failure to supply sufficient sitting accommodation to a funeral party going a distance of twelve miles, and consisting of seventy or eighty persons, the evidence leaving it extremely doubtful whether any notice at all had been given to the company that such a party would leave upon the train, and there being absolutely no evidence that the company had been notified what would be the size of the party or what accommodations they would require. A railway company which fails to furnish comfortable sitting accommodation for its ordinary number of passengers, or even for an extraordinary number upon due notice, is certainly negligent and should be held to strict accountability, but it would be unreasonable to apply the same strictness when a train is unexpectedly crowded by a funeral party going only a few miles.

In this case, however, we deny the application for a rehearing because, admitting all the evidence proves or tends to prove, admitting that the company had been notified that there would be a funeral party upon the train, and admitting even that all the seats were occupied, it is still proven by all the witness that there was abundant standing room in the cars, and this is conceded by appellant's counsel. It is further conceded in the petition for rehearing that the deceased was standing on the steps of the platform holding on to the railing. It is also proved that deceased had been in the employment of the railway company, and was of course familiar with the perils of railway travel. When a passenger voluntarily places himself in this most exposed position, with abundant standing room within the cars, and falls to the ground not in consequence of a collision, or a broken rail, or other fault of the company, but in the endeavor to secure money that the wind had blown away, we can see no ground for holding, that his own negligence is not far greater than any that can be attributed to the company. In the case above cited, of Willis *vs.* L. I. R. R. Co., in 32 Barb. upon which counsel rely in the petition for a rehearing, the court distinctly places its decision upon the ground that the injury to the plaintiff arose from a cause which the plaintiff was not bound to guard against, namely, the throwing of the train from the track by obstruction on the road which the company should have removed, and say: "If a man places himself in such a position that in the ordinary movement and conduct of the train he is exposed to danger, he may justly be said to be negligent of his security, and must take the consequence if he is injured." The court further say: "If the plaintiff in this case had been thrown off the platform by

a jerk or movement of the train, he would have encountered a danger incident to his position, and although the jerk might have been occasioned by high and unusual speed, or other mismanagement, still, at the most, the fault would have been mutual." It is apparent from these quotations that upon the principles laid down by that court, no recovery could be had in the present case.

We are by no means disposed to relax in the least degree, the just obligations or liabili ies of railway companies, but in this case the death of the deceased was so clearly attributable to his own rashness that we cannot hold the company liable in damages.

Rehearing denied.

Cheap Railroads for Cheap Freight Transportation.

The sudden and remarkable popularity of the narrow gauge system in this and other countries, and the rapidity with which the theories of its advocates have been seized, generalized and reduced to a practical demonstration in the Denver and Rio Grande and other narrow gauge roads not yet completed, is due to the fact that a reduction of gauge seems to furnish a practical solution of the question of cheap transportation by rail. Whether it does or not will, we think, be found to depend upon the standard by which the success of the new system is measured. Compared with the aver age of American railroads of the standard or broad gauge, a cheaply built and economically managed narrow gauge road might be found to have effected an important economy, but the comparison would scarcely be a fair one, since the aver age American railroad is neither cheaply built nor economically operated. Most of our railroads "cost' a great deal more than is represented in the actual value of the materials and labor em ployed in construction; and, from the hollowness of their financial basis, most companies owning and operating railroads in this country are compelled to declare dividends upon from 40 to 50 per cent more capital than they have anything to show for. Thus built and equipped, few of them are managed on good business principles or with a view to rendering the community the greatest amount of service at the least possible cost. The competition between the companies consisting chiefly in a rivalry in the matter of fast trains, and a saving of time is usually gained at the expense of the rapid destruction of road-bed and rolling stock, and enormous consumption of fuel. These conditions are not favorable to economy, and to realize a sufficient profit upon business done under such a ruinous system the public must be taxed, through high freights and fares, not only to pay interest upon fictitious capital, but to repair the constant and costly injury to permanent way and equipment. Suppose, however, that a road of the standard gauge, well built and equipped, were to be devoted by its managers to the transportation of freight at rates one-half lower than those now charged by competing lines, and, instead of running five trains per day at ruinous and dangerous speed, ten or twenty trains should be run at a speed of, say, eight or ten miles per hour, it requires, we think, but little ar gument to show that such a road could increase its capacity for business fourfold without so much as doubling its operating expenses, allowing for the diminished wear and tear and the greater economy of fuel in proportion to mileage. Relieve such a road of the burden of a debt for which it has nothing to show but fictitious shares of capital stock, run as many trains at moderate and even speed as business may require, and the mere question of cheap transportation by rail would, we think, be solved much more quickly and satisfactorily than by a mere reduction in the width of the gauge.

It may be argued that, with their present equipment our broad and standard gauge railroads are not fully adapted to cheap transportation, however managed. We grant the force of this objection, and would urge upon the projectors of new railroads, as well as the managers of old ones, the importance of reducing the percentage of non paying weight now hauled by building lighter rolling stock, rather than by reducing the gauge of the tracks, and maintaining the same relative proportion between the non-paying and paying weight to be drawn over them. Our cars, especially our "improved" passenger coaches, are both too heavy and too costly, and in this there must be a radical reform. In this matter we may follow with safety the lead of the British railroad engineers, who have generally rejected the narrow gauge system as impracticable, but who look with unqualified favor upon the numerous roads with light permanent way, light engines, light cars and cheap depot accommodation, now building in different parts of the United Kingdom. These roads are precisely what are needed in this country as auxiliaries and feeders to the trunk lines. They are built with the American standard gauge of 4 feet 8½ inches, with all parts sufficiently strong to carry a maximum weight of five tons to each pair of wheels. Expensive tunnels, high embankments, deep cuts, costly viaducts and expensive stations are avoided. Such a road, it is claimed, can be built at an expense of $15,000 to $17,000 per mile, exclusive of the cost of the land, and on this limited capital a comparatively small traffic transported at rates considerably below the present average per mile, would pay a fair annual dividend. A line of this description, lately built under the patronage of the Duke of Buckingham, cost but $7,000 per mile. Its highest embankment is twelve feet, and its deepest cut ten feet. The rails, weighing 30 lbs to the yard, are secured in longitudinal timbers, six inches by six inches in the cross section. The timbers are united by transoms at every twelve feet, held in their places by wrought iron rods. Everything is at once light and strong, and as an important reduction in non-paying weight is effected without a proportionate reduction in the capacity of the cars, the advantages possessed by such roads over those built on the narrow gauge plan are apparent at a glance. One of the most important of these advantages is that the cars of such a road could run upon any standard gauge track, and its capacity for traffic could be at any time increased without involving the necessity of reconstruction throughout, as is the case with narrow gauge roads operating as feeders or branches of trunk lines. The system is well worthy of thorough trial in this country, and we would urge that that trial be made before we have gone too deeply into the building of narrow gauge roads, which, at least, may only partially realize the expectations of those who are now so eager in projecting and so enthusiastic in building them.—*Daily Bulletin.*

Canadian Pacific Railroad.

The report of the surveyor employed to run the line of the proposed Canadian Pacific Railroad has been published. The distances are as follows:

	Miles.
Montreal to Ottawa	115
Ottawa to Mattawan	195
Mattawan to Fort Garry	985
Fort Garry to Yellow Head Pass	985
Thence to the limits of British Columbia. 52	
Route by the Upper Fraser (British) Columbia) by "short cut"	445
	2,467
Total length from Montreal to the Pacific	2,777

☞ The Directors of the St. Croix and Penobscot Railroad propose to construct their road from Princeton to Grand Lake Stream, at which point the Shaw Brothers talk of building the largest tannery in the world. A survey of this proposed extension is to be made at once. When built, a gap of twenty-four miles remains to be filled up between Grand Lake Stream and Passadumkeag, which, when done, the city of Calais will then be brought to within five hours' ride of Bangor.

Gt. Western Railway of Canada.

The dividend announced during the week, for the past half year, realises our expectations, and must, we think, be a pleasing surprise to the Proprietors, especially to those who have been led by articles in some other papers to take a downcast view of this very excellent railway property.

The dividend is 5½ per cent. per annum, free of income tax, and compares thus—

Half-year ending—	P.c. per annum.
July, 1871	5½
" 1870	4
" 1869	3
" 1868	2

The July half-year is the inferior part of the year, and having regard to this circumstance, and the great increase in the traffic now going on, we shall not be surprised if the current half year (ending next January) yields from 7 to 8 per cent per annum. The dividend for the 2nd half of 1870 (ending January, 1871) was 6 per cent. per annum. If the current, January, 1872, dividend increase by only as much as the July dividend just announced has increased, namely by 1½ per cent. per annum, it will be 7½, and make the dividend for the whole of 1871, 6½ per cent.—a pretty fair rate for "poor frozen up Canada" to turn out, and a rate that is fairer still when we consider that this Company pay (as all Companies should) their dividends free of income-tax.—*Herapath, Sept.* 30.

☞ The Philadelphia *Ledger* says that a very heavy tonnage of soft coal for gas purposes is now being carried over the Bald Eagle Valley railroad, which extends from near Tyrone, on the Pennsylvania railroad, to Lock Haven, on the Philadelphia and Erie road, a distance of some fifty-one miles, and it adds "new railway connections southward from the Huntingdon and Broad Top Mountain railroad promise an early outlet for Cumberland coal across our State to our own and a further eastern market, to the greatly increased profits of existing roads in the connection."

☞ The track of the Baltimore and Potomac railroad is now laid about twelve miles south of the Annapolis and Elk Ridge railroad, to Muddy Hole Branch, Prince George's county, a point about two miles from Buena Vista, and about ten and a half miles from Washington. At Huntington the main stem branches off toward the Potomac, and the track is laid three miles south of the prospective town. On the north of the Annapolis Road the track is laid to the Patapsco, a distance of nine miles. In all there are about twenty-five miles of the road laid.

☞ The Boston *Journal* says the losses sustained at the fire in Chicago by the Michigan Central Railroad were very light. The road was not an owner of the passenger depot, and its total loss was a small freight house which was destroyed together with its contents, which however were fully covered by insurance in solvent companies.

☞ The revenue of the Baltimore and Ohio road and its branches for the month of September was $1,219,769 21, showing an increase compared with the same month for the preceding year, of $177,905 16. It is understood that the tonnage moved exceeds that of any month in the previous history of the company.

☞ It is stated that Gen. Mahone has been successful in effecting a loan for the Atlantic, Mississippi and Ohio Railroad Company to the amount of $15,000,000, and the deed of mortgage involved has been duly recorded in Norfolk county, Va., the State tax upon which was $15,000.

Augusta and Hartwell Railroad.

A correspondent of the Elberton (Ga.) *Gazette* has been investigating the delay in commencing the construction of the Augusta and Hartwell railroad. He says:

When Mr. Seymour, the new Chief Engineer, of the road, took charge, his judgment suggested a different and what is claimed a more practicable route for the first ten or fifteen miles of the road next to Augusta, than upon either of the lines indicated by previous surveys. This new line required examination, and many other preliminary matters demanded adjustment before the work could proceed without interruption. The essential details of arrangement are now said to be nearly accomplished, and the contractor, Mr. E. Hanford, of New York is expected to arrive within a week, prepared to place 500 hands on the road about the 19th of October. The first ten miles will, it is confidently expected, be completed by the first of January. A piece of good news in connection with the future prospects of this road is the information, from a reliable source, that George D. Chapman, he who exhibited such peculiar "developing" talent in the construction of railroads (upon paper,) has, of his own volition, retired from the Board of Directors, and is henceforth to have no voice in the management of the enterprise. With this obstruction out of the way, it is to be hoped that the friends of the road in Augusta and along the projected route will give it the benefit of all the moral and material encouragement which the universally acknowledged importance of the road demands.

☞ The Alexandria *Gazette*, of 9th inst., says that the work on the branch of the Richmond, Fredericksburg and Potomac railroad has been completed to Chappawomsic creek, to which point material trains are now running. As soon as the bridge over this creek is completed there will then remain about two miles of track to lay, which can be done in about two weeks, by which time the road will be finished to its terminus at Quantico, where the trains will connect with the Potomac steamers, instead of at Aquia Creek, as at present, thus shortening the distance and lessening the time between that place and Richmond.

☞ The Hagerstown *Herald* says that the commissioners appointed by the Legislature of Maryland to take subscriptions preparatory to organizing the Antietam Railroad Company in Washington county, give notice that books of subscription will be opened. The capital stock is fixed at $200,000, and in shares of $20 each. The road is to run from the Antietam iron works, or the Potomac, at Shepherdstown, through Washington county, to connect with the Miramar railroad, which runs from the Susquehanna, opposite Harrisburg, to the State line in Franklin county, south of Waynesboro'.

☞ The Winston (N. C.) *Sentinel*, of the 5th instant, says that President Belo, of the Northwestern North Carolina railroad, has made a contract with the Richmond and Danville Railroad Company by which the latter is to complete said road from Greensboro' to Winston by the 1st of July next.

☞ The proposed Albany, Sandlake and Stephentown Railroad will shorten the distance between Albany and Boston twenty-six miles. Its early completion is probable.

☞ The ships Charlotte and Uncle Joe arrived at Norfolk on the 8th instant with full cargoes of railroad iron for the Atlantic, Ohio and Mississippi (General Mahone's) railroad.

Southwestern Pennsylvania Railroad.

The route of the proposed railroad from Greensburg to Connellsville, has been finally determined, and twenty-five sections have already been put under contract. The Directors selected what is known as the Jack's Run route, and the work will be pushed forward as rapidly as possible. The following contracts have been awarded: Sections one to seven inclusive, P. & F. Collins; sections eight and nine Col. Painter; sections ten, eleven, and twelve, Thomas Schnatterly; sections thirteen, fourteen, and fifteen, J. C. M'Causland & Co.; sections sixteen, seventeen, and eighteen P. & F. Collins; sections nineteen and twenty, D Williams; sections twenty-one and twenty-two, Mr. Roller; sections twenty-three and twenty-four, to John Snider.

Trenton and Fulton Railroad.

From the Clairborne (La.) *Advocate* we take the following estimate of the cost per mile of the Trenton and Fulton railroad. We see from this that it will be a cheap road:

HOMER (LA.) August 25 1871.

I herewith give an expression of my views regarding the cost per mile to build a three-feet gauge railroad from Monroe, Louisiana, to Fulton, Arkansas:

Excavations	$425 00
1,760 Cross Ties	440 00
10,570 feet, lineal measure, of stringer 9x6	360 00
62 tons of tire iron, to be fastened at the ends with screw spikes	3,100 00
Spikes	170 00
Bridging and trestles	1,200 00
Per mile	$5,695 00

Respectfully, RICHARD SERPELL.

The proposition for a preliminary survey was promptly accepted by a number of citizens of Homer, and Col. Serpell has already embarked in the work.—*Magnolia Flower.*

☞ The St. Gothard railway, with a tunnel about the length of that of the Mont Cenis, may soon be commenced. The capital necessary for the tunnel is about 60,000,000f, and for the lines to join the Italian and the Swiss systems about 125,000,000f. Subsidies to the extent of 85,000,000f. have been voted by Germany, Italy, and Switzerland, and the remaining 100 millions are to be taken by a syndicate, 65,000,000f. in bonds, bearing, 5 per cent. interest, and 35,000,000f. in shares. It is estimated that at least seven to eight years will be required for completion of the work.

☞ L. B. Boomer, of Chicago, has the contract for building a bridge across the Missouri River at Atchison, Kansas, his bid being $850,000 for the bridge complete, including the approaches. The bridge is to be finished within twelve months.

☞ The Granite Branch railroad, a spear of the Old Colony and Newport railroad, has been completed and formally opened to passenger traffic between the villages of West Quincy, East Milton, and Boston.

☞ The officers of the Credit Valley Railway company are; George Laidlaw, President, and C. J. Campbell, Vice-President, W. H. Beatty Solicitor and J. G. Conlin Secretary.

☞ The track of the Wellington, Grey and Bruce Railway is laid to Harriston, on the border of the county of Bruce.

☞ The laying of the track on the Maine Central extension was completed to the Grand Trunk Railway track on the 6th inst.

☞ The shipments of iron ore from Marquette for the season up to October 3d amounted to 273,825 tons; and from Escanaba to 338,807 tons—a total of 612,192 tons. Of pig iron from Marquette, 19,702 tons; and from Escanaba 6,976 tons—a total of 26,678 tons. Total of ore and pig iron, 638,870 tons—a difference in favor of Escanaba of 51,816 gross tons.

☞ The Milwaukee *Wisconsin* says that a sufficient amount of iron has been purchased for the Green Bay and Lake Pepin Railroad to lay forty miles of track. The first cargo is expected to reach Chicago by the 20th inst. The completion of this important thoroughfare is thus assured.

☞ The Bayfield *Press* says "a company of capitalists of New York city, with E. G. Roberts as President, has bought the old road bed on the line of the Hudson and Superior road, and will lay twenty miles of iron from Hudson to New Richmond this season."

☞ The amount of the Virginia State debt funded under the act of last session, on the 11th instant reached $20,400,000. The whole debt is $40,000,000, one-third of which is chargeable to West Virginia.

☞ It is stated that the Tyngsborough and Brookline (Mass.) Railroad has been located as far as North Pepperell, within four miles of its New Hampshire terminus. The surveyor's work will soon be completed and proposals advertised for.

☞ The Chicago and Northwestern Railway company officially announces that its entire loss will not exceed $500,000, and that all the shops, engines and passenger cars at the depot were saved.

☞ The Baltimore and Potomac Railroad Company have begun to grade for their track in Virginia avenue, Washington, and will soon begin to lay the rails.

RAILROAD IRON.

1,400 Tons 40 lb. Welsh Rails, made by the Rhymney Company, in store for sale by

PERKINS, LIVINGSTON & POST,
31 New Street,
New York.

Notice to Contractors.

PENN. & SODUS BAY RAILROAD CO.,
CHIEF ENGINEER'S OFFICE,
SENECA FALLS, N. Y., Sept. 25th, 1871.

PROPOSALS for furnishing and laying the Iron and Ties on the graded portion of this Road, will be received at this office until noon of Wednesday, the 25th of October. Said portion consists of the Southern Division, 25 miles long, extending from Spencer, in Tioga county, through Tompkins county to the Seneca county line; and the Middle Division, 33 miles long, from the Seneca county line to Waterloo; in all about 58 miles.

Proposals will be received for either or both Divisions, and are to be based on the following terms of payment, viz: twenty per cent. to be in the capital stock of the company; thirty per cent. in town bonds or cash, at the option of the company, and the remaining fifty per cent. in the first mortgage bonds of the Road. The Company reserves to itself the right to reject any or all bids that are not deemed consistent with their interests.

Specifications may be procured by application to the undersigned. ALFRED F. SEARS,
8t30 Chief Engineer.

To Contractors.

INVITATION IS GIVEN FOR PROPOSALS TO CONSTRUCT A PORTION OF THE BALTIMORE SHORT-LINE RAILWAY, embracing the GRADUATION and MASONRY of eighteen sections or miles lying between Belpre and Athens, in the State of Ohio.

SPECIFICATIONS of the work can be obtained at the offices of the Marietta and Cincinnati Railroad Company, in Parkersburg, West Virginia, and Athens, Ohio, on and after the 11th instant, and SEALED PROPOSALS therefor addressed to the undersigned will be received in the PARKERSBURG OFFICE up to the 25th instant inclusive.

The privilege of rejecting any or all proposals being reserved to the Baltimore Short-Line Railway Company.

JOHN WADDLE, President.

October 9th, 1871.

Notice to R. R. Contractors.

PROPOSALS for grading and masonry for about twenty miles of the Nashua, Acton and Boston Railroad, will be received at the office of the engineers until the evening of the 23rd of October next. Proposals may be made for grading one or more sections into which the work will be divided. Profiles and specifications may be seen at this office. The corporation reserves the right to reject any or all proposals.

E. H. SPALDING, President.

NASHUA, Sept. 25, 1871.

A VALUABLE STEAM PUMP PATENT for sale. Pump full size, can be seen in operation. Address D. W., this office. 3t39

THE AMERICAN DIAMOND DRILL CO.

ARE MANUFACTURING

Under the celebrated Leschot Patents, with important improvements,

DIAMOND-POINTED STEAM DRILLS.

ESPECIALLY ADAPTED TO

Rock Drilling

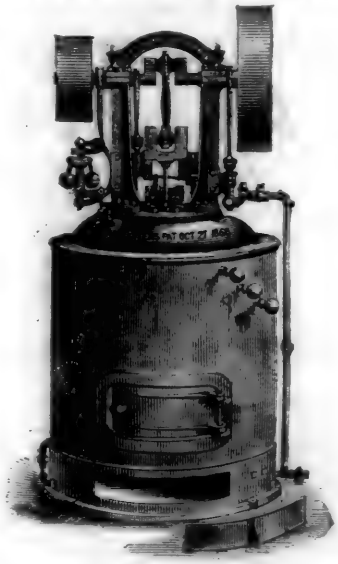
OF EVERY VARIETY.

Tunneling, Open Cut and Side Work in RAILROAD IMPROVEMENTS.

They are Driven by Compressed Air or Steam, and Bore at a Uniformly rapid rate, making a perfectly cylindrical hole, of the same size top and bottom in the hardest rock.

The economy of these Drills and their entire efficiency have been abundantly established, and the advantage of the rotary over the percussive operation very generally allowed.

NO SHARPENING REQUIRED. The Drills are also adapted [in different sizes and styles,] to *Channelling, Gadding and Shafting*; also to *Deep Boring for testing the value of Mines and Quarries*. Catalogues sent upon application. Manufactured by



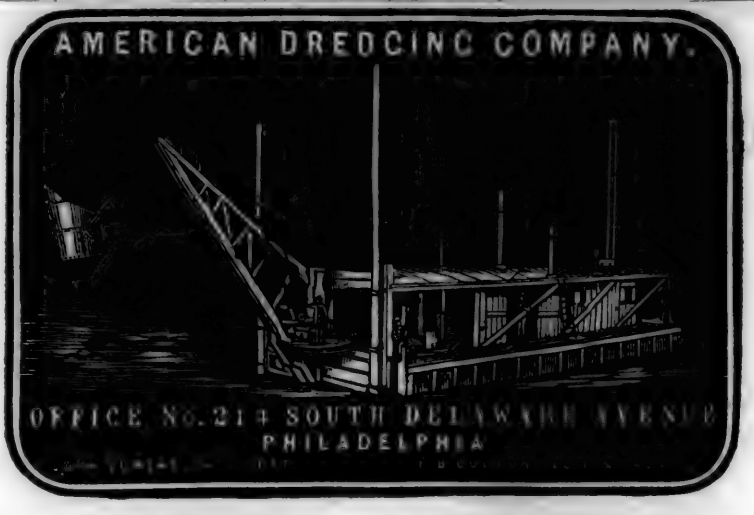
The American Diamond Drill Co.,
No. 61 LIBERTY ST.,
NEW YORK.

THE Baxter Steam-Engine,

MANUFACTURED BY

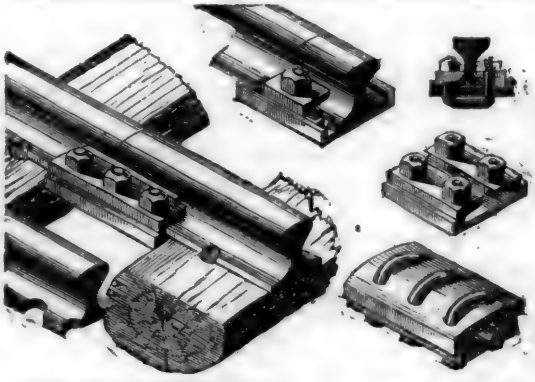
COLT'S PATENT FIRE-ARMS M'F'G CO.,

HARTFORD, CONN.,



IS A SELF-CONTAINED MACHINE, COMPACT, SIMPLE, SAFE, ECONOMICAL, FULLY GUARANTEED.

SIZES, 2, 3, 5, 8, AND 10 HORSE POWERS

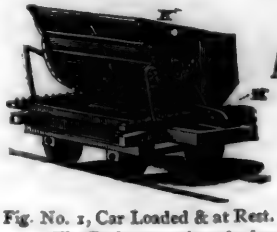


For Circular and Price List address

The Baxter Steam-Engine Co.,
18 Park Place, New York

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.



FISHER'S PATENT
Wrought Iron
RAIL JOINTS,
MADE BY
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

KINGSTON, JAMAICA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Oct. 30, steamer RISING STAR, Capt H. P. Conner, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall, direct, connecting at Panama with steamer SACRAMENTO, Capt. Parker, touching at Punta Arenas, Acajutla, and San Jose Guatemala, also connecting for all Central American and South Pacific ports.

Freight for last-named ports received until 4 P. M. of Oct. 27.

Steamer AMERICA will leave San Francisco, Nov. 2, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

First Class Railroad Construction.

From Mr. Nordhoff's letters to the *Tribune*, from Virginia, we extract the following particulars concerning the portion of the Chesapeake and Ohio Road now in operation:

East of the White Sulphur, and between that point and Covington, we passed over that part of the Chesapeake and Ohio Railroad which was surveyed and built by the State of Virginia before the war. This part of the line crosses the Alleghanies, and the work done here, in tunnels and cuttings, is remarkable for its courage and that disregard of cost which is a characteristic of Government work. The Virginia Central Railroad was completed, from Richmond to Covington, a distance of 205 miles, in 1861. While it was building the State of Virginia undertook to build a railroad from Covington to the Ohio River, to complete the line from the west to tide-water. On this work the State spent $3,400,000, and what it did was magnificently done. The masonry tunnels are all double tracked, the cuts are straight and clean, and the line its engineers laid has admirably low grades and easy curves.

But the war stopped this work. After the war the State was unable to finish it, and finally a law was passed granting to the Virginia Central Company all the franchises and property of that portion begun by the State, on the condition that they should complete it to the Ohio River. The two portions were consolidated under a new name—the Chesapeake and Ohio—and, at a later period, New York capitalists, discovering the great advantages of the route, and its immense resources, stepped in with abundant means and determined to complete the work. They receive from the State a free gift of all that the State had done west of Covington; are relieved from taxation until the dividends reach 10 per cent., and have some other important privileges. The gentlemen who thus seized upon what seems to me one of the greatest opportunities in the country for a solid and profitable investment of capital, were Messrs. A. A. Low, Wm. H. Aspinwall, Jonas G. Clark, Richard Irwin, Wm. B. Hatch, P. Fisk, and C. P. Huntington, the last named being President of the Company.

Gen. W. C. Wickham, Gen. Anderson, and several other Virginians are also among the Directors. With men like those at the back of it the work is going on rapidly, and will be completed next October. I have been struck, all along the new line now building with the solidity of the masonry and the thoroughness with which every part of the work is done. The tunnels and bridges are all, with the exception of two tunnels, prepared for a double track; the whole line can be double-tracked at a comparatively small expense whenever it becomes necessary, and the land investments made, not only at Huntington, but all along the line, at every point where there is likely to be an important town, promise in themselves to pay magnificently. The work is done for cash, and accordingly there is no waste; with a country of wonderful mineral and other wealth to develop, and Western connections, which will make it, when completed, one of the great through lines connecting the West, with tide-water—considering also its low grades, and its small cost compared with other through lines, it will have great advantages over its competitors.

East of Covington lies a famous iron region, which has already a few large furnaces. But they need the coal which the Chesapeake and Ohio Road can bring them so cheaply when it is completed, to enable them to work to advantage, for they have "skinned" their forests for charcoal. A Pennsylvanian, an expert in iron, who had been "prospecting" in this region reported it to be very rich, having a distinct and very heavy vein of iron ore, and, in fact, he asserted that this region was for iron what the great Kanawha Valley is for coal.

It is marvelous to me that a region so near the great monetary center of the country, and so wonderfully rich in mineral wealth, should have been left untouched until now. But the blight of Slavery hung over it, and capital and free labor alike avoided it. The Chesapeake and Ohio Railroad, when it is completed, will quickly create a new Virginia. From its completion will date, I do not doubt, the real prosperity of both Virginia and West Virginia. It will draw capital and labor to the now sparsely settled and undeveloped coal and iron country; the facilities for cheap transportation will create numerous iron furnaces, salt and oil works; the coal which now lies under so large a part of the great Kanawha lands will be mined for consumption in the East as well as the West and South West. I am told that the best Kanawha cannel coal can be sold, in New York, when the road is completed, for $6 50 per ton.

The Hartford Tunnel.

The new Hartford tunnel for the Hartford and New Haven Railroad, is nearly completed. The enlargement of the old tunnel was made through an exceedingly troublesome strata of quicksand and clay, which had a tendency to cave in, and thus seriously impede the operation of excavating and pile driving, which was carried on at the same time. The tunnel passes under two busy streets, one having a horse railroad track, and both having gas pipe, aqueduct pipe, etc., all of which had to be moved and removed, so as not to discommode the public. Trains passed upon the road itself on an average every five minutes during the day a fact which necessitated considerable calculation. The number of piles driven was 1731, or measuring the part actually under ground, seven miles. The work was under the immediate supervision of E. M. Read, superintendent of the Hartford and New Haven Railroad, who is a practical and efficient engineer.

Change of Gauge.

We hear discussed the propriety and profitableness of changing the gauge of the Wilmington and Manchester and Charlotte, Columbia and Augusta Roads from five feet to four feet eight and one-half inches. The present difference in gauge involves a transfer of freight and passengers at Charlotte and Wilmington. Such a change, producing uniformity, would ensure a continued line to Baltimore and New York of uniform gauge, quickening intercommunication, and lessening the cost of transportation.

A direct, uninterrupted transit from Augusta to Norfolk and Baltimore, so far from operating injuriously upon the interests of Augusta, will, if we apprehend prevailing views correctly, be received with favor by our commercial citizens. The great current of trade is now, and for a long time to come will continue to set Northward. Interior trunk lines of railroads have entered successfully into competition with water carriage by circuitous routes for all the finer classes of merchandise and in the way of return freight, for the heavier products of the country close uninterrupted connection by rail, bringing cheap rates over roads of low gradients with the ports of Wilmington and Nor-

folk and with Baltimore, a great and thriving commercial centre, cannot work injury to the commerce of Augusta. The natural position of our city, being the farthest point South which permits the storage of cereals free from the hazards of the tropics, within easy reach of such points as Charleston, Port Royal, Savannah and Brunswick, and now in close connection with the Gulf and Cuba by way of Cedar Keys, makes highly desirable every facility whether of quick transit or cheap freights, with the great commercial emporiums of the North and West.—*Augusta Chronicle.*

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1870 and 1871, were as follows:

	1869–'70.	1870–'71.
From passengers..	$3,799,257 80	$3,333,111 03

Net, as above....	$4,522,110 87	$5,383,408 14

During the year ending May 31, 1871, there has been expended for permanent improvements, and charged to new construction, the sum of $1,767,-985 75; and for additional rolling stock the sum of $160,160 05. The additional rolling stock consists of 9 locomotives (less 4 sold) 1 first class and 1 second class passenger car, 3 baggage, 1 way, 44 coal, 1 box, 1 wrecking and 145 iron ore cars. The company now have 264 locomotives, 134 first class and 32 second class passenger cars, 151 caboose and way, 113 baggage, mail and express, 7 boarding, 3,675 box, 909 platform, 315 stock, 128 coal, and 996 iron ore cars.

The number of passengers carried during the year was 2,239,949; do., carried one mile, 100,-802,521. Tons of freight carried, 2,298,170; do., carried one mile, 268,417,381. Decrease in passengers, 37,054; and in mileage of do., 14,654,938, or 12.69 per cent. Increase in tonnage, 75,192; and in mileage of do., 3,670,141, or 1.39 per cent. Total number of passengers and tons of freight carried, 4,537,664; do., carried one mile, 869,219,-902—increase in passengers and tons carried, 38,-138; decrease in mileage of do., 10,984,797, or 2.89 per cent. Earnings per passenger per mile, 3.31 cents; do., per ton per mile, 2.87 cents—average earnings per passenger and per ton per mile, 2.99 cents. Increase in earnings per passenger per mile, 0.61 per cent.; decrease in earnings per ton per mile, 7.12 per cent.—decrease in earnings per passenger and per ton per mile, 5.08 per cent. Earnings per passenger, $1 49, a decrease of 10.78 per cent.; earnings per ton, $3 25, a decrease of 8.97 per cent.—average earnings per passenger and per ton, $2 43, a decrease of 8.65 per cent.

From the foregoing it appears that while the number of tons of freight carried one mile increased 1.39 per cent., the earnings per ton per mile decreased 7.12 per cent.; and to this enforced reduction in rates, in sympathy with the decline in the value of the more important classes of products, is attributable the loss in freight earnings. The decrease in passenger receipts appears to be wholly due to a falling off in passengers carried, as the rate per passenger per mile seems to have been slightly increased, although the average earnings from each passenger shows a considerable decrease.

Compared with the previous year the results of the year ending May 31st, 1871, may be summed up briefly as follows: There was a decrease in gross earnings of $840,513 77; a decrease in working expenses of $1,659,791 85; in taxes of $42,019 19; in interest payments of $54,965 33; in rent of leased roads, $113,293 26; making total decrease in expenses, $1,870,069 63, and a net gain to the company of $1,029,555 86.

The net earnings for the year, after satisfying all current charges for operating, taxes, interest, sinking funds and rentals, were $3,343,413 10, against $2,313,857 24 net earnings for the year ending May 31st, 1870. These earnings, with the balance of income at the beginning of the fiscal year, were sufficient to enable the Board of Directors to declare two semi-annual dividends of five per cent. each, on both classes of stock, and to leave a balance of $333,559 17 to be brought forward to credit of Income on the 31st of May, 1871.

This balance is more than absorbed in the General Balance Sheet by payments made for works of construction that add new value and facilities to the company's property. Payments have also been made for account of the old purchase of the Winona and St. Peter Railroad, and advances made for its extension and the completion of the La Crosse, Trempealeau and Prescott Road, and considerable reduction of the old funded debt of the Chicago and North Western Railway Company effected by the payment of maturing bonds.

It is inevitable that the demands of business on our road as upon all others similarly situated in the great and growing West, will call for some enlarged accommodations in the extension of side tracks, depot grounds, new station buildings, equipment, etc., from time to time, and it is a question for the Board to consider at some future period in what manner this class of outlays shall be provided for.

Whether the means shall be found in the increased profits resulting from the legitimate growth of business which may be reasonably looked for in the future, or whether a larger reserve of income shall be kept to meet these wants by temporarily diminishing the rate of dividends from present earnings, or whether the improvements required from time to time shall be made from the proceeds of sales of stocks or bonds within reasonable limits, without impairing the ability of the company, are matters that will receive careful deliberation hereafter, and such measures adopted as shall be thought best to give stability and strength to the company.

The capital stock has been increased during the year $89,050, viz.: common, $44,330; preferred, $44,720. The common stock now amounts to $14,720,959 40; and the preferred to $20,415,013 42—total, $35,135,972 82. There is also the amount of $615,300 of preferred and $53,046 of common stock, not included in the above, which is owned by the company, and duly registered by the Registrar of Transfers. This stock has been held by trustees of the company for many years and is what remains from an amount of stock originally issued (prior to 1866) and subsequently registered for the convenience of the company in taking up Galena and Chicago, Beloit and Madison, and Chicago and Milwaukee Railroad Companies' stock, and for other purposes.

The bonded debt, as shown in the last annual report, has been decreased $248,900—the whole amount of bonds of the various classes retired during the year having been $737,900, and the amount issued $489,000. In addition to which the company issued in April and May the Madison Extension 7 per cent. gold bonds, for construction of that line, (including $1,153,438 62 that had been advanced for grading, iron, ties, etc.,) amounting to $3,150,000. Including these bonds, the increase in the funded debt amounts to $2,901,100.

We give in another part of this week's issue that portion of the company's report which refers to the connections and extensions of the road. Since the close of the fiscal year, and up to the date of the Report, July 31, 1871, the company had negotiated the sale of the entire issue of the $2,700,000 of Menominee Extension gold bonds, mentioned therein, and put the construction of the road from Fort Howard to the Menominee River, about 52 miles, under contract, to be completed by May 1, 1872. The balance of the line from Menominee River to a connection with the Peninsula Division was being rapidly examined and surveyed, with a view to its construction at an early day. The Madison Extension line had been opened for 20 miles to Lodi, and the Lake Geneva Extension completed. Thirty miles of the Winona and St. Peter Extension had been let to be ready for rails in a few months.

The dividends declared during the year will be seen to have amounted to ten per cent. on the common and ten per cent. on the preferred stock—leaving a surplus, after payment of the June dividend, of $333,559 17.

The entire operating expenses, including taxes, were but 53.96 per cent. of the earnings.

CONDENSED BALANCE SHEET, May 31, 1871.

Old Construction:		
Cost of road and property in accordance with terms of consolidation, to May 31, 1870		$39,948,712 62
For purchase of stock of the Chicago and Milwaukee Railway Company		23,700 00

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Years ending.	Railroad: Main Line.	Railroad: Branch Line.	Railroad: 2d Track and Sidings.	Railroad: Railroad in progress.	Rolling Stock: Engines.	Rolling Stock: Cars: Pass.	Rolling Stock: Cars: B. M. American Railroad Journal.

Saturday, October 28, 1871.

Stock Exchange and Money Market.

Money, though fairly active, has been less urgently sought after since our last. The current quotations have been 7 per cent. on call on the best class of borrowers, and from 9 to 18 per cent. per annum, on the street, in the discount line, for the range of marketable grades of commercial paper. The city banks have strengthened their position during the week, and now hold over 1½ millions more of specie and legal tender notes than the 25 per cent. of their liabilities, required by the banking act. The U. S. Sub Treasury has also augmented its coin and currency reserves. The outflow of funds to the interior has been on a somewhat restricted scale. Street operators are now over the panic growing out of the Chicago fire a fortnight ago, and which was aggravated by the undue bank expansion about the same time. Our merchants also begin to feel reassured, as there is good reason why they should not, and the only remaining trouble from the Chicago fire relates to the settlements of the Fire Insurance Companies. The city banks, in their latest return, show a reduction of $827,200 of legal tender notes, an increase of $823,700 of specie, and a decrease of $11,391,000 of deposits; also a reduction of $9,930,900 in their loan and discount averages, and a contraction of $39,700 in their item of circulation. The city bank exchanges, last week, averaged $123,167,713; and thus far, this week, 123½ millions daily. The banks now hold $1,594,775 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $10,101,400, against $11,948,113 same time last year. The city bank deposits are now $203,791,000 against $189,578,983 week ending Oct. 22, 1870. The legal tender reserve amounts to $50,014,700 against $52,890,812 same time last year. The circulation now stands at $30,294,300, against $32,517,036 same time last year. The loans are now $283,580,100, against $265,665,396 at this date last year.

The U. S. Sub-Treasury enlarged its currency balance $203,176 and its coin reserve $3,043,319, as the result of the week's business. The receipts of the office were $7,425,260 in coin, and $8,976,817 in currency; payments, $4,384,942 in coin, and $7,773,641 in currency. The office received $2,953,000 in coin or its equivalent, from customs; and disbursed $1,028,973 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,419,432 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $336,910,050; and as security for deposits of public money, United States bonds for $15,569,500. The aggregate of the outstanding circulation of the National Banks of the country is $323,985,382.

Government revenues yielded moderately, through the week. The excises yielded last week about two millions, and thus far since July 1, $43,439,368. The customs at the port of New York, last week were $2,762,432; and at the outports, equal to about $920,000 more, all in coin, or coin certificates.

The Treasury balances on Wednesday were: Coin $96,000,000; currency, $5,000,000. Coin certificates were outstanding for $16,000,000.

Gold has been offered more freely and has been less active. The tendency of the price has been downward, influenced in, part, by the anticipatory payments of the November interest on the public debt. The range of the price during the week, has been from 111½@113, and the closing quotation on Wednesday was 111⅝ against 113⅛ the preceding Wednesday. The specie outflow, last week, was $601,843; on Tuesday of this week, $34,366; and on Wednesday $53,241. The Gold Exchange Bank clearances have been as follows: Oct. 19, $48,035,000; Oct. 20, $49,951,000; Oct. 21. $59,788,000; Oct. 23, $47,752,000; Oct. 24, $57,899,000; Oct. 25, $77,252,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Oct. 21st, 1871, $66,895,226, against $68,140,881 same time in 1870.

The export drain of specie was $601,843 last week, against $556,181, same week preceding year The shipments since January 1, 1871, have been $59,473,025, against $50,876,890 same time in 1870.

The customs demand for Gold last week, averaged $492,167 a day; thus far, this week, it has averaged $472,500 a day, or equal to a weekly aggregate of $2,835,000. The arrivals of

specie from Europe, Havana and other foreign ports last week, were $8,032, and since Jan. 1, 1871, $8,319,290 against $8,493,710 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $131,646,153 against $119,675,357 same time in 1870.

Foreign exchange has been in moderate supply and rather more confident demand at stronger rates. Bankers' sixty day bills on London closed on Wednesday at 108⅝@108⅞; sight bills on London, 109⅜@109⅞.

The produce exports from this port, week ending with Oct. 24, were to the currency value of $5,276,054.

Government securities have met with a readier market at generally better prices, with comparatively light offerings of all issues reported.

On Wednesday, Government bought in two millions of Five-Twenties at 110 48@111 24 nett. The amount of bonds offered was $3,068,450 at from 110 48@111 40.

U. S. sixes of 1881 closed here on Wednesday of the current week at 116¼@116½; U. S. Five-Twenties of 1862, 114@114⅜; U. S. Five-Twenties of 1864 at 113½@114; U. S. Five-Twenties of 1865, 114@114⅜; U. S. Five-Twenties of 1865 consolidated, 112⅞@113; U. S. Five-Twenties of 1867, 113@113¼; U. S. Five-Twenties of 1868, 113@113¼; U. S. Ten-forties at 109⅛@109⅜; U. S. Six per cent. currency bonds, 111@111¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 11.	Oct. 18.	Oct. 25.
Consols	92½	93 1/16	93

" 10-40s	89	88 11/16	89⅜
Erie.	22⅝	22¾	24

The new Funding Five per cent. Loan was quoted in London on Wednesday at 1⅝ per cent. discount.

State bonds have been in more demand at steadier prices.

Railway bonds have been more sought after and quoted firmer in the instances of the more popular of the old loans. Central Pacific Sixes closed strong at 101¼@101½. The six per cent. First Mortgage Loan of the Chesapeake and Ohio Railroad has been in increased favor with buyers, for investment at the current price of 93 per cent. and accrued interest.

Railway and miscellaneous share property has been more active and generally stronger, though closing irregularly.

General business has been on a moderate scale, with values of domestic produce quoted steadier toward the close. Middling upland cotton closed on Wednesday at 18½cts. per lb. The receipts at all the ports, since Sept. 1, have been 321,652 bales, against 395,735 bales same time in the preceding year; exports 98,562 bales, against 107,957 bales in the previous year; stock at the ports at latest dates, 185,192 bales, against 200,273 bales same date 1870.

At the Live Stock Markets, Beeves have been in very moderate demand at from 7@12½ cts.; Veals at 4@10 cts.; Sheep at 4½@6½ cts.; Lambs at 6@7¾ cts.; Swine, 5¼@5½ cts per lb., all live weight. The week's receipts were 7,624 Beeves, 1,315 Veal Calves, 41,806 Sheep and Lambs; and 41,380 Swine.

At the auction sale of Scranton Coal on Wednesday, 100,000 tons were disposed of at a material reduction in prices, the range having been $3 85@$5 35, against $4 15@$6 15 in September.

Foreign goods have attracted rather less attention, but prices have been quoted generally firm. The week's imports of foreign goods reached $7,115,036, including $1,791,927 of dry goods.

Ocean freights have been less active and rates have been rather less firm, closing in favor of shippers. Room, plentier.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Central of New Jersey new bonds, 101½; Galena and Chicago 2d mort., 100½; Cleveland and Pittsburg consol., 95; North Missouri 1st mort., 85; New York and Harlem consol., 93; Toledo, Wabash and Western consol., 83¾; Gt. Western 1st mort., 1888, 90; Hannibal and Naples 1st mort., 90; St. Louis and Iron Mt. 1st mort., 90; Chicago and Milwaukee 1st mort., 93; Long Dock bonds, 88; New Jersey, R. R., 120; Albany and Susq. R. R., 90; New York and New Haven R. R., 145; North Carolina 6s, special tax, 13¾; do., Fund Act, 1868, 27⅛; South Carolina 6s, new, Jan. and July, 40; do. Apl. and Oct., 40; Arkansas 7s, issued to Central R. R., 65½; do. 6s, Fund Act, 56; Ohio 6s, 1881, 104½; Alabama 5s, 67; do., 8s, 98½; Louisiana, 6s, Levee bonds, 65; New York State 7s, B. L. reg., 109½; Western Union Tel., 61⅜; Quicksilver pref., 24½; Am. Coal, 45; Maryland Coal, 21¾; Pennsylvania Coal, 220; Consol. Coal, of Md., 41¼; Am. Mer. Union Exp., 54½; Adams Exp., 83½; U. S. Exp., 54½; Wells-Fargo Exp., 51; Brooklyn 6s, W. L., 94; Brunswick City Land, 7.

Philadelphia.—Susquehanna Canal 6s, 62; Penn. and New York 7s, 93½; Belvidere Delaware 3d mort., 81; West Jersey R. R. 7s, 100½; Germantown Pass. R. R., 33; Pennsylvania State 5s, reg., 92. The latest quotations are: City 6s, 99@100; do. free of tax, 100@100¾; State 6s, coupon, 100@—; do. 6s, W. L. 100@100; do. 1st series, 101@102; do. 2d series, 102¼@103½; do. 3d series, 106@107; Reading, 53⅞@53⅞; do. 7s, 1893, 100½@—; do. mort. 6s, 1880, 91½@92½; Camden and Amboy, 127@128; do. mort. 6s, 1889, 95½@96; do. 1883, 90@92; do. 1889, 89¼@—; Pennsylvania R. R., 59¼@59⅜; do. 1st mort., 99@99½; do. 2d mort., 96½@98; do. General mort. coupon, 91@92; do. reg., —@91; Little Schuylkill R.R., 44@45; Morris Canal, 48@51; do. pref., 118@125; do. 6s, 86@—; Susquehanna Canal, 9@10; do. 6s, 61@—; Schuylkill Nav., 7⅝@9; do. pref., 15½@15¾; do. 6s, 1882, 77½@78; Elmira and Williamsport pref., 42@43; do. 7s, 1878, 92@—; do. 5s, 61@—; Lehigh Coal and Navigation, 34½@35; do. 6s, 1884, 84@85; do. R. R. Loan, 90@91; do. Gold Loan, 90@90¼; North Pennsylvania, 46@47; do. 6s, 98½@100; do., 7s, 97@99; do. Chattle 10s, 110@110; Philadelphia and Erie, 23⅜@23½; do. 6s, 88½@—; Minehill, 51¾@52; Catawissa, 18@18; do. pref., 44¾@45; Lehigh Valley, 58⅜@59; do. 6s, new coupon, —@97½; do. reg., 97½@98; do. 7s, 99½@100; Fifth and Sixth streets, (horse,) 45@46; Second and Third, 65@68; Thirteenth and Fifteenth, 22¼@23¼; Spruce and Pine, 82@33; Green and Coates, 47@—; Chestnut and Walnut, 50@55; Hestonville, 20½@21¼; Union, 70@70½; Germantown, 32@34.

Boston.—Michigan Central R. R. 8s, 1890, 108¼; Carthage and Burlington R. R. 8s, 95½; Vermont Central 1st mort., 85; do. 2d mort., 86¾; Burlington and Missouri River R. R. 8s, in Nebraska, 94; Vt. Central and Vt. and Canada 8s, 1875, 100; Eastern R. R. 6s, 1885, 96½; do. 1874, 96¼; Middlesex Horse R.R. 6s. 1884,80⅞; Dixon, Peoria and Hannibal 8s, 1889, 95¼; Framingham and Lowell 1st mort. 7s, 1891, 90; Stanstead, Shefford and Chambly 7s, 83¾; Detroit, Hillsdale and Indiana 8s, 1890, 87¾; Missisquoi R.R. 7s, 80; Leavenworth, Lawrence and Galveston 10s, 92; Cincinnati, Sandusky and Cleveland R. R., 20; Indianapolis, Cincinnati and Lafayette R. R., 8; Rutland, pref., 76¾; do. 8s, 1880, 98¾; Worcester and Nashua R. R. 137; Eastern (N. H.) R. R. 104; Portsmouth, Gt. Falls and Conway R. R., 100; Boston Water Power, Co., 45½; Cary Imp., 12¼; Maine 6s, 1889, 100½; Connecticut 6s, 1883, 100¼; Chicago 7s, River Imps., 90½; do. Va. 1st mort., 97@—; do., 2d mort., —@97; do., 3d mort., 1835, 89@91; Marietta and Cincinnati 7s, 1892, 95¾@96; do., 2d mort., 85½@85¾; do., 3d mort., 79@79⅝; Central Ohio, 29@29⅞; do., 1st mort., 84¾@85; Western Md. 1st mort. 6s, 1890, 80@—; guar. by Baltimore City, 90@—; do., 3d mort., guar., 90@91⅞; do., 2d mort. pref., 60@—; do., 6s, guar, by Washington Co., 82@84; Richmond and Danville bonds, 80@81; Orange and Alexandria 1st mort. 6s, 90@92; do., 2d mort. 6s, 79@81; do., 3d mort. 8s, 90½@—; do., 4th mort. 8s, 81@82; Orange, Alex. and Manassas 7s, 78¾@79; Virginia and Tennessee 8s, 88@89; do., 6s, 1st mort., 90@95; do., 6s, 2d mort., 78@—; Baltimore 6s, 1875, 95½@97⅛; do., 1884, 97@97; do. 1886, 97@99; do., 1890, 96¾@97; do., 1893, 97@—; do., 1900, 96@96¼; Memphis City 6s, 55@55¼; Maryland 6s, 1890, 94½@—; do. Defense Loan, 1883, 104@105; City Passenger R. R. 22½@—; George's Creek Coal, 76@83.

☞ The Tredegar Iron Works at Richmond, Va., are represented as being in a more flourishing condition than at any time since their establishment. They cover eight acres, employ thirteen hundred men, and have to be kept in operation day and night to supply the orders which are pouring in from all sections of the country. In the manufacture of coal freight cars they do the heaviest business in the United States. The company has $1,000,000 capital and its stock is chiefly owned by citizens of Richmond.

United Companies' Lease.

The lease of the property and franchises of the United Companies of New Jersey to the Pennsylvania Railroad Company is for nine hundred and ninety-nine years, at an annual rental of ten per cent. on the stock of the several companies, payable quarterly. Having been signed by the other parties in interest, the signature of the President of the Philadelphia and Trenton railroad company is now only required to perfect the instrument. When the lease is signed by all the parties, the Philadelphia *Ledger* says "a committee will make out a proper inventory of the property to be transferred, with an appraisement of its value. This, it is thought, can scarcely be accomplished in less than three weeks, and, indeed, it may be the 1st of December before the Pennsylvania Railroad Company will enter into possssion of the leased works. There will then be due to the stockholders of the United Companies the remaining 2 per cent. due on the last July dividend and the 2½ per cent. quarterly dividend due October 1. This being the 1st of December, and within a month of the January quarter of 2½ per cent. more, it is probable that the whole 7 per cent. will be paid, all under one trouble."

Dualin.

On the 11th instant a party of some seventy gentlemen, representing the principal railroad and mining interests of the country, with several prominent civil engineers, visited Tarrytown, by invitation of the LAFLIN & RAND POWDER Co., to witness some practical experiments with the new explosive "Dualin." The steamboat *Florence* was chartered for the excursion, and the trip up the river diversified by amateur blasting with the beautiful and compact electrical apparatus made by the above company. On reaching the place of exhibition, a heavy rock cut on the New York and Boston Railroad, the party first inspected two of the Hotchkiss & Gardiner steam rock drills, in operation on the very tough hornblende granite through which the cut is being driven. This drill is constructed on the principle of the Hotchkiss steam hammer, with an *air cushion* placed between the steam piston and drill so that although striking 300 blows per minute with a force of 1,500 pounds each, there was no shock to the machinery, nor any necessity for the heavy loading of stone to hold the drill in place, which is commonly used with other machines.

We have not space for a full report of the various trials with Dualin. As regards its enormous strength the most satisfactory exhibitions were first, the throwing out some 160 yards of stone, nearly all in shape to handle without subsequent breaking up, by two holes, sixteen feet deep, eighteen feet apart and eleven feet behind the face of the rock, fired simultaneously by the electrial battery; and, second, the thorough breaking of a round granite boulder over 8 ft. in diameter by about two pounds of Dualin, placed loosely on top of the rock and only covered by a bucket full of sand. For "block holes," a hole ¾ in. diameter by 6 in. deep charged with Daulin, seemed to have as much effect as one 2 inches by 2 feet filled with powder.

The suitability of Dualin for torpedoes, or work in wet shafts or mines, was demonstrated by using water as the only tamping in one case, and by the fact that the holes in the great blast above described were full of water when the Dualin was inserted.

But the most interesting and novel point was the impunity with which Dualin was subjected to the roughest handling and hardest tamping, and the quiet manner in which it burned unless caused to explode by a heavy charge of fulminating powder. Holes filled with it and lighted by ordinary Fuse burned out slowly in a beautiful fountain of fire.

Some ten pounds were packed solidly in a very tight box and placed in a large bonfire. When the fire had burned through the box at one point the Dualin ignited and burned with a brilliant light, faster than the box but without any explosion whatever. When the contents were consumed the box was taken from the flames and after being immersed in water brought to New York with the party.

☞ THE WEST WISCONSIN RAILWAY is now very nearly finished, and trains will be running through from Tomah to St. Paul by November 1. The earnings of the Road from local traffic on the completed portion constitute already a profitable business; and arrangements and connections are about perfected which will make it the Great Air-Line Route from Chicago to the North-West, effecting a saving of more than 100 miles over the present route. The Bonds are a First Mortgage on the road itself and on a valuable Land Grant of 1,000,000 acres. They bear interest in gold at the rate of 7 per cent per annum, and are sold now at 90 and accrued interest in currency by WHITE, MORRIS & Co., 18 Wall-st., and GWYNNE, JOHNSON & DAY, 16 Wall-st., where pamphlets and further information may be obtained.

☞ At a meeting of the directors of the Philadelphia and Trenton Railroad Company, held in Philadelphia on the 25th inst., to take action upon the lease of the United Companies of New Jersey to the Pennsylvania Railroad Company, it was resolved that Mr. Gatzmer, President *pro tem.*, be authorized to execute the lease upon the assent of a majority of the stockholders being obtained. For that purpose a meeting is to be held at the office of the company on the 11th of November.

☞ The Philadelphia *Ledger*, 20th instant, says "that the building of a narrow gauge line from Hanover Junction to Oxford is now substantially assured. This will give a road through Lancaster, York and Adams counties, and its further extension to the West is in such hands that we may safely anticipate the early realization of that portion of the enterprise."

☞ The Chicago *Tribune*, in a carefully prepared article, states that not less than twenty nor more than twenty-five per cent. of the total assets of that city, including both real and personal estate, has been destroyed.

☞ The Vineland Railroad is now completed to Greenwich, ten miles beyond Bridgeton; but three miles of iron remains to be laid. Cars run through to New York without change, in about six and a half hours from Vineland.

☞ The city of Sheboygan has voted $50 000 aid for the Milwaukee, Manitowoc and Green Bay Railroad.

☞ CHESAPEAKE AND OHIOS—FIVE TWENTIES—CENTRAL PACIFICS.

BANKING OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Oct. 23, 1871.

THE SIX PER CENT. GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY are rapidly being taken up. Only a limited amount of the smaller denominations is left. These bonds offer unsurpassed safety and a liberal income, and are especially suitable for investments.

The great line of railroad upon which they are based is already completed and in operation from Richmond to the White Sulphur Springs—227 miles, and the portion between the Ohio River and the coal deposits of the Kanawha Valley, (nearly 100 miles,) is nearly ready for traffic. The intermediate section of about 100 miles is also well advanced, and will be completed and in operation within one year, so as to form a continuous trunk line from the navigable waters of the Atlantic to the Ohio River.

When the railroad is completed, in 1872, and the Bonds are dealt in at the Stock Exchanges of the world, we have no doubt they will be equally popular with the Central Pacifics, which now command a premium, and are a favorite security here and in Europe, both roads being prominent lines, and under substantially the same fiscal management. Principal and interest of the CENTRAL PACIFIC and CHESAPEAKE AND OHIO BONDS, are specifically payable in gold coin in New York; the interest on the former being paid January and July, and of the latter, May and November, corresponding with the two classes of Five-twenties.

We recommend either of them to our friends and customers with the same confidence that we did the Five-twenty Bonds, when we were selling millions of them for the United States Government.

We buy and sell FIVE-TWENTIES, TEN-FORTIES, EIGHTY-ONES, and CENTRAL or WESTERN PACIFICS, or receive them in payment for CHESAPEAKE AND OHIO BONDS at their current market price. Orders for Chesapeake and Ohio Bonds, accompanied with Drafts or Checks, may be forwarded to us by mail, and the bonds will be sent by express, charges paid.

Bonds are in coupon or registered form, same as FIVE TWENTIES; run thirty years; principal and interest in United States gold coin. Price, 93 and accrued interest, that is, with coupon attached, due November 1.

$1,000 Chesapeake and Ohio Bond costs to-day $858 77.
$500 Chesapeake and Ohio Bond costs to-day $479 38.
$100 Chesapeake and Ohio Bond costs to-day $95 88.

FISK & HATCH.

P. S.—Accounts of Banks, Bankers and others received, on which we allow four per cent. interest.

Certificates of deposit issued and collection made in all parts of the Union.

HARVEY FISK,
A. S. HATCH.

Pittsburgh and Castle Shannon Narrow Gauge Railroad.

The above new enterprise has formally commenced operations by appointing Capt. Isaac J MacKinley of this city as its Chief Engineer. Captain MacKinley has been identified with the getting up and organization of the Company from its inception, and his long experience as an engineer and real estate operator in this vicinity gives assurance that his new duties will be faithfully and energetically performed. He is now organizing a corps of engineers and in a few days will commence work in the field—and says that he will have passenger cars running through to Castle Shannon by the 1st of April. In the meantime the 1,000 acres of land owned by the company at Castle Shannon will be laid out into town lots, and villa sites are offered for sale. He will also survey and develop the vast coal interest of the company, and expects to be able to deliver in South Pittsburgh by the first of April 25,000 bushels of coal each day—the road is now delivering 15,000 bushels daily. At the same time the surveys and construction of the road will be pushed on to Finleyville, in Washington county, with all possible dispatch. The officers of the company are M. D. Hays, President; Wm. H. Edgerton, Vice-President; E. W. Rolfe, Secretary and Treasurer, and Isaac J. MacKinley, Chief Engineer. They are all young, active men in the community, whose past history gives every assurance that the Pittsburg and Castle Shannon Railroad will be hurried along to an early and successful completion. The general officers of the Company are at 75 Fourth avenue.—*Pittsburgh Chronicle.*

Chicago and Northwestern Railway.

We give elsewhere an abstract of the Report of this Company for the fiscal year ending May 31, 1871. The following extract from the Report has reference to the connections and extensions of the company's roads:

During the last year several new works have been undertaken, while others, in progress or contemplated, have been brought to completion. The following description presents the extent and importance of these various projects, and their connection with and relation to the system of railroads owned and operated by this Company:

MADISON EXTENSION LINE, 126 MILES.

In the consolidation of the Galena and Chicago Union Rail-Road Company with the Chicago and North Western Railway Company, the latter came into possession of the Beloit and Madison Rail-Road, extending to the City of Madison, and connecting there with the Prairie du Chien Division of the Milwaukee and St. Paul Rail-Road. The business of this Madison line has ever been comparatively light, as has been shown from year to year in the statements of the Madison Division, published in the annual reports of this Company. The subject of an extension of this line up the rich and fertile Baraboo Valley, through a productive and well-settled country, unsupplied with rail road facilities, has long been urged by the people of that region, and received much consideration and favor from the Direction of this Company in former times. Preliminary surveys and estimates were made of the extension to La Crosse, and in 1867, the Company acquired by purchase the La Crosse, Trempealeau and Prescott, and the Winona and St. Peter Rail-Roads, with a view of controlling their business in connection with and for the benefit of this enterprise, or of such other lines as might best be found to contribute to the business of our Wisconsin roads.

It was, however, not until the last year that any decisive measures were adopted to unite these purchases with the Madison line. It was found that the want of a rail-road in the region intermediate had invited the attention of several rival Companies, and unless the Chicago and North Western Company stepped in and occupied the field, other parties, independent of them, would construct the line, and the opportunity which such a project afforded of connecting the unprofitable Madison Division with the detached La Crosse, Trempealeau and Prescott, and Winona and St. Peter Rail-Roads, would be lost to this Company.

Under these circumstances the Directors obtained control of the charter of the Baraboo Air-Line Rail-Road Company, and after consolidating that Company and the Beloit and Madison Rail Road Company with the Chicago and North Western Railway Company, they took immediate steps to construct the link of about 126 miles from Madison to the southern terminus of La Crosse, Trempealeau and Prescott Rail-Road, near the City of La Crosse.

A first mortgage was executed to cover this piece of road, and bonds running forty years, denominated "*Madison Extension Gold Bonds*," were issued thereunder at the rate of $25,000 per mile—principal and interest payable in gold—for building the road. These bonds were all promptly sold in Holland, and their proceeds are being expended in the construction of this work. The sum of $1,153,438 62 has been expended at the date of this report, and the work is steadily progressing; a portion of the road will be in operation before winter sets in, but it is not expected to complete the whole line this year. The charter acquired provides for the construction of a branch line, if desired, to Tomah, where connection can be effected with the West Wisconsin Rail-Road now nearly completed, and thereby a new route be opened to St. Paul and the lines of the Northern Pacific Rail-Road.

LA CROSSE, TREMPEALEAU AND PRESCOTT RAIL-ROAD—28 MILES.

This property is owned by the Chicago and North Western Company, and consists of a link of twenty-eight miles of railroad, completed in December last, extending from a point opposite the City of Winona, down on the easterly side of the Mississippi River, to a point about three miles east of the City of La Crosse.

A bridge is now constructing across the river at Winona to connect the Winona and St. Peter Rail-Road with this line. At its southern terminus it now connects with the Milwaukee and St. Paul Rail Road, but its ultimate connection will be made with the new Madison Extension line, which is being constructed from Madison to a junction with this road.

The St. Paul and Chicago Rail-Road, nearly completed, extending from St. Paul down the right bank of the Mississippi to Winona, will have an immediate all rail outlet by way of this road, and through it will connect with the present system of rail-roads running to Milwaukee and Chicago.

At the time of purchase of the La Crosse, Trempealeau and Prescott Rail-Road—which was made in 1867, in connection with the purchase of the Winona and St. Peter Road—there had been a little more than one hundred and fifty thousand dollars expended on the work, and arrangements had been made by its former managers to provide means for construction, by the issue of one million of dollars of ten per cent. ten year bonds, secured by a first mortgage on the property. These bonds were subsequently issued, and indorsed, principal and interest, by the Chicago and North Western Railway Company, and their proceeds expended for building the line.

The cost of the road on the 31st of May last, was $1,097,000 40, to which should be added the sum of $205,421 65, paid as balance of interest on bonds, making the aggregate amount $1,302 422 05. Of this amount, $302,568;30 has been advanced by the Chicago and North Western Company.

WINONA AND ST. PETER RAIL-ROAD, (MINNESOTA,) 140 MILES.

This rail-road is now constructed a distance of 140 miles from Winona westward through the State of Minnesota to St. Peter, with a branch to Mankato, on the Minnesota River, is wholly owned by the Chicago and North Western Railway Company, and operated in connection with the La Crosse, Trempealeau and Prescott Road.

The charter extends entirely through the State of Minnesota and to the Big Sioux River in Dakota, a distance of about 120 miles beyond the present terminus on the Minnesota River, and carries with it a valuable land grant from the United States Government of ten sections, or 6,400 acres per mile. The quantity of land already certified to the Winona and St. Peter Company for the extension from Waseca—since it came into the possession of this Company—is a little more than 207,000 acres, which, if estimated at the moderate price of five dollars per acre, would give the handsome sum of $1,035,000 as an asset which may finally be realized from this source.

The terms of the grant under State law require the construction of 30 miles of this road each year; and as the remaining portion of the line, if built under the charter, would secure about 800,000 acres more of land, worth at the same valuation the further sum of $4,000,000, the policy of making such extensions as may be necessary from year to year, to preserve the land grant, cannot be doubted.

The next stage of thirty miles from St. Peter to New Ulm will be constructed during the ensuing year.

The means for the extensions have been largely advanced by the Chicago and North Western Company, and further advances as required will be made for the same objects.

The cost of the property and its financial condition are summed up in the following condensed statements from the balance sheet of the Company, on 31st May, 1871:

Old Construction.		
Cost of Road and Equipment as debited October 31, 1870		$3,703,650 16
New Construction, including right of way, fences, gates and crossings, construction of buildings, engineering, etc., and Mississippi Bridge approach		117,893 48
Cost of building extension from Waseca to St. Peter including construction, equipment for extension, discount on securities, &c.		1,281,539 76
Charges on account of extension west of St Peter		34 00
Other equipment completed and constructing		9,790 36
Cost of the property		$5,112,907 76
The cost is represented by the following items, viz.:		
4,000 shares capital stock owned by Chicago and North Western Railway Company		$400,000 00
First Mortgage 7 per cent. bonds outstanding	$3,750,000 00	
Second Mortgage 7 per cent. bonds outstanding, (including $450,000 owned by the Chicago and North West'n Railway Co.)	1,565,000 00	
		4,315,000 00
Amount due on account to other Rail-Road Co.'s, operating accounts, unpaid coupons, etc.	$355,282 76	
Less dues from other Railroad Companies and from Express Companies and Post Office Department, materials and cash on hand etc., including balance of $150,717 21 income account	283,649 24	
		71,633 52
Balance due Chicago and North Western Company, construction advances		826,274 24
		$5,112,907 76

Bonds including the above have been issued but for 137½ miles of road, as follows:

First Mortgage, at $20,000 per mile, $2,750,000, all sold.

Second mortgage, at $12 000 per mile, amounting to $1,650,000, of which $1,115,000 are sold and in the hands of outside parties; $450,000 belong to Chicago and North Western Railway Company, as above stated, and $85,000 are an asset of the Winona and St. Peter Company.

BRANCH ROAD TO MANKATO.

In the articles of agreement for purchase of the Winona and St. Peter Railroad, it was provided that an extension should be made to the Minnesota River, at or near Mankato; and during the last year this extension has been made by the construction of a branch line of about 3¼ miles in length into the City of Mankato, where excellent depot grounds have been obtained, and a fine elevator erected on the river front, affording ample facilities for business. As it was doubtful whether the branch could be built under the charter of the Winona and St. Peter Company, another Railroad Company was organized under the general law of the State, with the title of "The Winona, Mankato and Ulm Railroad Company," under which this work was done. The cost of the branch has been $156,948 18, represented by $100,000 full paid stock, owned by the Chicago and North Western Railway Company, and the balance by advances made by the latter Company. As a part of the system, connected with and operated by the Winona and St. Peter Company, the branch will, doubtless, be merged with it by consolidation.

The fiscal year of the Winona and St. Peter Company terminates on the 31st of October in each year, and the result of its operations for the three years ending, October 31, 1870, shows an excess of operating expenses, taxes, interest on bonds, &c., over earnings of $20 453 28. This deficiency occurred during the previous fiscal year, and was caused by the short crop of wheat along the line. Much damage by violent storms was done to the grain after harvest and before it was threshed in the field, and a lesser yield than usual was realized. These causes have effected the receipts since October last, during which time the deficiency, up to 31st May last, had run up $150,717 21. But this deficiency having occurred during the winter and spring months, will, in the usual course of business, be greatly reduced and possibly extinguished by the heavy fall earnings that belong to the present fiscal year, ending on the 31st of October next.

The gross earnings of the Company for the three years ending October 31st, 1870, averaged $561,685 41 per year.

It should be borne in mind, that during this period the eastern end of the road at Winona, with only river connections, had no outlet in winter, and its western terminus rested on the prairies, a considerable distance short of St. Peter, to which place it was completed only in May last.

There is still owing to Messrs. D. N. Barney and associates on the original purchase of the stock and bonds of the Winona and St. Peter Rail-Road Company, the sum of $310,000, payable in semi-annual instalments of $50,000 with interest, on the first day of May and November in each year. This debt is shown in the general balance sheet of the Chicago and North Western Company, and with the payments ($550,000 and interest) already made, is represented by capital stock and second mortgage bonds of the Winona and St. Peter Company belonging to the Chicago and North Western Company.

The La Crosse Trempealeau and Prescott Rail-Road has been in operation but a few months, and its business is not sufficiently developed to form any fair estimate of its earnings. The road is substantially the eastern extension of the Winona and St. Peter, as well as an outlet for the River road; and not until the bridge now building across the Mississippi to connect it with these roads is finished, and the business resulting from a continuous all rail line realized, can we expect to have more than a light local traffic on this road.

The benefits which were originally expected to result to the Chicago and North Western Company from the purchase and completion of the La Crosse, Trempealeau and Prescott, and Winona and St. Peter Railroads cannot be fully realized until a direct and continuous all rail route shall be opened between them and Chicago in the interests of this Company. And to this end, the intermediate link of the Madison Extension and the bridge at Winona are necessary projects.

The extent of the line, when completed from Chicago *via* these roads to the proposed western terminus of the Winona and St. Peter Road in Dakota, will be about 550 miles, and will form a grand trunk line penetrating some of the finest and most favored portions of Central Wisconsin and Minnesota, whose immense and undoubted resources are rapidly developing a business which it is confidently believed will be adequate to the profitable support of this important line.

ST. CHARLES BRANCH, (ILLINOIS,) 2¼ MILES.

About 2¼ miles of track have been laid from Geneva, on the Fulton line, to St. Charles, greatly increasing the facilities to the local and daily business travel between St. Charles and the City of Chicago. The cost of the branch was $43,801 55, of which $35,000 was paid by the St. Charles people.

IOWA MIDLAND RAILROAD, (IOWA,) 75 MILES.

In the permanent lease by the Chicago and North Western Company of the Cedar Rapids and Missouri River Rail-Road, in the State of Iowa, it is provided that a branch road embraced in its charter shall be operated between Clinton and Lyons, although the length of the branch, (2 4-10 miles,) and the business it controls, are too inconsiderable for profit. The Iowa Midland Railway Company, as successors of the old Iowa Central Air Line, obtained possession of the rights and property of the latter Company, and proceeded to construct a railroad which extends from the terminus of this branch at Lyons a few miles northerly, and then westerly through the beautiful and well settled country of the Masquoketa Valley to Anamosa, a distance of 75 miles, and, by means of connections with the Dubuque and South Western Railway, thence to Cedar Rapids, another route nearly parallel to the Chicago, Iowa and Nebraska Road, (which is a part of our leased line in Iowa,) would be created a few miles north of the latter road.

The control of this project, aside from any local merits it might possess, was regarded as a measure of protection to the interests of the Chicago and North Western Company; and as the business which might reasonably be expected to originate on this road would be valuable, if made tributary to the Fulton line, negotiations were concluded for the purchase and completion of the Iowa Midland by the Chicago and North Western Company, to the exclusion of the rival interests, under whose encouragement and auspices considerable work had been done and track-laying begun.

A large sum of money (some $250,000) had been expended by the old Iowa Central Air Line Company in grading a portion of this road in 1856-'7, at which time the financial revulsions of that period suspended the work.

The Iowa Midland Company reaped the benefit of this work at very small cost, and encouraged by some local aid, undertook the construction of the line, which they transferred, by lease and control of the stock, to the Chicago and North Western Company.

The means provided for construction were to be obtained by the sale of bonds which the Iowa Midland had proceeded to issue as a first mortgage on its railroad, at the rate of $18,000 per mile, amounting in the aggregate to $1,350,000, running thirty years from October 1st, 1870, and bearing 8 per cent. interest. These bonds, after the purchase, were all indorsed, principal and interest, and sold by the Chicago and North Western Company, and their proceeds made available for the prosecution of the work of construction.

The whole 75 miles are graded, about 35 miles of track are laid, the road in operation to Maquoketa, and the ties and iron provided for the balance of the line, which will be finished by the first of October next.

The charter of this Company extends across the State of Iowa, and is available for whatever extensions the interests of the line may demand. The road is operated under perpetual lease, as a part of the line of the Chicago and North Western Company, and was opened to Maquoketa in December last. The total amount expended for account of construction, up to the 31st of May last, was $915,283 21.

ELGIN AND STATE LINE RAIL ROAD, LAKE GENEVA EXTENSION, 10 MILES, (WISCONSIN.)

The piece of road covered by this extension was built to the town of Geneva, in the State of Wisconsin, many years ago, laid with strap rail and operated in connection with the Elgin and State Line Division of the Galena and Chicago Union Rail-Road Company, before consolidation with the Chicago and North Western Railway Company. The rails were long since removed, and the old grading and right of way suffered to remain unoccupied.

The situation of Lake Geneva, in the flourishing town of Geneva, its beauty and surroundings, the natural advantages for summer residences and country homes on its banks, and the attention it is steadily attracting as a pleasure resort and watering place, from the towns and cities in the vicinity, and especially from the citizens of Chicago, some of whom are already attracted to the spot and improving it, having induced this Company to avail itself of an arrangement with parties, by which the old grading and right of way on the abandoned line are secured at a very nominal price, and a charter obtained, by the title of "The State Line and Grand Union RailRoad Company," under which it is proposed to lay down the rails during the present season. It is believed that the amount of traffic, both in passengers and freight, that will go over the road between Chicago and Lake Geneva by reason of this extension of ten miles, will be materially increased from year to year, and will fully justify this outlay.

MENOMINEE EXTENSION, (WISCONSIN AND MICHIGAN,) 120 MILES.

The gap in the Company's line between Fort Howard and Escanaba, a distance of about 120 miles, which has heretofore been supplied by the use of steamboats on Green Bay during the season of navigation, and by means of stage lines in winter, has come to possess new and immediate importance.

With the development and gradual settlement of this part of the country, there has been an immense growth of lumber manufacturing in all the towns along the west shore of Green Bay; and the heavily timbered districts covered with hard wood, by their proximity to the mines will, once opened up by a railroad, multiply the number of blast furnaces that are in successful operation on the upper Peninsula for the production of Lake Superior charcoal iron.

The new business which is to spring from the peculiar resources of this new region, together with the large quantity of supplies that must be carried to the miner, lumberman and laborer, and the increased travel that will attend upon the success of these special and important branches of industry, seem to call for better facilities of transportation than can now be had by stage and steamboat.

These facilities it is the interest of this Company to provide, by the construction of the link between Fort Howard and the Peninsula Division at an early day. Large grants of land have been made both by the General Government and the State of Michigan, contingent upon the construction of this line; and these grants, if all of them are to be made available, require that the Road shall be completed within two years.

The aggregate of these grants, should there be no deficiency within the Government limits, together with the lands which, on completion of the line in Michigan, are yet to accrue to that portion of the Peninsula Road already built, amounts to upwards of 800,000 acres of every kind and quality

ound in that region. Many of these grants cover alternate sections in districts where valuable timber and minerals abound; and from discoveries that are constantly being made, it is believed that portions of the land will be found to contain immense deposits of iron ore of the best quality, and of great value to the Company.

There is no question that the connection between Fort Howard and the Peninsula Division will ultimately be made to complete the all rail line to Lake Superior; and it should be done while the benefits of these grants can be secured to the Company.

It is proposed to issue a first mortgage 7 per cent. gold bond, to be secured by a first lien on the 120 miles to be constructed, amounting to $2,400,000, or at the rate of $22,500 per mile; and to finish the road from Fort Howard to the Menominee River within twelve months, and the balance within the time to which the land grants are limited by law.

LAND GRANTS.

The quantity of land which this Company and the Winona and St. Peter Company will ultimately receive for construction of the land grant roads hereinbefore mentioned, cannot be definitely ascertained, until the final location and construction of these roads within their respective land limits shall be determined, and their precise length known; nor until it shall be known how much, if any, deficiency exists in the amount of lands reserved by Government for these enterprises.

The quantities now specifically certified are:

In State of Wisconsin	153,600	acres.
In State of Michigan	176,883	"
In State of Minnesota, Winona and St. Peter R. R. Co.	207,000	"
Total now certified	537,483	"
Quantities withdrawn from sale to be certified on completion and extension of these roads:		
Withdrawn in Wisconsin	145,920	
Withdrawn in Michigan	502,831	
	648,751	"
Add quantity estimated for 120 miles extension of Winona and St. Peter Road, (grant believed to be full,)	788,000	"
Grand total	1,974,234	"

Or, say two millions of acres.

The chief value of these lands in Wisconsin and Michigan will be found in their resources for lumbering and mining, while those in Minnesota, being mostly prairie lands, will be available for farming purposes.

It would be as difficult as premature to estimate the worth of these lands to this Company at the present time; but starting from the average value usually placed by Government on alternate sections, of $2.50 per acre, which gives a result of $5,000,000, we may run up the appraisal to $10,000,000, without much exaggeration of estimate, and then probably come short of their value when they shall be thrown open by easy railroad communication to occupation and development at no remote period in the future.

☞ The holders of the preferred shares of the Rutland Railroad which were issued in exchange for the 1st mortgage bonds are requested to authorize the cancellations of the bonds, as four-fifths of the said bonds have been converted into preferred stock. This is in accordance with the agreement of August 18, 1867. A majority of the holders must consent to this cancellation before it can be made.

☞ John G. Johnson, one of the engineers of the survey for the Canada Pacific Railway, has arrived at Toronto, and reports favorably of the country between Nepigon Bay and Long Lake for railroad,

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY OF HORSE RAILROADS FOR DAMAGES RESULTING TO OTHERS BY CONSTRUCTION OF THEIR TRACK.

The facts in the recent case of The Alton and Upper Alton Horse Railway and Carrying Company *vs.* Deitz, (50 Ill., 210), are fully and clearly stated in the following opinion by

WALKER, J.—This was an action on the case, brought to the September term, 1868, of the Alton City Court, by appellee, against appellants. The ground relied upon for recovery is, that the appellants wrongfully caused to be constructed, across a gutter on a street in the city of Alton, the track of their railroad in such a manner as to cause a permanent obstruction to the passage of the water when increased by rains, so as to overflow appellee's land; and that in consequence of such obstruction, the water was flowed back upon appellee's premises, whereby damage was caused to his garden, vegetables, flower shrubbery and seeds. Appellants filed the general issue and a trial was had before a jury, who rendered a verdict against appellants for $150. A motion for a new trial was entered, but it was overruled by the court, and judgment rendered on the verdict.

It appears, from the evidence in the record, that appellee had leased the lots which he was cultivating as a seed garden at a rent of $100 a year. It appears that prior to the construction of this railway, this ground was not overflowed, but there was a free passage for the water, and that the railway created an obstruction to its passage and flowed it back on this ground.

The law incorporating this company was adopted at the January session of the legislature in 1867. The 6th section of the act of incorporation declares that the company is authorized to lay down and maintain its railway in, upon, over and along any street or streets in the City of Alton and town of Upper Alton, subject to such restrictions as may be imposed upon by the Common Council of the city and by the trustees of Upper Alton. An ordinance was adopted authorizing appellants to lay a single track, with necessary turnouts etc., on the street in question. It provides for the manner in which the track shall be laid, and the culverts constructed; the manner in which the cars shall be propelled, the rate of speed, and declares that the Railway Company shall be liable for damages to property or person, in operating their road; and the city reserved the right to prescribe, regulate and alter the grade of the streets of the city without incurring liability to the company for damages.

It also appears, that the track of the company was laid under the direction of the City Engineer, who gave his personal attention to the matter, and this culvert was constructed according to his directions; that the culvert was not sufficient to discharge the water, as it was constructed.

Appellants insist that, as they constructed their railway track under the ordinances and under the control of the city engineer, they cannot be held liable for this injury. It will be conceded that there is no law requiring them to construct their track. That was a matter of choice, and purely a voluntary act on their part. There was no compulsion, but purely a matter of profit and gain on the part of the company. They accepted the charter, with its conditions, and it was for them to determine, before it was accepted, whether, when they complied with the terms and conditions imposed, it would be profitable. When an incorporated company of this character accept their charter and construct a railway, it is an implied condition that they will not injure others by its construction or maintenance. If they receive, exercise and enjoy special rights and privileges over those enjoyed by the community at large, it must be implied that they will respond in damages to all persons injured by the construction or maintenance of their track. And the valuable franchises they receive are certainly sufficient compensation to them for the liability thus incurred, but if they were not, it is a rule that all persons must so use their own as not to injure others.

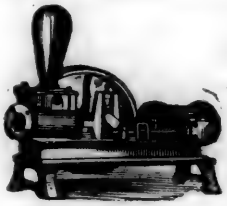
When the city prescribed the limitations under which the company could lay their track, it was for them to determine whether they would proceed or abandon the enterprise; it was for them to say whether it would be to their present or future advantage to accept the terms, with the liability to damages to others growing out of the terms imposed by the city, and proceed with the work. When they adopted the conditions imposed by the city, and plans prescribed by its engineer, appellants made them their own. They were free to accept or reject them, and having accepted them, they are responsible for the damages resulting to others by the construction of the road, to the same extent, and precisely as though the plan had been suggested and carried out by an engineer of their own.

Whether the city or its engineer, is liable over to Appellants is a question not presented by this record, and we, therefore, refrain from discussing it.

The judgment of the court below is affirmed.

Judgment affirmed.

☞ The Secretary of the Treasury has suspended the operation of the instructions of the Department of the 4th inst., which require, after the 1st of December, the use of the American seal lock on cars conveying domestic goods through Canada, until the 1st of February. At that date further instructions will be issued.



☞ The Connecticut River Railroad will probably be doubled-tracked, next year, from Chicopee to Northampton. Preliminary surveys are now going on under the direction of the officers of the road, for a railroad having one terminus at or near South Deerfield and the other at or near Shelburne Falls.

☞ The Boston and Maine Railroad company have declared a dividend of Three Dollars per share, net, of the profits of the four months ending September 30, 1871, payable on and after November 15, 1871, to stockholders of record at the close of business, November 1, 1871.

☞ The Denver and Rio Grande Railway was finished to Colorado Springs, 76 miles, on the 23d inst., and is now open for travel and freight. The gauge of the road is three feet. Surveys are now in progress to Santa Fe and the St. Louis Valley.

☞ The Bristol (Va.) *News*, says that the Pennsylvania Railroad company has purchased a controlling interest in the East Tennessee, Virginia and Georgia Railroad,

☞ W. D. Mann, executive officer of the Mobile and Northwestern Railroad company has contracted for the construction of the entire line of that road from Mobile to Helena' Arkansas, 350 miles. The work is to be commenced at once. The iron for a large section of the road is now being made in England.

New York Saturday, November 4, 1871.

Portland and Ogdensburg Railroad.

At a special meeting of this Company held in Portland on the 23d ult., President J. S. Anderson presented the following report in reference to the Western or Vermont Division:

The road embraces three corporations—the Essex County Railroad, extending from the Connecticut to the Passumpsic rivers; the Montpelier and St. Johnsbury Railroad, from this last place to West Danville; and the Lamoille Valley Railroad, thence to Swanton.

Eleven miles of the Essex County Road will be graded by Nov. 20, and the iron laid from West Concord to St. Johnsbury, 8 miles. The Montpelier and St. Johnsbury Road is completed and track laid 15 miles; 6 miles remain to be ballasted, which will be done this fall.

On the Lamoille Valley Road the grading from West Danville to South Hardwick is completed, and track-laying progressing at the rate of half a mile per day. It will reach South Hardwick Nov. 20. This will open 44 continuous miles of road. The grading of the road-bed from Swanton going eastward is completed 8 miles, and by Dec. 1, will be done, ready for the track, 13 miles. Tracklaying has commenced at this end, and weather permitting will reach Sheldon early in December. Between South Hardwick and Sheldon much work has been done, leaving only 87 miles to be prepared for the iron, and much of this distance is now being worked with force sufficient to complete the grading by June, 1872.

Of the entire line, extending from Connecticut river to Swanton, a distance of 118 miles, there will be completed this fall 54 miles, leaving for completion in 1872 only 64 miles, of which ten miles are graded now, and work proceeding at a rate which ensures the completion of the entire road in 1872.

The road was opened for business September 12, 1870, to Lake Sebago, 16¼ miles from Portland; in November to Heep Falls, 24½ miles; in December to West Baldwin, 33¼ miles; in May to Hiram, 36¼ miles; in June to Fryeburg, 49 miles; in July to Centre Conway, 55 miles; in August to North Conway, 60 miles. This makes an average of 37 miles for nearly 13 months.

The receipts of the road from September 12, 1870, to September 30, 1871 were: from freight, $39,318 95; from passenger, $49,929 97; from express, mail, etc., $1,999 98—making a total of $91,248 90. The total receipts since the completion to Conway (July, August and September) are $44,975 61, divided as follows; freight, $13,554 89; passengers, $30,170 74; other sources $124.998. This shows the great success already of the road as a summer route to the mountains. Hon. W. L. Putnam offered the following, which was unanimously adopted;

Whereas, It is deemed expedient to take immediate measures for obtaining the means necessary for the extension and final completion of our road to the West line of the State of New Hampshire, the Directors are authorized to issue bonds of the Company to an amount not exceeding $3,300,000, payable in not exceeding 30 years, with interest semi-annually at the rate of 6 per cent per annum, principal and interest payable in gold, and to secure the same by a mortgage of the road located and to be located in Portland, in the State of Maine, and thence to its terminus at the Western boundary line of the State of New Hampshire, with all the land and tenements, rolling stock, stations, fixtures and franchises thereof and appurtenances thereto, together with any and all rights by leave or contract, which may be hereafter acquired in any and all railroads forming parts of a continuous line from Portland and Ogdensburg, now owned or held or that may be hereafter acquired for the use of said company. A portion of said bonds, amounting only in the aggregate to twenty-five hundred thousand ($2,500,000) dollars, to be issued to provide for the construction, completion and equipment of the whole of said railroad, the remaining ($800,000) eight hundred thousand to be appropriated to and to be used only for the liquidation and removal of a prior incumbrance on that portion of said railroad extending from Portland, Maine, to Bartlett, New Hampshire.

Voted, That the Directors be and they are hereby authorized to fix the details of said bonds and mortgage and to do all acts necessary to carry the foregoing vote into effect and to dispose of the said bonds of the company in such manner and on such terms as they shall consider for the best interests of the company, and to select three trustees to whom the aforesaid mortgage shall be made.

Automatic Signals.

An automatic telegraph signal has been placed at every cross street upon Fourth-ave., from the great depot to Harlem Bridge, by the Hudson River and New-York Central Railroad Company. The signal is displayed by the showing of a red or white color in a glass disc, elevated some 20 feet above the ground by a wooden structure, which also shields the telegraph wires. When a train arrives at certain points, the magnetic current acts, and the red color of danger covers the white disc of safety, giving the driver of an approaching carriage upon a cross street ample warning. The danger signals face toward the rivers, but others of the same construction are placed in the center of the blocks at regular intervals, with the disc toward the north and south, indicating the position of moving trains also in motion, the orders of the railway officials being that every train shall be separated by at least a mile.

It is probable that the signal posts will be placed in every village upon the several routes, they having already been provided for many villages within a few miles of this city.

Port Huron and Lake Michigan Railroad.

Those of our readers who are interested in the progress of the Port Huron and Lake Michigan Railroad will be interested in the subjoined item from the Port Huron *Times* of Oct. 26th:

The new freight depot building and engine house of the Port Huron and Lake Michigan Railroad in this city have been completed and occupied. At several stations on the line new buildings have been erected. Work on the west end is progressing satisfactorily, and it is expected that iron will be laid to Flint early next month. The Sarnia Canadian says that arrangements are being made to run an express train over the Port

Huron and Lake Michigan and Great Western Railroad as soon as Flint is reached.

Atlanta and West Point Railroad.

The earnings of this road for the fiscal years ending June 30, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$151,358 07	$140,300 65
" freight	296,700 38	295,111 77
" mail	8,649 96	8,649 96
" U. S. Gov., etc	2,082 77	1,009 18
	$467,956 58	$453,715 39
Expenses, viz:		
Conducting transp.	$69,715 55	$75,495 26
Motive power	96,477 01	92 654 74
Maintenance of way	82,996 56	75,748 48
Maintenance of cars	19,609 23	20,364 92
Taxes, fees, etc	7,100 00	3,441 27
	$275,898 35	$267,704 67
Net earnings	$192,058 23	$186,010 71
From which deduct extraordinary expenses in 1870-'71—		
New locomotives	$36,000 00	
New cars	15,000 00	
Renewing iron rails	15,000 00	
New water stations	8,500 00	
Paid on Union Passenger Depot	16,000 00	
Additions to way depots	2,500 00	
		88,000 00
Net over all expenses		$98,010 72

In 1869-'70 the extraordinary expenses were $53,000, leaving the balance of earnings at the close of that year $139,058 23. The ratio of ordinary expenses to gross receipts is 59 per cent. A comparison of items of gross revenue with the same for the previous year, will show a decrease in receipts from passengers of $10,057 42, and from freights, express, etc., of $4,183 77, making a total decrease of $14,241 19. The ordinary expenses during the same time decreased $8,193 68. The President in his report says:

All things considered, the exhibit is perhaps quite as favorable as the stockholders expected. The multiplication of rival roads, and the effect of increased and increasing competition, has been long foreseen, and officially noticed in previous reports. Since the completion of the Selma, Rome and Dalton Road, and the extension of the South and North Road from Montgomery to Calera, the effect of competition for travel has perhaps reached its *maximum*. Roads progressing in Georgia, and others contemplated, if built, will probably add as much as they will take from our travel. A more perfect communication, however, between Montgomery and Louisville, by way of Nashville, and between the same point and St. Louis, by way of Vicksburg, may still affect, injuriously, our business in the transportation of provisions.

The stockholders are aware that the competition from which we have most suffered, and from which we have most to fear in the future, is competition for what is called through business, or business connected with distant points. This is never a safe or reliable business, of which the stockholders have been frequently reminded. In the report of 1868, it is stated that—"as a general rule, the conviction is gaining strength, that no road should be built as an investment, unless its local business will pay an interest on the cost. The only exceptions will be a few great thoroughfares, the shortest and most direct between important points, and presenting such advantages in distance and business attractions as to shut out all competition."

In the same report the elements of a good local business are confidently referred to, and may be here repeated.

1st, We have the growing and prosperous city of Atlanta with all its business attractions and resources for our Eastern terminus.

2d. Our road runs through a well-settled and productive country its entire length, affording a good local business, which, of course, belongs to us.

The road transported the last year, of cotton, strictly local, 42,747 bales, and of cotton shipped from points beyond West Point, 24,731 bales.

To this local business may be added, with equal safety, the travel between Atlanta and Columbus, Montgomery, Pensacola, Mobile, New Orleans, Selma, and all points West, for which, with existing improvements, there can be little or no competition.

Very few roads of equal length and capital, exhibit more reliable means for profits and fair dividends. Our capital is small and we have no debt worth notice. The stockholders should therefore not be discouraged by a reduction of income, from increased competition, either actual or threatened. The large profits of former years, of course, cannot be expected, but with close management and judicious economy, it is hoped that the restoration of property may be continued, and fair dividends also continued to the stockholders. The large extra expenditures made necessary by the war, may be greatly reduced, and perhaps confined to a renewal of the iron. In connection with this subject, however, it may be proper to observe, that the prospect for railroads in Georgia for the ensuing year are not very encouraging. There is every indication of a very small cotton crop, whilst the provision crop promises unusual abundance. These indications may be satisfactory to the country, but promise but light business for railroads.

Since our last meeting, the Western Road from Montgomery to Selma, has been finished. This places us in free all-rail communication with Vicksburg and the contemplated Pacific line. This improvement, long needed and desired, is of great importance to all its Eastern connections. But from the condition of the Selma and Meridian Road, and the imperfect connections of the Western Road with it, we have not as yet derived all the advantages expected from that important improvement. It is the last link in an unbroken all-rail line between Vicksburg and the South Atlantic ports, and on the shortest line between the Pacific and Atlantic coast, by several hundred miles. Strong efforts are making by Northern interests and Northern capital, to monopolize and divert the immense traffic that must ultimately crowd upon this great Southern Pacific line—the construction of which is said now to be a fixed fact. San Diego, on the Pacific and Savannah, Port Royal, Charleston and Brunswick, on the Atlantic, are the natural termini of this great trans-continental line, and nature and geography will ultimately assert their claims, and cannot be entirely ignored.

We have close business connections with the Western and Atlantic Railroad, and much of our traffic and travel passes over that road. This is especially true of our provision trade, which has constituted our heaviest summer business. We are, of course, much interested in the condition of that road, and the promptness and efficiency with which its business is conducted. The road had become much run down and dilapidated, and connecting roads were suffering greatly from its want of efficiency and promptness in management. The State declined to make further appropriations for a work that afforded no relief to the Treasury, but on the other hand was rapidly running the State deeper in debt. The policy of a lease was decided on, and the property was offered for lease in December last.

For reasons above stated, the Board deemed it a duty to co-operate with other roads, alike interested in offering every facility to a measure that promised to place the road upon a better footing, and secure more prompt and efficient management. The Board accordingly joined others in endorsing the bond given by the lessees to whom the lease was awarded. The object was deemed important, whilst the responsibility is merely nominal, and the matter is only mentioned as a part of the action of the Board since our last meeting. The Board have not been disappointed. Large appropriations have been made by lessees for improvement of track and increase of outfit, and the business is now done with regularity and dispatch.

When we are informed by the Superintendent that there has been but one mail failure during the year, and that from the breaking of an axle, and that the accident alluded to is the first and only failure in five years, it is hardly necessary to remind the Board of the watchfulness and fidelity of the officers in the past as in former years. Such regularity of service and freedom from accident is believed to be unprecedented.

The company have 19 locomotives, 6 passenger, 4 baggage, 1 express, 4 cab, 1 shanty, 71 box, 19 stock, and 25 platform cars. Number of through passengers carried, 12,148; number of way passengers, 49,567—total, 61,715; against 62,375 in the previous year, a decrease of 660. Tons of freight transported, 76,090, against 78,120 in the previous year—an increase of 2,970.

BALANCE SHEET, July 1, 1871.

Road outfit and real estate		$1,200,129 51
Bills receivable		20,697 20
Supply fund		2,500 00
Interest account		1,653 31
Dividends of July and December		101,170 10
Due by agents and connecting roads		102,755 46
Road expenses for the year		355,704 67
Cash		14,576 81
		$1,799,187 06
Capital stock	$1,232,200 00	
Bonds of the company	27,000 00	
Profit and loss July 1st, 1870	82,599 66	
Dividends unpaid	698 00	
Due to agents and connecting roads	2,974 01	
Road earnings for the year	453,715 39	
	$1,799,187 06	

President.—HON. JOHN P. KING.

Directors.—R. Peters, John E. Robinson, L. B. Lovelace, W. B. Berry, F. Phinizy, John F. Moreland.

General Superintendent.—L. P. GRANT.

Secretary & Treasurer.—W. P. ORME.

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$208,349 94	$210,043 42
" freight	279,505 68	293,437 57
" express	14,884 38	15,418 03
" mail	9,583 34	10 500 00
" rents and storage	1,872 00	5,370 90
" use of engines and cars	3,158 83	3,403 31
	$516,804 17	$538,173 23
Expenses, viz:		
Running road	$80,972 99	$82 313 30
Maintenance of track	128,620 53	137,200 75
" structures	15,919 20	14,741 05
Repairs of machinery & cars	51,789 59	48 555 44
General expenses	70,021 17	80,560 21
Change of line at Vincennes	2,781 41	4,645 12
	$350,104 98	$368,015 87
Net earnings	$166,699 28	$170,157 36
Interest and taxes	116,652 48	111,147 59
Balance	$50,046 80	$59,009 77

The receipts from all sources during the year were $588,373 23; and the expenditures $564,682 21—showing an increase in expenditures of $26,308 98. The expenditures embrace:

Operating and maintaining road	$368,015 87
Interest on bonds and loans	101,018 18
Taxes	10,134 41
Redemption of 31 bonds for Sinking Fund	29,987 00
Increase in wood and supplies	7,318 04
Stock subscription to E.T.H. & C.R.W.	10,000 00
Construction	15,369 78
Equipment	22,843 93
Total	$564,682 21

The gross earnings of 1871 are $538,173 23, being $21,369 06 in excess of the gross earnings of the previous year. The working expenses, including very extensive renewals of track, are $368,015 87, being $17,910 98 in excess of last year, and leaving for net earnings the sum of $170,157 36, of which $141,134 59 has been applied to the payment of interest and taxes and the stipulated appropriation to the sinking fund, leaving a balance of $29,022 77.

The capital account has been increased during the year as follows:

Fencing	$4,465 67
New buildings	4,838 75
Track to the Ohio River	5,165 36
Construction account Rockville Div	900 00
New engine	11,191 80
Freight cars	11,652 13
	$38,213 71

The total cost of the road and equipment to date is as follows:

Construction	$2,432,427 70
Equipment	395,813 92
	$2,828,241 62

This cost is represented by—

Common stock	$1,044,252 93
Preferred stock	100,000 00
Seven per cent. bonds	1,154,000 00
Earnings expended	529,988 69
	$2,828,241 62

Three miles of additional side track have been laid down during the year, and the renewal of rails and ties in the main track have been far greater than in any previous year, 68,775 crossties have been purchased at a cost of $25,073 20, and 982 tons of best English splice bar Iron Rails, at a cost including splices, of $77,537 19
Less the proceeds of 720 tons old rails taken out of the track and sold for 31,602 22
Leaving the net cost of the new rails $45,934 97

There have also been repaired in the Blacksmith Shop of the company 1,038 rails at a cost of $1,155 39.

The length of track relaid with new rails is 11 2-5 miles, and with repaired rails about 2 miles.

Three thousand and forty-three car loads of gravel ballast amounting to over 18,000 cubic yards have been put upon the road during the year, and 200 lineal feet of trestle work ranging from 10 to 15 feet high have been filled up.

The length of track now laid is as follows:

Main Line Evansville to Terre Haute	109 miles.
Rockville Extension	23 "
Sidings	15 "
Total	147 miles.

One new coal burning freight engine has been purchased and placed upon the road at a cost of $11,191 80.

There have been constructed in our shops one new caboose, two compromise box, and twelve coal cars, and 25 box and 2 platform cars have been rebuilt in addition to ordinary repairs.

The equipment of the road is now as follows: 16 locomotives, 10 passenger, 1 paymaster's, 4 baggage, 6 caboose, 81 local freight box, 44 compromise box, 30 platform, 54 coal, 10 stock, 10 construction, 84 hand and 24 push cars.

The train service for the year is as follows:

Miles run by passenger trains	162,201
" " freight trains	148,956
" construction trains	39,575
Total mileage of trains	345,732

Showing an increase over the previous year by passenger trains of 2,305 miles; freight 20,766; construction 15,825. Total increase, 38,896 miles.

The number of freight cars hauled during the year is:

Loaded cars	22,393	Mileage	1,456,701
Empty	9,312	"	407,699
Total cars	31,705	Mileage	1,864,400

Showing a gain over previous year of 1,862 loaded, and 555 empty cars, and of 190,176 miles run.

The tonnage of freight carried during the year is as follows:

Through freight	77,000 tons.
Local "	103,000 "
Total	180,000 "

Being 8,000 tons of through, and 13,000 tons local freight in excess of last year.

We have received for the carriage of this freight an average of $1 30 per ton for through, and $1 87 for local, being 5 cts. per ton on through and 19 cents on local, less than was realized last year.

The number of passengers carried during the year is 155,795, being 11,704 less than last year, but notwithstanding the falling off in numbers carried, there has been an increase of revenue from this source amounting to $1,693 48; showing that the average distance traveled by passengers was greater than in previous year.

Pursuant to agreement with our bondholders 31 bonds of $1,000 each have been redeemed by the sinking fund during the year, making a total of 86 bonds redeemed to date.

The Evansville, Henderson and Nashville Railroad, our long-looked for direct Southern connection, was opened for business last April. As yet we have not received any great accession of business from this connection, but within the last two months it has drawn a considerable quantity of breadstuffs and other commodities down our line to the Southern markets.

The lines destined to form our direct connection with Chicago are still delayed in their completion, but are expected to open for business before the closing in of the Autumn. The direct line over our road, between Chicago and Nashville, being the shortest practicable line between those cities, must at an early day, by good management, very materially increase our traffic.

The "St. Louis and South Eastern Railway" now being constructed between St. Louis and Evansville, on a line only 160 miles long, is expected to open for business in November next.

This line when opened, will so far affect our interests, as to take from us all our St. Louis and Evansville business, causing a loss of traffic which we shall sensibly feel, and which we think will be but partially compensated by any fresh traffic which it will bring to our road, for the first year or more. We have united with this new company, in laying down a track from a point on our line near our city depot, to the depot and yard of the new company on the bank of the River. The St. L., and S. E. Co., is now perfecting a transfer track for the joint use of the two companies, down to the waters' edge of the Ohio River, near its depot. This connection of our road with the river, will greatly facilitate the transfer of heavy freight between the Railroad and Steamboat Lines.

Within the year now entered upon, it is expected that the Louisville, New Albany and St. Louis Railroad, which crosses our line at Princeton, will be open from New Albany to the Wabash, if no further.

This new road will divide with us the business of Princeton, the best local station on our line, and notwithstanding any new business it may bring to us at that point, will probably for a while, very sensibly diminish our earnings.

Our trains have been run during the year with even more than their accustomed regularity, and our engines have been maintained in a more efficient condition than ever before.

The same good Providence heretofore experienced has still attended us throughout the year, and up to its close no casualty has befallen any employee or passengers upon our trains.

The officers and employees of the company have been, as a rule, industrious, efficient and faithful, for which the acknowledgements of the managers are now tendered.

GENERAL BALANCE SHEET, Aug. 31, 1871.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 4, 1871.

Stock Exchange and Money Market.

Money has been in rather better supply, and though there has been an active inquiry for aid, rates have been quoted more favorable to borrowers, especially on call. The discount business is quite tame, and lenders are yet extremely cautious in making advances on mercantile paper. The call loan quotation on prime collaterals is generally 7 per cent, with, in exceptional instances, 6 per cent; the best double name commercial notes are rated at 9@12 per cent. per annum discount, and the best single name obligations at 12 @15 per cent. The city banks, in their latest return, show an increase of $490,800 of legal tender notes, $600,700 of specie, and a decrease of $448,800 of deposits; also a reduction of $2,121 500 in their loan and discount averages, and an increase of $198,500 in their item of circulation. The city bank exchanges, last week, averaged $110,854,014; and thus far, this week, 95½ millions daily. The banks now hold $2,748,000 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $10,702,100, against $13,108,406 same time last year. The city bank deposits are now $203,342,200 against $193,077,798 week ending Oct. 29, 1870. The legal tender reserve amounts to $50,500,000 against $53,009,099 same time last year. The circulation now stands at $30,492,800, against $32,420 509 same time last year. The loans are now $281,458,600, against $265,979,485 at this date last year.

The U. S. Sub Treasury enlarged its currency balance $298,931 and its coin reserve $1,490,412, as the result of the week's business. The receipts of the office were $5,122,424 in coin, and $4,215,858 in currency; payments, $3,632 012 in coin, and $3 916,927 in currency. The office received $2,700,000 in coin or its equivalent, from customs; and disbursed $3,050 082 of coin interest.

The U. S. Sub-Treasurer retired last week, $2,271,484 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $336,920,350; and as security for deposits of public money, United States bonds for $15,569,500. The aggregate of the outstanding circulation of the National Banks of the country is $324,526,652.

Government revenues have been on a somewhat reduced scale since our last. The excises yielded last week about 1½ millions, and thus far since July 1, $44,874,876. The customs at the port of New York, last week were $2,540,484; and at the outports, equal to about $850,000 more, all in coin. or coin certificates.

Under the Treasury programme for November, Government proposes to sell at least, seven millions of Gold as follows: Thusday, Nov. 2—One Million. Thursday, Nov. 9—Two Millions. Thursday, Nov. 16—One Million. Wednesday, Nov. 22—Two Millions. Wednesday, Nov. 29—One Million. And to buy in five millions of Five-Twenties as follows: Wednesday, Nov. 1—One Million. Wednesday, Nov. 8—One Million. Wednesday, Nov. 15—One Million. Tuesday, Nov. 21—One Million. Tuesday, Nov. 28—One Million.

Gold has been moderately active, and less variable as to price. The supply available for immediate delivery has been increased by the outflow of coin-interest from the Treasury office. The customs drain has been less extensive; and the export movement, comparatively limited. The speculative call seemed rather more confident toward the close. The range of the price during the week, has been from 111⅝@112⅜, and the closing quotation on Wednesday was 112¼ against 111⅛ the preceding Wednesday. The specie outflow, last week, was $413,681; on Tuesday of this week, $45,000; and on Wednesday $92,000. The Gold Exchange Bank clearances have been as follows: Oct. 26, $43,723 000; Oct. 27, $47,535,000; Oct. 28. $34,489,000; Oct. 30, $32,842,000; Oct. 31, $29 211,000; Nov. 1, $91,342,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Oct. 28th, 1871, $69,945,308, against $72,013,267 same time in 1870.

The export drain of specie was $413,681 last week, against $303,562, same week preceding year. The shipments since January 1, 1871, have been $59,886,706, against $51,180 452 same time in 1870.

The customs demand for Gold last week, averaged $450 286 a day; thus far, this week, it has averaged $529,220 a day, or equal to a weekly aggregate of $3,175,320. The arrivals of

specie from Europe, Havana and other foreign ports since Jan. 1, 1871, have been $8,319,290 against $8,493,710 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $134,347,868 against $121,747,892 same time in 1870.

Foreign exchange has been held with a fair show of confidence, but has not been in urgent request. At the close rates were a fraction lower and the market dull. Bankers' sixty day bills on London closed on Wednesday at 108½@108⅝; sight bills on London, 109½@109⅝.

The produce exports from this port, week ending with Oct. 31, were to the currency value of $4,918,236.

Government securities have been in more general request at stronger prices, on a light offering of bonds. Washington advices of Wednesday reported the reduction of the public debt in September at $8,900,000. The Five-Twenties of 1862, 1864, and old issue of 1865 are now quoted ex the November three per cent. coupon.

On Wednesday, Government bought in one millions of Five-Twenties at 111 18@111 70 nett. The amount of bonds offered was $3,095,400 at from 111 18@112.

U. S. sixes of 1881 closed here on Wednesday of the current week at 116½@116¾; U. S. Five-Twenties of 1862, 111⅜@111½; U.S. Five-Twenties of 1864 at 111⅜@111⅜; U. S. Five-Twenties of 1865, 111¼@111½; U. S. Five-Twenties of 1865 consolidated, 113⅛@113⅜; U. S. Five-Twenties of 1867, 113⅜@113¾; U. S. Five-Twenties of 1868, 113½@113¾; U. S. Ten-forties at 109⅛@109⅜; U. S. Six per cent. currency bonds, 111¼@111½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 18.	Oct. 25.	Oct. 31.
Consols	93 1/16	93	93

" 10-40s	88 11/16	89⅜	89½
Erie	22¾	24	....

The new Funding Five per cent. Loan was quoted in London on Tuesday at 1¼ per cent. discount.

State bonds have been in fair demand and held with more firmness.

Railway bonds have been in better request and quoted stronger in the instances of the more popular of the old loans. Central Pacific Sixes closed buoyantly at 101½@102. The few bonds of this favorite loan offering in the open market are promptly taken at the full current rates. For the Chesapeake and Ohio Sixes, there is a good investment call at the established price of 93 per cent. and accrued interest. The November half-yearly three per cent. of coin interest on this loan is now being paid by the financial agents of the Company, Messrs. Fisk & Hatch. Of this Loan, but four out of fifteen millions remain to be marketed, the proceeds of which, with the cash on hand, will be ample for the completion of the entire line. On the eastern division of the road, 227 miles, from Richmond to the White Sulphur Springs, the earnings from way traffic alone, in the current year, will reach nearly $800,000. On the western division of 100 miles, from the Kanawha coal region to the Ohio River the rails are now being laid, and the transportation of coal from the Kanawha mines westward will be commenced in a short time, which will be a source of considerable income to the Company. Work is in steady progress on the middle division of about 100 miles, to establish the connection of the Eastern with the Western divisions, and to form the through line from the James to the Ohio Rivers. It is confidently expected that the entire line will be ready for through traffic by the Summer of 1872.

Railway and miscellaneous share property has been fairly active and generally quoted higher as to price though closing irregularly.

General business has been on a moderate scale in most kinds of domestic produce. Breadstuffs closed heavily. Provisions about steady. Middling upland cotton closed on Wednesday at 18⅜ cts. per lb. The receipts at all the ports, since Sept. 1, have been 417,464 bales, against 498,384 bales same time in the preceding year; exports 139,122 bales, against 148,456 bales in the previous year; stock at the ports at latest dates. 216,980 bales, against 283,846 bales same date 1870.

At the Live Stock Markets, Beeves have been in more demand at from 7½@13 cts.; Veals at 4@10 cts.; Sheep at 4¾@6¾ cts.; Lambs at 6¼@8 cts.; Swine, inactive 4⅞@5⅛ cts per lb., all live weight. The week's receipts were 6,236 Beeves, 1,319 Veal Calves, 26,134 Sheep and Lambs; and 54,089 Swine.

Foreign goods have been comparatively quiet, but prices have not varied materially. The week's imports of foreign goods reached $7,826,357, including $2,462,704 of dry goods.

Ocean freights have been moderately active but rates have been variable closing less buoyantly.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Louisville, Cincinnati and Lexington Short Line Railroad.

A contract has been entered into between the Chesapeake and Ohio Railroad Company and the Louisville, Cincinnati and Lexington Short Line Railroad Company, whereby the former company agrees to purchase all the private stock which may be offered in the latter company, within sixty days at sixty cents on the dollar, or at sixty five cents on the dollar on six, nine and twelve months' time; and the Short Line Company guarantees that a sufficient number of shares of such stock shall be offered to give the Chesapeake and Ohio Company complete control of the road. It will require about $300,000 in stock to fulfill this condition. The Short Line Company will also issue one million of new bonds, which the Chesapeake and Ohio Company will buy. The contract was executed on the 30th ult.

Extensive Steamship Building Contract.

The San Francisco (Cal.) *Bulletin* learns officially that the Pacific Mail Steamship Company have just closed contracts with the Harland and Hollingsworth Company, of Wilmington, Del., and Roach & Steers, of New York, for the construction of three iron propeller steamers, with compound engines, 400 nominal horse-power, and having capacity for 2,000 tons of cargo, besides their coal and stores. These steamers are intended to run between Aspinwall and New York, or between San Francisco and Panama, as may be required. The company are also about to contract for two iron propellers for the China line, with compound engines of 600 nominal horse-power and of 4,000 tons cargo capacity.

☞ The Calumet and Hecla Mining Company, of Lake Superior, makes a quarterly dividend of $5 per share on 60,000 shares, and an extra of 10,000 shares of stock (one new share to six old) with $5 per share cash on that. The Company has 10,000 shares of stock on hand, yet to be divided, making a total of 80,000 shares, the stock having bren "watered" from 40,000 shares. The success of this mine is very marked, going far ahead of the palmiest days of the Minnesota or Pittsburg, and giving promise of still farther improvement.

☞ The public debt of the United States has been reduced during the past month $8,905,491-84; and since March 1, 1869, $204,754,413 09. The total debt, principal and interest, now amounts to $2,361,051,842 81. The amount of coin in the Treasury now is $99,054,589 23; currency, $10,288,805 55—total, $109,338,394 78. Debt less cash in the Treasury, November 1, 1871, $2,251,713.448 03.

☞ An advertisement of interest to Bridge Builders will be found in our advertising columns.

Virginia Coal and Iron.

Mr. Greeley, who has paid strict attention to the prospects and profits of iron manufactures in this Country, makes this allusion in the *Tribune*, to the chances now presenting themselves along the line of the Chesapeake and Ohio Railroad:

The certain and speedy completion of the Chesapeake and Ohio Railroad, connecting by rail every important city of old Virginia, through the heart of West Virginia, with the valleys of the Kanawha, Ohio, and Mississippi gives a new value to the Mineral wealth of both the States traversed by that great work.

West Virginia, which embraces 16,000 of the 55,000 square miles of the great Allegheny coal-basin—the largest and among the richest known to exist in the world. Its center seems to be the valley of the Great Kanawha, the chief river of West Virginia, wherein Prof. Ansted reports nearly twenty workable seams of Coal, with an aggregate thickness of over seventy feet. Its horizontal position, proximity to the surface, and freedom from noxious gases, render it the easiest mined Coal in America. From this field the Coal is now dug which supplies New York and Philadelphia with gas. It has been computed that most of this area will yield 45,000 tons of Coal to the acre, or 28,800,000 tons to the square mile; much of it so disposed as to render pumping or lifting unnecessary. Immense quantities of it are now boated down the Kanawha and Ohio, finding markets all the way down to New-Orleans. Splint, Cannel, and every other variety of Bituminous Coal, are found in different parts of this vast field. The Splint is widely regarded as the best Coal known for smelting Iron from ore, which exists in great abundance all through both Virginias. It is probable that the valley of the Kanawha, when traversed by the Chesapeake and Ohio Railroad, and its branches, will be found one of our best localities for making good Pig Iron cheap; while the Cannel Coal yields sixty gallons of superior Petroleum to the ton, and has been, as it probably will again be, the surest and most profitable source of that valuable oil. The seams of Cannel Coal often show an aggregate thickness of fourteen feet, giving 21,000 tons to the acre, containing 1,260,000 gallons of crude oil. And fit timber for oil casks is nowhere else so abundant as in West Virginia.

Iron Ore is found in most of the counties of the two Virginias, and has been mined to profit in at least twenty of them; the James River Canal and most of the Virginia Railroads (laid with British rails) traverse or cross it, as the Chesapeake and Ohio either does or soon will. When the Chesapeake and Ohio and Norfolk and Great Western shall have been finished, the requisite branches and and connections will almost build themselves. When these roads shall have commenced freighting Ore to the coal-fields and Coal back to the ore-beds, Virginia may profitably supply half the seaboard and a third of the Ohio Valley with cheap and excellent Iron. The fact that the Chesapeake and Ohio Railroad had to be cut, for a considerable distance, through a vein of Coal eleven feet thick, will serve to convey some idea of the mineral wealth of the two Virginias. A new railroad from the Chesapeake and Ohio at the junction of the Greenbrier with the New River, forming the Great Kanawha, will run up the valley of New River, crossing the Virginia and Tennessee and the Norfolk and Great Western Roads, carrying the Coal of the Kanawha Valley to the great ore-beds of South-Western (old) Virginia, and incite unwonted beneficent activity in Iron-making therefrom.

In most counties of either Virginia, excellent Coal or Ore (often both in close proximity) can be bought at prices ranging from $5 to $50 per acre. Many of these acres have a rich, deep, virgin soil, with a splendid growth of forest trees covering two-thirds to three-fourths of them—lands which in Pennsylvania would be deemed dirt-cheap at $1,000 per acre. Who can doubt that Free Labor with Railroads will soon give a like value to the Mineral lands of old and of West Virginia.

OFFICE OF FISK & HATCH,

BANKERS AND FINANCIAL AGENTS

OF THE

CHESAPEAKE AND OHIO RAILROAD COMPANY,

No. 5 NASSAU ST., NEW YORK.

The rails are being laid on the Western Division of 100 miles of the Extension of this great East and West Trunk line, which in a short time will be ready for travel and traffic, and to commence the transportation of Kanawha coal to the Ohio River. The earnings of the Eastern Division of 227 miles, as a local road, awaiting the completion of the Middle Division of 100 miles, will reach, this year, nearly $800,000. The total cost of the entire road, and the large equipment required for its mineral and through traffic, will be fully $30,000,000.

The total amount of the FIRST MORTGAGE Bonds, which we are now selling, is FIFTEEN MILLION DOLLARS, of which only about four millions remain unsold, the proceeds of which, with the Cash on hand, will be ample for the completion of the entire line. The inducements they offer to investors are: A perfect security; great popularity and a high price when the road is finished; the same rate of interest as FIVE-TWENTIES; principal and interest both payable in United States gold coin in New York City; their present low price (93 and accrued interest) 20 per cent. less than Five-twenties, with equally certain payment of interest and principal.

We recommend them to our friends and customers with the same confidence which we have always recommended the UNITED STATES GOVERNMENT and the CENTRAL PACIFIC BONDS.

We continue to buy and sell CENTRAL PACIFIC BONDS, and fully expect they will, in time, reach the price of Five-twenty Bonds.

FISK & HATCH.

HARVEY FISK.

A. S. HATCH.

Cairo and Fulton Railroad.

We learn, upon what we deem good authority, that all differences between the conflicting interests in regard to the construction of this road, have been settled. To-day, or to-morrow, track-laying will commence on the second twenty miles of the road. Enough iron is here to complete the road to Little Red river. The second twenty miles, in order to save the land grant, have to be completed by the 20th of December.—*Ark. Gaz., Oct.* 24.

☞ The Helena (Arkansas) *Clarion* is informed by Col. Dorsey that the Central railway is all right. The company are closing a contract for an iron bridge for White river. The iron for the track will begin to arrive early in November.

☞ The Searcy (Ark.) *Record* learns that the Pennsylvania Railroad has put its shoulder to the wheel of the Cairo and Fulton railroad, with a view of making this the through line to the Pacific via the 32d parallel.

Journal of Railroad Law.

RAILROAD COMPANIES—A PERSON VOLUNTARILY EXPOSING HIMSELF TO SAVE ANOTHER'S LIFE NOT NECESSARILY GUILTY OF NEGLIGENCE.

The case of Ecker Administratrix, &c., *vs.* The Long Island Railroad Company (43 N. Y. 502,) was an action in the City Court of Brooklyn by the plaintiff as administratrix of her husband Henry Eckert, deceased, to recover damages for the death of the intestate, caused as alleged by the negligence of the defendant, its servants and agents, in the conduct and running of a train of cars over its road. The case, as made by the plaintiff, was, that the deceased received an injury from a locomotive engine of the defendant, which resulted in his death, on the 26th day of November, 1867, under the following circumstances:

He was standing in the afternoon of the day named, in conversation with another person about fifty feet from the defendant's track, in East New York, as a train of cars was coming in from Jamaica, at a rate of speed estimated by the plaintiff's witnesses of from twelve to twenty miles per hour. The plaintiff's witnesses heard no signal either from the whistle or the bell upon the engine. The engine was constructed to run either way without turning, and it was then running backward with the cow-catcher next the train it was drawing and nothing in front to remove obstacles from the track. The claim of the plaintiff was that the evidence authorized the jury to find that the speed of the train was improper and negligent in that particular place, it being a thickly populated neighborhood, and one of the stations of the road.

The evidence on the part of the plaintiff also showed that a child three or four years old was sitting or standing upon the track of the defendant's road as the train of cars was approaching, and was liable to be run over, if not removed; and the deceased seeing the danger of the child, ran to it, and seizing it, threw it clear of the track on the side opposite to that from which he came; but continuing across the track himself was struck by the step or some part of the locomotive or tender, thrown down, and received injuries from which he died the same night.

The evidence on the part of the defendant, tended to prove that the cars were being run at a very moderate speed, not over seven or eight miles per hour, that the signals required by law were given, and that the child was not on the track over which the cars were passing, but on a side track near the main track.

So far as there was any conflict of evidence or question of fact, the questions were submitted to the jury. At the close of the plaintiff's case, the counsel for the defendant moved for a non-suit upon the ground that it appeared that the deceased's negligence contributed to the injury, and the motion was denied and an exception taken. After the evidence was all in, the judge was requested by the counsel for the defendant to charge the jury in different forms, that if the deceased voluntarily placed himself in peril, from which he received the injury, to save the child, whether the child was or was not in danger, the plaintiff could not recover, and all the requests were refused and exceptions taken, and the question whether the negligence of the intestate contributed to the accident was submitted to the jury. The jury found a verdict for the plaintiff and the judgment entered thereon was affirmed, on appeal, by the Supreme Court, and from the later judgment the defendant has appealed to this court.

The following is the opinion of the court delivered by

Grover, J.—The important question in this case arises upon the exception taken by the defendant's counsel to the denial of his motion for a non-suit, made upon the ground that the negligence of the plaintiff's intestate contributed to the injury that caused his death. The evidence showed that the train was approaching in plain view of the deceased, and had he for his own purposes attempted to cross the track, or with a view to save property placed himself voluntarily in a position where he might have received an injury from a collision with the train, his conduct would have been grossly negligent, and no recovery could have been had for such injury. But the evidence further showed that there was a small child upon the track, who, if not rescued, must have been inevitably crushed by the rapidly approaching train. The deceased saw, and he owed a duty of important obligation to this child to rescue it from its extreme peril, if he could do so without incurring great danger to himself. Negligence implies some act of commission or omission wrongful in itself. Under the circumstances in which the deceased was placed, it was not wrongful in him to make every effort in his power to rescue the child, compatible with a reasonable regard for his own safety. It was his duty to exercise his judgment as to whether he could probably save the child without serious injury to himself. If, from the appearances, he believed that he could, it was not negligence to make an attempt so to do, although believing that possibly he might fail and receive an injury himself. He had no time for deliberation. He must act instantly, if at all, as a moment's delay would have been fatal to the child. The law has so high a regard for human life, that it will not impune negligence to an effort to preserve it, unless made under such circumstances as to constitute rashness in the judgment of prudent persons. For a person engaged in his ordinary affairs, or in the mere protection of property, knowingly and voluntarily to place himself in a position where he is liable to receive a serious injury, is negligence, which will preclude a recovery for an injury so received; but when the exposure is for the purpose of saving life, it is not wrongful, and therefore not negligent unless such as to be regarded either rash or reckless. The jury were warranted in finding the deceased free from negligence under the rule as above stated. The motion for a nonsuit was, therefore, properly denied. That the jury were warranted in finding the defendant guilty of negligence in running the train in the manner it was running, requires no discussion. None of the exceptions taken to the charge as given, or to the refusals to charge as requested, affect the right of recovery. Upon the principle above stated, the judgment appealed from must be affirmed with costs.

Church, Ch. J. Peckham and Rapallo J. J. concur.

The following is the dissenting opinion delivered by—

Allen, J.—The plaintiff's intestate was not placed in the peril from which he received the injury which resulted in his death, by any act or omission of duty of the defendants, its servants, or agents. He went upon the track of the defendant's road in front of an approaching train, voluntarily, in the exercise of his free will, and while in the full possession of all his faculties, and with capacity to judge of the danger. His action was the result of his own choice, and such choice not compulsory.

He was not compelled, or apparently compelled, to take any action to avoid a peril, and harm to himself, from the negligent or wrongful act of the defendant, or the agents in charge of the train. The plaintiff's rights are the same as those of the intestate would have been, had he survived the injury and brought the action, and must be tested by the same rules; and to him and consequently to the plaintiff, the maxim *Volenti non fit injuria* applies. It is a well established rule, that no one can maintain an action for a wrong, when he consents or contributes to the act which occasions his loss. One who with liberty of choice, and knowledge of the hazard of injury, places himself in a position of danger, does so at his own peril, and must take the consequences of his act. This rule has been applied to actions for torts as well as to actions upon contract, under almost every variety of circumstance.

Whenever there has been notice of the danger, and freedom of action, the injured party has been compelled to bear the consequences of the action irrespective of the character and degree of negligence of other parties—(Corwin *vs.* N.Y. and E R. R. Co. 3 Ker. 42). The doctrine applicable to voluntary payments of money not recoverable by law grows out of this rule of law, and rules governing in cases of contributing negligence of the injured party is nearly allied to, if not an outgrowth of the maxim *volenti non fit injuria*.

Whether the defendant was or was not guilty of negligence, or whatever the character and degree of the culpability of the defendant and its servants is not material. The testator had full view of the train and saw, or could have seen, the manner in which it was made up, and the locomotive attached, and the speed at which it was approaching, and, if in the exercise of his free will, he chose for any purpose to attempt the crossing of the track, he must take the consequence of his act. The defendant may have been running the train improperly, and perchance illegally, and so as to create a legal liability in respect to any one sustaining loss solely from such cause, but the company is not the insurer of or liable to those who, of their own choice and with full notice, place themselves in the path of the train and are injured.

It is not the law that the co-operating act of the injured party must be culpable or wrong in attention. It may be merely negligence or the result of the will. (Per Beardsley, J., Tonawanda R.R. Co., *vs.* Munger, 5 Denio, 255.) The rescue of the child from apparent imminent danger was a praiseworthy act and entitled the plaintiff to the favorable consideration of the court and to a lenient and liberal interpretation and application of the rules of law in her behalf. But the principles of law cannot yield to particular cases.

The act of the intestate in attempting to save the child was lawful as well as meritorious, and he was not a trespasser upon the property of the defendant, but it was not in the performance of any duty imposed by law, or growing out of his relation to the child, or the result of any necessity. There is nothing to relieve it from the character of a voluntary act, the performance of a self-imposed duty, with full knowledge and apprehension of the risk incurred. Evansville R. R. Co. vs. Hyatt (17 Ind. 102), is in circumstance somewhat like the case before us, and the decision is in accord with the views herein expressed.

I am of the opinion that the judgment of the Supreme Court and of the City Court of Brooklyn should be reversed and new trial granted, costs to abide event.

Folger J. concurred in the foregoing opinion.

Judgment affirmed.

Commerce of New York.

The foreign imports at New York for the month of September, 1870 and 1871, are officially stated as follows:

	1870.	1871.
Entered for consumpt'n.	$17,745,075	$21,432,482
Do. for warehousing....	7,748,840	8,869,861
Free goods.....	1,409,353	2,708,238
Specie and bullion.....	592,496	331,679
Total entered at port...	$27,495,764	$33,342,255
Withdrawn fr. wareh'use	10,732,135	12,889,575

The foreign imports at New York for the nine months from January 1, were:

	1870.	1871.
Entered for consumpt'n.	$129,923,147	$165,096,546
Do. for warehousing...	93,186,652	111,353,165
Free goods.....	9,980,838	22,584,178
Specie and bullion.....	8,381,171	5,586,766
Total entered at port...	$241,421,808	$304,620,655
Withdrawn fr. wareh'se	90,985,835	98,625,022

The revenue from customs at New York for nine months from January 1, has been as follows:

	1870.	1871.
Six months.....	$67,581,811 10	$73 692,107 93
In July.....	10,592,841 87	11,934,957 33
August.....	15,078,512 90	16,932 839 65
September.....	14,182,516 12	15,733.891 86
Nine months...	$107,435,681 49	$118 293,796 77

The exports from New York to foreign ports in the month of September, were:

	1870.	1871.
Domestic produce.....	$15,157,390	$20,100,569
Foreign free goods.....	11,451	193,707
Do. dutiable.....	923,627	569.026

Specie and bullion....	48,927,983	57,619,924
Total exports.....	$183,460,634	$230,925,303
Do. exclusive of specie.	134,532,651	173,305,439

☞ The Pine Bluff (Ark.) *Republican* says that a contract has been executed, in the sum of $2,000,000, providing for the immediate construction of the Pine Bluff branch of the Memphis and Little Rock railroad.

Plans of the Chesapeake and Ohio Railroad.

Two general routes have been proposed for the western connection of the Chesapeake and Ohio Railroad. The Virginia portion of that railroad terminates at Huntington, Va., a place that is situated on the Ohio river, opposite the mouth of Symmes creek, in Lawrence county. The first route, called the river route, runs through the counties of Lawrence, Scioto, Adams, Brown and Clermont, to Cincinnati. The second has been known as the Hillsboro' route. Starting from the mouth of Symmes creek, it proceeds through Lawrence, Jackson, Pike, and Highland counties to Hillsboro'. From this place it separates into two main stems, the one running through Clinton, Warren and Montgomery counties to Dayton, and the other over a route not yet surveyed through Clermont county to Cincinnati.

The contest waged between the friends of these two routes has been earnest and prolonged. The friends of the Hillsboro' route were led by Colonel W. H. Trimble, of Hillsboro', and it is to his exertions, in large measure, that a liberal and reasonable proposition has at last been made by the President of the Chesapeake and Ohio Railroad looking to the construction of the western connection of the road through Hillsboro'.

That proposition comes in the form of a letter dated the 29th instant, and promises the building of the road on condition that the right of way be secured from Symmes creek to Dayton, and of *bona fide* subscriptions to the amount of $850,000.

The distance from Symmes creek to Hillsboro' is about one hundred miles, and the right of way along this part of the route has been almost wholly secured. From Hillsboro' to Dayton is about fifty miles, and the distance from Hillsboro' to Cincinnati is about the same. One hundred miles of the route, therefore, is common to the two cities. The country through which this portion of the line passes is very rich, both in coal and minerals, and also in timber and building stone. The heaviest grade is thirty feet to the mile. The entire cost of construction of the road bed from Dayton to Symmes creek is estimated at $2,252,140, this being the amount needed to prepare the road for the ties.

The entire cost of building and equipping the road is estimated at about $4,000,000. Of this amount, it will be seen, the people living along the line of the road are asked to raise less than one-fourth, the other three fourths of the stock being taken by the Chesapeake and Ohio Railroad Company. The amount that Highland county will be called upon to contribute is $175,000.

That the road will pay admits of little doubt. Men who are pressing a project in Kentucky are calculating on $10,000 a mile annually from local receipts. The country through which this road is to run is more populous and richer in resources than that through which the Frankfort, Paris and Big Sandy is to be constructed.—*Balt. Am. Oct.* 30

Wooden Railroad in Canada.

A wooden railroad is being constructed from the town of Sorel, at the confluence of the Richelieu river with the St. Lawrence, through Drummondville, to Arthabaska, Province of Quebec, by Mr. L. A. Senecal, contractor. The Montreal *Herald* gives a long account of a recent trip on the line. Upward of 2,000 men were at work, and the rails were laid on a large portion of the road. An experimental trip was made, the train going at the rate of 25 miles per hour, and running with remarkable smoothness. The journal quoted furnishes the following particulars:

The ties, which are of Hemlock and tamarac, are brought down on trucks from the woods through which the road runs; they are put on a rollway, run up to most ingenius circular saws, so gauged that at one operation they are mortised the proper depth and distance, not the difference of a hair breadth being found between one and another. As fast as they are cut the ties are rolled over to a different siding from that on which they are received, an ordinary circular saw sides them, and they are loaded up to be run out to the piles where they are wanted. The wedges for laying up the rails are also prepared here. The rails are of maple, 4 by 7 inches, and 14 feet long, the gauge of the line being 4 feet 8½ inches. The cost of the line, in which cost are included stations (9 in number), car and locomotive depot, engine and repairing shops, engine and tender, 2 passenger cars, 8 grain cars, and 25 wood cars, is $5,000 a mile, in full for all but the Yamaska bridge, which cost $35,000. It should be mentioned that land damages, fences, e c, are included, also, in this amount.

Central Railroad of New Jersey.

Mr. John Taylor Johnston, the president of the Central Railroad of New Jersey, has issued a circular in which he announces a return to quarterly dividends of 2½ per cent. The company's receipts for 1871 up to the 1st of October were $4 801,869, a profit of $2,167,530. More than half the receipts were from coal, viz.: coal, $2,640.443; merchandise, $1 146,051; passengers, $952,984. The cost of the entire road has been $10,784,000. It is now doubled tracked from Somerville to Jersey City, and the laying of two more tracks will soon be commenced. The whole line is now being laid with steel rails. The equipment of the entire line of 180 miles with the branches in Pennsylvania and New Jersey, has cost $6,8 0.000. The stock of the company will be increased by the issue of $5,000,000 in scrip, convertible into new stock as soon as legislative authority for the issue shall have been procured.

Norfolk and Great Western Railroad.

The stockholders of this road met in Danville on Thursday, and the President, Colonel Flournoy, presented his report, covering a contract with competent parties in New York, and through them with parties in London, for the building of the road. The work is to commence at Danville, going west, by December 1st, 1871, and on the eastern division as soon as subscription on that division reaches $3,000,000. The subscription on that division now reaches $1 400.000. One million six hundred thousand dollars is to be raised by Norfolk, Portsmouth, &c. The contractors provide to pay off all debts of the company, and to receive county subscriptions at par—securities to be paid to the contractors as the work progresses, and the road is not to be turned over to them until one-half is constructed. The contract was ratified by the stockholders, and Col. Flournoy was unanimously re-elected.—*Lynchburg (Va.) News.*

Michigan Air Line Railroad.

At a meeting of the stockholders of this Company at Jackson, Mich., on the 28d ult., the following gentlemen were elected directors for the ensuing year: J. E. Young, Wm. Young, Chicago; R. W. Landon, Niles; J. F. Wolff, Centreville; J. C. Leonard, Union City; G. H. French, Homer; J. B. Eaton, M. M. McNaughton, Eugene Pringle, S. O Knapp, Jackson; J. H. Hubbard, Waterloo; C. W. Hayes, Pinckney; Harvey Mellen, Romeo. At a meeting of the directors held subsequently, the following officers were chosen; President, J. B. Eaton, Jackson; Secretary, E. Bancker, Jackson; Treasurer, W. D. Thompson, Jackson; Attorney, G. H. Mason, Centreville; Managing Director, M. M. McNaughton; Superintendent of the Eastern Division, T. J. Conely.

☞ A party of surveyors, under Chief Engineer Greene, of Troy, are engaged in making the preliminary survey, and fixing the approximate location of the Waloomsac Railroad.

Western Maryland Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 18th ult. Col. A. Shriver of Frederick, presided, with D. Preston Parr secretary. Mr. George M. Bokee, as president of the road, submitted the annual report, showing the condition of the road and its finances. The report says:

At the commencement of this administration the pay-rolls of the employees were some four months in arrears; they have been regularly paid up monthly for nearly a year past. The second mortgage bonds of the company have risen about fifty per cent. in price in the same time, though yet non-interest paying. The suspended and floating debts of the company have been reduced three-fifths, and the balance drawn into a definite condition, and can be estimated exactly. There is cash and equivalents on hand to an amount sufficient to pay all the regular open accounts, the bills payable, and a large part of the suspended debt of the company. There has been paid in the same time a considerable sum of coupon interest, while the bonded debt and overdue coupons are in a much more compact and satisfactory condition. And the general indications of increased prosperity, showing a gross revenue of $170,929 01, and expenditure of $122,647 18, and a net revenue of $48,281 83, being an increase of $33,001 41 over the preceding year as set forth in the report of the superintendent, John T. Rigney, Esq., are matters of cordial congratulation. While the increase in net revenue since the opening of the road to Mechanicstown has not fully met our anticipations, yet the evidences are sufficient to enable us to indulge the hope and expectation that the time is rapidly approaching when the Western Maryland railroad, necessarily enriching the country through which it passes, will satisfactorily compensate its stockholders and prove one of the most important aids to the prosperity and greatness of the city of Baltimore.

The reports of finance committee and engineer give full and detailed accounts of their operations. It is a matter of unanimous regret that alterations deemed necessary, excessive demands for right of way, and other causes have prevented the realization of sufficient means from the last endorsements of the city to complete the road beyond Hagerstown, thus leaving the extension to Williamsport unprovided for.

Heartily coinciding in the views advanced by the chief engineer in his interesting report with reference to the importance of Williamsport as a terminus of our road until its further extension to the coal fields can be accomplished, we respectfully urge the adoption of measures for the attainment of requisite means to insure the immediate commencement and early completion of that short and inexpensive, but necessary line, to enable us to transport the bituminous coal to tidewater at Canton.

Since our last annual report the work of construction has steadily progressed, enabling the company to extend the regular running of trains to Rocky Ridge on the 16th of November, 1870, to Mechanicstown on the 28th of December, 1870, and to Sabillasville on the 28th of August, 1871. The substitution of a substantial bridge instead of contemplated trestling over Owing's creek, on section 16, necessitated considerable extra graduation and masonry, and delayed the completion to Sabillasville. Almost insurmountable difficulties have been overcome in the removal of the hard, solid copper rock encountered by the contractor in his progress through the rock cuts approaching Blue Ridge or Monterey Summit, but ere the day of your annual meeting the last obstruction will have yielded to the persevering energy of the laborer, and the tracklayers will have passed through on their way over a completely graded roadbed to Pikesville or Waynesboro' Station, Smithburg, Cavetown, Chewsville and Hagerstown, which latter place, under a continuance of God's blessings, can be reached by the close of the present year.

The graduation and masonry upon the Owing's Mills division, between Baltimore and Owing's Mills, is rapidly and satisfactorily progressing, a large force of men being employed, particularly upon those portions which require the longest time for completion. An energetic contractor, Mr. John Donoghue, is now actively engaged in grading the entire line of the Emmittsburg railroad from its junction with our road at Rock Ridge to Emmittsburg, and hopes to complete his work within the present year.

The Frederick and Pennsylvania railroad is in operation from Hanover, Pennsylvania, to Taneytown, Maryland, leaving but a few miles of unfinished road from that place to its contemplated crossing of and connection with our road. On the south side a junction with us has been formed, and track is being laid toward Woodsboro' and Frederick. This road, when completed, will doubtless be an important feeder to the Western Maryland, and largely augment its revenue.

At the solicitation of citizens of Pikesville, Pennsylvania, we have established a station on section 26, and workmen are now engaged in the erection of a substantial warehouse for freight and suitable accommodations for passengers. Fully alive to the advantages to be derived from proper railroad facilities, the public spirited citizens of that section of country are now constructing an excellent road, about one and a half miles in length, ascending the mountain at an easy grade, which will connect with the turnpike leading to Washington, reducing the distance to less than five miles from that place to our station, and enable us to reap a large share of the substantial benefits from that rich and prosperous agricultural region which has so long desired railroad communication with its natural market, the city of Baltimore.

Heads of departments and employees generally are deservedly entitled to much praise for the energy and care exercised in the performance of their various duties, as evidenced by the largely increased net revenue, regularity in running trains at increased rate of speed, close connections at the Relay House, and almost total freedom from accident. Their capacity and fitness for railroad business cannot be excelled.

After the reading of the report, Hon. J. K. Longwell, of Carroll county, Hon. Joshua Biggs, of Frederick county, Isaac Motter, John Welty and Geo. W. Harris, of Washington county, were elected directors of the company for the ensuing year. At a meeting of the directors held immediately after the adjournment of the stockholders, Hon. Robert T. Banks, Mayor, was elected President.

Improvements in Canal Navigation.

The action of the Legislature in offering $100,000, for the best plan for carrying freight expeditiously and cheap on the canals is calling out many competitors and a large number of plans have already been submitted, while others are being completed. Many of them must of necessity fail of meeting the required object, while there may be several, and, no doubt, will be some which will prove really of substantial benefit. Among these plans all are ingenious, while some apply power in a manner very singular if not altogether new. One thing seems to be clear, and that is that ere long navigation on the canals will be wholly propelled by steam, and that, too, in such a manner as not only to quicken transportation but cheapen freights.

Among the many plans submitted is one which we understand has already been successful in Belgium—that of propelling a boat by means of a wire cable in the bottom of the canal, which runs over a wheel attached to the side of the boat—this wheel being turned by an engine in the boat. For this purpose an engine has been constructed in Belgium of some fifty or sixty horse power, and brought to Buffalo in this State, where a number or capitalists interested in this matter throughout the State have had a boat construction under the supervision of one of their number, Captain Baldwin. This boat has been completed and tested in Buffalo, and the intention now is to proceed to Troy, where it is to be tested by means of a cable six miles long. This cable is a rope of wire one inch in diameter, which it is claimed is strong enough for the purpose.

The boat—which, by the way, is appropriately named the Governor Clinton—left Buffalo on Sunday morning, at seven o'clock, and, with six hours and a half detention, reached this city yesterday at a quarter-past four. She was light, however, not being intended to carry freight. She was propelled by a screw, there being no cable, of course, in the canal. Our reporter paid her a visit, and found a neat little craft, with a rudder at each end, so as to run either way without turning. The screw is intended to be used only in turning bends in the canal, should the plan succeed. An examination of the engine showed it to be one of peculiar construction, but comprising a great deal of utility within a very small space. This engine is connected by a shaft to an immense wheel on the left side of the boat, over which the cable is to run in a groove, being held in its place by smaller wheels and running at the bow and stern of the boat over other wheels to prevent rubbing against the boat. It is claimed that this steamer will tow from fifteen to twenty heavily loaded boats at the rate of at least three miles an hour, and consume only eight or ten tons of coal in running from Buffalo to Albany. The idea is to have these boats stationed at intervals along the canal, and each one tow all the boats which run over that section, thus avoiding the necessity of passing each other.—*Syracuse Courier, Oct.* 25.

☞ The Milwaukee *Wisconsin* says that Mr. D. McKenzie, who has been engaged on the Northern Pacific surveys, will start in a few days with a party to run a line from St. Cloud to Litchfield, and perhaps to the Minnesota river. The work will be done under the the auspices of the St. Cloud and Minneapolis Railroad Company. The beginning of actual work on the St. Cloud and Mankato Railroad at an early day is no longer questionable.

Chesapeake & Ohio Railroad.

NOTICE TO BRIDGE BUILDERS.

SEALED PROPOSALS will be received by the undersigned at Richmond, Va., until 12 M., Dec. 6, 1871, for about 2,000 feet of IRON BRIDGING, in spans of from 20 to 180 feet.

Proposals for any part or for all will be received.

These bridges are for the extension from White Sulphur Springs to Millers Ferry on New River, West Va.

Circulars containing a description of the spans, etc., can be had from

New York Saturday, November 11, 1871.

Boston and Albany Railroad.

A special meeting of the stockholders of this corporation was held in Boston on the 2d inst., to consider the subject of authorizing an issue of bonds to meet the requirements of the corporation.

The meeting was called to order by the president, Chester W. Chapin, Esq., of Springfield. J. A. Rumrill, Esq., secretary and clerk of the corporation, read the call for the meeting, after which Mr. Chapin announced that after a consultation the directors had decided as follows:

Gentlemen.—We have called you together to consult upon the best means of raising funds to meet the large outlays rendered necessary by the increasing demands of our business. The experience of each year is demonstrating to us that the amount of business which we are to do is dependent to a large extent upon the facilities which we afford for its transaction. It is equally apparent that these facilities can only be increased by very liberal expenditures of money in permanent improvements and additions to our property. Under the laws of our State which have always prevailed up to the present time, and which we had reason to believe had settled the policy of legislation in regard to this subject, we should have had no question as to the proper course for us to pursue at this time.

The action of the last legislature, however, by depriving the owners of a railroad property of the right to assess themselves at the par value of their stock for the improvement and development of their property, has made it necessary for us to inquire what other means are within our reach for raising the necessary funds. We find that under the existing laws of the Commonwealth two ways are now open to us, first, by a sale of our stock at public auction, and, second, by an issue of bonds. If it was entirely clear that the first method, viz., the sale of stock at auction, was the wisest, it would not have been necessary to ask for further action of the stockholders, as the board of directors are already authorized by your votes to make such issues of stock as they may deem expedient. The number of shares of stock which we might issue is dependent upon certain conditions, which it is not possible for us to comply with at present, and we should soon fail to raise from this source a sufficient supply of funds to carry on our work of improvement; besides, an issue of stock to so large an amount as will be soon required in the manner now provided by law, could not fail of depreciating to a considerable extent the market value of our shares.

The directors have felt some hesitation in adopting a policy which would lead to such a result. The law authorizing an issue of bonds requires the action of the stockholders in order to legalize such issue. Under this law we are authorized to issue twenty-year bonds to the amount of the capital stock paid in at a rate of interest not to exceed seven per cent. We shall require within a short time, to meet expenditures now incurring for permanent improvements, about $2,000,000, and for the prosecution of other large works in contemplation, as the Worcester Union depot, the depot and bridge at Springfield, and further depot accommodations at Boston, and new engine house, shops and yard-room at Albany, we shall need large additional sums of money.

In the present condition of the money market it has been thought that a bond running at anything less than 7 per cent. would not be taken at its par value, and the directors, at their meeting held yesterday, voted to recommend to the stockholders an issue of 7 per cent. twenty year bonds to the amount of five millions of dollars. This action of the board was taken upon the assumption that as between the two methods of raising money now within our reach, viz., by a sale of stock at public auction or by an issue of bonds, the latter was the one which you would be likely to approve. If you think otherwise, however and believe it would be better to make an issue of stock, to be sold as provided by law, rather than make a new bonded debt, and thus create a lien against the property prior to your own, the directors are ready to carry out your views. It is to consider these two propositions and determine what, in view of the circumstances of the case, is the wisest course for us to pursue, that we have called you together, and the matter is now in your hands.

The gross receipts of the corporation last year amounted to eight millions of dollars; they have added two new locomotives to the rolling stock since the 1st of October, and will soon add four more. There is great necessity for additional storage accommodations, not less than 9,000 tons of freight being now in the cars waiting for shipment, and there are no vessels to take it away. Increased connections with western roads had introduced a new business, viz.: the transportation of grain, 4,557,700 bushels of which were carried by the road last year.

Mr. George O. Crocker of New Bedford offered the following resolution:

Voted, That the directors be authorized to issue bonds, to an amount not exceeding $5,000,000, at such time and in such manner as they may think best for the interest of the corporation; provided that the rate of interest shall not exceed seven per cent. per annum, and payable in not more than twenty years, and not to be issued at less than par.

Jonathan Bourne, jr., of New Bedford moved to amend the motion by making the principal and interest payable in gold.

Mr. Chapin stated that the directors felt confident of their ability to find a market for the bonds on a currency basis, and that it would be inexpedient to limit the sale to any but the open market.

Mr. Edward L. Davis of Worcester opposed the amendment, contending that the credit of the Boston and Albany Railroad corporation was sufficient to insure the sale of the bonds on a currency basis, and that if made payable in gold they would unquestionably command a premium, which was not provided for in the original motion.

Hon. Moses Kimball spoke in opposition to the amendment, and urged that the matter should be left to the directors, who ought to be untrammeled. As the representative railroad of Massachusetts the Boston and Albany ought to set an example against gold gambling, and not to do as many western roads had done, encourage it by the issue of gold-bearing bonds.

Mr. Bourne then withdrew his amendment,

whereupon the resolution of Mr. Crocker was adopted unanimously.

A motion was made providing that the stockholders should have the privilege of taking one bond for every ten shares of stock held by them, but this was voted down and the meeting adjourned.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JULY 31, 1871.

The receipts on capital account during the half-year to July 31, 1871, amounted to £265,572, as follows: Five per cent. preference stock arrears, third instalment £842, five per cent. preference stock in anticipation of future instalment £7,181, new 6 per cent. bonds, balance of £760,000 issued £257,550, total £265,572. The total receipts on capital account amounted, on July 31, to £6,401,308. The outlay on capital account during the half-year amounts to £121,609, of which £97,153 has been expended on account of the Glencoe line—£4,892 on Brantford branch—£14,982 for 100 new blue line cars, being additional stock; and the remaining expenditure includes cost of Miller's patent platform and couplers to passenger cars—3¼ miles of additional sidings at various parts of the line—raising remainder of overhead bridges to height of 18 feet above the level of track, &c., the details of which are shown in the engineers'and mechanical superintendents' reports. The total expenditure to July amounted to £5,701,153, leaving a balance unexpended of £703,-155 at the credit of capital account. The receipts and expenditure on revenue account for the half-year have been as follows:

Gross receipts		£458,891
Working expenses, including renewals and all charges		268,276
		£190,615
From which is deducted—		
Interest on bonds (less interest received)	£39,930	
Discount and charges on conversion of American funds	20 731	
Loss on working the Erie and Niagara and the Wellington, Grey, and Bruce railways	345	
Amount set aside for renewal of ferry steamers	2,000	
Alteration of gauge account—proportion charged this half-year	9,100	
Amount paid for repairs and compensation Nith river bridge accident account	5,895	
	78,050	
	£112,564	
Add profit on working Galt and Guelph Railway	£710	
Balance from last half-year	3,781	
	4,500	
Available for dividend		£117,064

The dividend for the half-year on the 5 per cent. preference stock amounts to £16,543, leaving a balance of £100,521. From this balance the Directors recommend the payment of a dividend for the half-year on the ordinary shares at the rate of 5½ per cent. per annum, payable in London on 31st October, which will absorb £95,-674, and leave a balance of £4,847 to be carried forward to the next half-year. The renewal fund for the ferry steamers amounts to £24,272. The discount and charges on the conversion of American currency for the half-year amounted to £20,-731, as compared with £25,282 in the corresponding half-year. The average rate of conversion was 111¼ as compared with 114¼ in the corresponding half-year. The average price of gold during the half-year was 111¼. The amount of assets in American funds at 31st July, was $348,-022 41, as compared with $322,584 69 at the commencement of the half-year. The following table exhibits the receipts and expenses for seven corresponding half-years:

RECEIPTS.

Half-year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
July, 1865	139,821	144,028	716	284 565
July, 1866	172,731	169,576	854	343,162
July, 1867	165,365	199,221	1,116	365,704
July, 1868	155,082	200,619	948	356,649
July, 1869	157,930	226,200	937	385,066
July, 1870	153,863	254,230	807	408,900
July, 1871	158,084	300,000	747	458,891

EXPENSES.

Half-year ending	Including renewals. £	Per cent of gross receipts.
July, 1865	158,803	55 81
July, 1866	175,747	51.21
July, 1867	182,769	49.98
July, 1868	208,462	58.45
July, 1869	232,768	60.45
July, 1870	251,824	61.58
July, 1871	268,276	58 48

The following is a summary of the revenue results of the past half-year, compared with the corresponding period (including Galt and Guelph traffic):

Passenger traffic—	1871.	1870.
Local	$366,291 31	$321,449 16
Through	358,586 26	380,012 81
Total	$724,877 57	$701,461 97
Freight traffic—		
Local	$481,754 22	$524,890 62
Through	988,027 01	721,896 18
Total	$1,469,781 23	$1,246,786 75
Excess baggage, mails and express freight	55,921 06	55,263 32
Total traffic earnings	$2,250,579 86	$2,003,512 04

The aggregate traffic receipts (exclusive of Galt and Guelph), compared with the corresponding half-year, exhibit a gross increase of £50,050, as follows:

Increase in way passenger traffic		£8 497
" through freight and live stock		54,684
		£63,181
Decrease in way freight and live stock	£8,437	
Decrease in through passengers traffic and emigrants	4,403	
Decrease in mails and express fr'ght	291	
	13,131	
		£50,050

The increase in working expenses amounts to £16,452. The analysis of traffic receipts during the half-year gives the following results:

	1871. Cents.	1870. Cents.
Passenger earnings per mile—		
Receipts per way passenger	2.906	2.778
" through passenger	2.321	2.321
Freight earnings per mile—		
Receipts per ton way freight	3.141	3.165
" through freight	1.323	1.368

The cost of ordinary working expenses per train mile for seven corresponding half-years is as follows:

	Sterling.
July 31, 1865	5 0¾
July 31, 1866	4 9
July 31, 1867	4 2½
July 31, 1868	4 8¾
July 31, 1869	4 8
July 31, 1870	4 7
July 31, 1871	4 5

The condition of the roadway continues good, and trains are run with great regularity. The result of the use of steel rails has been satisfactory, and it has been decided to replace gradually the whole of the iron rails in the main track with steel rails as they require renewal. The very heavy traffic now passing over the main line renders it absolutely necessary to keep the line in a state of the highest efficiency. Every railway forming a part of the great through route between Chicago and New York is required to make punctual train connections, or the operation of the whole line of 1,000 miles would become disorganised. The policy of adjusting the Company's system of 350 miles of railway to the 4f. 8½in. gauge has now been entirely carried out, and the car stock is being altered to that gauge as fast as possible. It is considered advisable for the present to continue the 5ft. 6in. gauge (by a triple line of rails) upon the 76 miles between Hamilton and London, until some disposition can be made of those broad gauge engines which cannot be altered to narrow gauge. Careful estimates have been framed of the cost of altering the gauge, including engineering charges, conversion of the rolling stock, and providing additional narrow gauge locomotives, to replace such of those built on the broad gauge as cannot be converted. The balance of this account is estimated to amount to £91,000, which, as stated in the report of last year, it is proposed to charge to revenue, extended over a period of five years. One-tenth, or £9,100, has been charged against net revenue in the present half-year's accounts. The two years' agreement with the Michigan Central Railroad Company has been found to work well, but as it terminates on 31st December, 1871, a new agreement for ten years has been concluded, by which the through earnings of both Companies are to be divided annually upon the percentage of through traffic actually earned by each Company in the year immediately preceding. Among the new lines of railway now being constructed across the state of Michigan are some which will prove to be valuable connections to the Great Western railway. The Detroit, Hillsdale, and Indiana railroad is completed from Ypsilanti, (on the line of the Michigan Central railway) to Hillsdale—60 miles. The Detroit, Eel River, and Illinois railroad is an extension of the above as far as Logansport. The Port Huron and Lake Michigan railroad is approaching completion, being opened to Lapeer, 46 miles from Port Huron. Agreements have been entered into with the above Companies, whereby all their through traffic is secured to the Great Western railway. The Wellington, Grey, and Bruce railway has been opened for 23¼ miles during the half-year and has yielded an increase in the Great Western traffic of £5,098. The line to Harriston—27 miles additional—will be opened in time for the winter's business, and will increase the amount of traffic interchanged with that Company at Guelph. The partial failure of the grain crop last season in Canada seriously affected the earnings; the total number of bushels of grain carried locally having been £556,677, against 1,-302,031, and of flour 107,527 barrels, against 169,-380 in the corresponding period. It is satisfactory, however, to state that the crops which have just been secured are excellent, both in quality and quantity. During the past half-year two members of the board, along with the secretary, visited Canada, to make an inspection of the Company's property. Whilst in the province they rendered very valuable assistance in the discussion of, and the disposal of, various important questions then pending, especially the matter of establishing good relations with surrounding Companies. The receipts and expenditure of the Detroit and Milwaukee railroad have been as follows, for the half-year ending 30th June, 1871.

Gross earnings		£138,782
Working expenses, taxes, &c	£95,791	
Interest on bonds, &c.	40,302	
	136,093	
Balance		£2,689

The short crops in Michigan last year very much

affected the traffic of this line, but the result of the last harvest has been more satisfactory, and the earnings already show an increase over the corresponding period for 12 weeks since July 1 of £10,040. The following members of the board of Directors go out of office, viz :—Mr. John Fildes, Mr. P. Margetson, Mr. E. H. Green, and the Hon John Carling, who are eligible and offer themselves for re-election. The traffic returns since the commencement of the current half-year are encouraging, and present an increase of £36 866 in ten weeks. From present indications there is reason to expect that the amount of produce to be forwarded to the eastern markets during the autumn and winter, will be limited only by the capacity of the railways to carry it.

By order of the Board,
THOMAS DAKIN, President.

London, October 4, 1871.

Fitchburg Railroad.

A special meeting of the stockholders of this Company was held in Boston on the 3d inst., to see :

First—If the stockholders will authorize the directors to unite with the Worcester and Nashua Railroad Company in taking a lease of the contemplated Lancaster Railroad under statutes of 1871, chapter 180.

Second—To see if the stockholders will authorize the directors to locate and construct a branch railroad, with one or more tracks, commencing at some convenient point on the Fitchburg Railroad in or near the town of Concord, and thence running to some point on the Lancaster and Sterling Branch Railroad in the town of Stow, under statutes of 1870, chapter 246.

The meeting was called to order by President Stearns, who read the call, and the statute under which it was proposed to act. He proceeded to give a history of the contemplated Lancaster Railroad, and stated that the Directors of the Fitchburg Railroad were of the opinion that the connection should be made at Hudson with the Lancaster and Sterling Railroad. The parties holding the charter were ready to construct the road if the Fitchburg Company would lease it at the rate of six per cent. per annum.

Mr. E. H. Derby offered the following vote :

Voted, that the Directors be and are hereby authorized to unite with the Worcester and Nashua Railroad Company in taking a lease of the contemplated Lancaster Railroad under Statutes of 1871, Chapter 130.

Mr. Derby sustained his motion by a statement of the demands of the section of country through which the contemplated road will pass, and the great increase of business which would flow from its construction.

No objections were offered, and the resolution of Mr. Derby was unanimously adopted.

Mr. Alvah Crocker of Fitchburg offered the following motion :

Voted, That the stockholders authorize and empower the Directors to locate and construct a branch railroad with one or more tracks, commencing at some convenient point on the Fitchburg Railroad in or near the town of Concord, and thence running to some point on the Lancaster and Sterling Branch Railroad in the town of Stow, as constituted at the time of the passage of the Enabling Act, under Chapter 246 of the Acts of 1870.

Mr. Crocker set forth various reasons for the adoption of his motion. The case was so clear that he did not think it necessary to trespass upon the time of the meeting. The construction of this piece of road would shorten the distance to Boston, and conserve the interests of the strongest ally of the Fitchburg Railroad, the Worcester and Nashua Railroad, and of the people of the several towns through which the road passes. He agreed with Mr. Derby that the contemplated action of the company should have been taken long ago, and ought to be taken now before other parties should occupy the ground. The population of the towns to be affected by this measure was given as follows : Hudson, 3385, Marlboro' 8500, Sudbury 2, 100, Lancaster 1900, Berlin 1000, Bolton 1000 and Clinton 5500.

After a slight alteration in the motion to meet the change in the boundary line of Maynard, the resolution was adopted by a unanimous vote, and the meeting adjourned. The Lancaster Railroad which will be about eight miles long, will cost about $240,000, and the connecting link between Concord and Stow, four miles in length, will cost between $75,000 and $100,000.

Atlantic and Great Western Railroad.

To the Bond, Debenture, and Shareholders :

I have now pleasure to advise the present position of the proceedings for the reorganization of this company.

The trustees for foreclosure obtained possession of the line on 7th September, taking over the property and revenues as from 1st September, and proceeded to organise the several State corporations. The Pennsylvania division was constituted on 26th September, Daniel Dougherty, Esq., of Philadelphia, being elected president; the New York division was constituted on 29th September, with W. Butler Duncan, Esq., as president; and the Ohio division was constituted about the 16th inst., with the Hon. Geo. B. Wright as president, it being necessary that in the separate State organizations the president should be a resident citizen. These organizations having been effected, the consolidation will be completed as rapidly as the formalities prescribed by the statutes of the several States permit, and will have passed its various stages on or about 1st December. In the meantime the new securities are being prepared for issue during that month, and the resumption of payment is fixed for July 1st 1872.

The trust which Messrs. M'Clellan, Thurman, and Duncan so kindly undertook, and have so energetically and faithfully fulfilled, will be wound up, and its duties ended by the creation of the consolidated corporation, and the issue of new securities within eighteen months of the production of the scheme of reorganization.

Until the new administration comes into power the working of the railway must be simply provisional, without the power of development or of reform, all the old machinery for earning and collecting the revenues being continued.

After five years of suspension the weekly returns of traffic, though meagre and to some extent conjectual, are again published. These give but a faint idea of the revenue under a vigorous and honest executive, with a high-class permanent way established, renovated traffic facilities, abundant rolling stock, re-established coal and petroleum connections, and cordial co operation with local interests and connecting lines. General M'Clellan, when his duties as trustee have ceased, will assume the Presidency of the consolidated company, with the Hon. G. B. Wright, now Commissioner of Railways in the State of Ohio, as vice-president, residing in Cleveland, and Mr. Henry F. Sweetser, a man of the highest capabilities and most energetic character, as general manager.

My official connection with the company, has now temporarily ceased. I leave it free from litigation, from complication with the Erie or any other company, and from the disastrous control of Express companies or the other jobbing influences which are destroying the shareholders' interests in the majority of American railways, and in a state unquestionably able to grapple successfully with its engagements and satisfy every claim of its proprietors.

JAMES M'HENRY.

☞ Four miles of cable have been laid between Albany and West Troy to test the Belgian system of towing.

Cairo and Fulton Railroad.

The St. Louis and Iron Mountain Railroad Company has effected the purchase of the Cairo and Fulton Railroad of Arkansas. The directory immediately afterward appointed Thomas Allan and H. G. Marquand—the President and Vice President of the St. Louis and Iron Mountain Railroad—to the same office in the newly acquired railway.

Through this purchase the vast trade of Arkansas and Texas will be placed within the reach of St. Louis. Few railroad enterprises of greater importance and more direct benefit to St. Louis have, therefore, been consummated. It is the intention of the directory to push forward the work of construction on the Arkansas branch of the Iron Mountain Road and the new road with increased vigor. The former is now in running operation to within forty miles of the Arkansas line. At this point the main road will connect with the Arkansas branch of the Cairo and Fulton Road. It will then run by an almost direct southerly route to Little Rock, where a junction will be formed with the International Road of Texas. The latter in turn will run southwest, through Texas, giving St. Louis connection with Fulton, Tyler, Houston, Galveston and other intermediate cities, and tap the trade of the Arkansas and Red rivers and their tributary branches. On the Arkansas branch of the Cairo and Fulton Road twenty miles are already constructed, and thirty miles are prepared for the iron. The section has also three locomotives and twenty cars. The Missouri branch of the Cairo and Fulton Road runs from Cairo, in a northwesterly direction, until it makes connection with the Iron Mountain Railroad at Potosi.

Chicago Extension of the Baltimore and Ohio Railroad.

The Defiance, Ohio, *Democrat* of October 27th contained the report of J. Dutton Steele, Civil Engineer, of his survey of a route for the proposed Chicago extension of the Baltimore and Ohio Railroad. The portion of the route surveyed by Mr. Steele runs westward from Tiffin, in Ohio, in nearly a direct line past Defiance, Auburn, Albion, Bremen, &c., to Lake Station, on the Michigan Central Railroad, near the southern extremity of Lake Michigan, whence it may be extended to any point in Chicago or vicinity that may hereafter be selected. The distance from Tiffin to Lake Station is a hundred and twelve and a half miles, and it intersects ten North and South railroads, the most important of which is the Toledo, Wabash and Western, on account of its westward extensions and its large freight business. Of the country passed over forty-seven per cent. is timber land and four per cent. marsh; there are fourteen towns with populations of from 100 to 6,000 lying along or adjacent to the line. These towns are growing rapidly as the country becomes more thickly settled, and the manufactories increase. The estimated cost of construction for the entire line is put at $3,057,075, or $18 114 per mile.

☞ The Pennsylvania Railroad Company have leased the Sunbury and Lewistown road for the term of nine hundred and ninety-nine years. This road traverses the counties of Snyder and Mifflin, forming a connecting link between the Northern Central Railroad near Sunbury and the Pennsylvania at Lewistown, a distance of forty miles.

☞ W. G. Peck has resigned the superintendency of the Vineland Railroad, and accepted a similar position on the New Jersey Southern railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 11, 1871.

Stock Exchange and Money Market.

Business in all lines has been seriously interrupted by the political excitement. Tuesday of the present week, Election Day, was generally observed by a suspension of financial and commercial operations. Money has been offered on call quite freely since our last, within the range of 5@7 per cent. The demand from speculative sources has been less urgent, due, in part, to restricted movements in Gold and Stocks. The Government houses had their wants provided for with even more than the usual promptness at minimum rates. At the close, the tendency was toward increased ease. The mercantile inquiry was also less active, and the best grades of commercial paper were in more favor with lenders, within the range of from 9@12 per cent. per annum. The city banks, in their last weekly statement, indicated an encouraging gain in their reserves of both specie and legal tender notes. The Government office reduced its coin and currency balances materially, thus indirectly helping to strengthen the position of the banking interest. The city banks, in their latest return, show an increase of $1,901,700 of legal tender notes, $2,280,800 of specie, and of $4,085,200 of deposits; also an addition of $512,300 to their loan and discount averages, and a reduction of $207,800 in their item of circulation. The city bank exchanges, last week, averaged $100,135,287; and thus far, this week, 99⅛ millions daily. The banks now hold $5,142,000 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $12,982,900, against $14,899,646 same time last year. The city bank deposits are now $207,427,400 against $194,769,716 week ending Nov. 5, 1870. The legal tender reserve amounts to $51,572,200 against $53,999,251 same time last year. The circulation now stands at $30,225,000, against $194,769,716 same time last year. The loans are now $281,970,900, against $268,293,906 at this date last year.

The U. S. Sub Treasury reduced its currency balance $2,642,288 and its coin reserve $3,183,661, as the result of the week's business. The receipts of the office were $4,754,798 in coin, and $3,517,220 in currency; payments, $7,908,496 in coin, and $6,455,440 in currency. The office received $2,587,649 in coin or its equivalent, from customs; and disbursed $1,846,314 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,365,000 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $339,398,350; and as security for deposits of public money, United States bonds for $15,274,900. The aggregate of the outstanding circulation of the National Banks of the country is $324,722,827.

Government revenues have been on a moderate scale since our last. The excises yielded last week about two millions, and thus far since July 1, about 47 millions. The customs at the port of New York, last week were $2,587,649; and at the outports, equal to about $870,000 more, all in coin, or coin certificates.

Government disbursements in October, on warrants, were $12 172,148, as follows: War, $3,178,255; Navy, $1,400,089; Interior—Pensions and Indians, $1,770,378; Civil and miscellaneous, $5,823,426.

The receipts from customs at San Francisco, since Jan. 1, have been $6,078,500, against $6,754,851 same time in 1870.

Under the Treasury programme for November Government proposes to sell Gold as follows Thursday, Nov. 9—Two Millions. Thursday, Nov. 16—One Million. Wednesday, Nov. 22—Two Millions. Wednesday, Nov. 29—One Million. And to buy in Five-Twenties as follows: Wednesday, Nov. 15—One Million. Tuesday, Nov. 21—One Million. Tuesday, Nov. 28—One Million.

There has been a less active movement in the Gold line, with a less confident speculative demand, and a less urgent customs and export call. The supply of Gold available for immediate delivery has been kept comparatively easy by the free disbursements of the Government office, on the November coin interest. The range of the price during the week, has been from 111¾@112¼, and the closing quotation on Wednesday was 111⅞ against 112¼ the preceding Wednesday. The specie outflow, last week, was $488,160; on Tuesday of this week, $11,000; and on Wednesday $———. The Gold Exchange Bank clearances have been as follows: Nov. 2, $79,711,000;

Nov. 3, $46,985,000; Nov. 4, $41,010,000; Nov. 6, $32,808,000; Nov. 8, $51,157,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Nov. 4th, 1871, $72,727,052, against $75,427,257 same time in 1870.

The export drain of specie was $488,161 last week, against $3,156,924, same week preceding year. The shipments since January 1, 1871, have been $60,139,044, against $54,866,403 same time in 1870.

The specie exports by steam and rail from San Francisco, from Jan. 1, to Oct. 25, were $13,776,882, and through the Post Office $10,991,000.

The customs demand for Gold last week, averaged $431,275 a day; thus far, this week, it has averaged $488,000 a day, or equal to a weekly aggregate of $2,928,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $13,663, and since Jan. 1, 1871, $8,402,517 against $11,108,319 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $136,935,617 against $124,320,770 same time in 1870.

Foreign exchange has been comparatively quiet, but fairly steady as to rates. Bankers' sixty day bills on London closed on Wednesday at 108½@108⅝; sight bills on London, 109½@109⅝.

The produce exports from this port, week ending with Nov. 7, were to the currency value of $5,564,262.

Government securities have been in active request at much firmer rates, particularly the 1867 Five-Twenties, which were quite scarce for immediate delivery and exceptionally buoyant as to price. The later dealers showed rather less firmness.

On Wednesday, Government bought in one millions of Five-Twenties at 111 24@111 59 nett. The amount of bonds offered was $2,015,050 at from 111 24@111 74.

U. S. sixes of 1881 closed here on Wednesday of the current week at 116¾@117; U. S. Five-Twenties of 1862, 111⅜@111½; U.S. Five-Twenties of 1864 at 111¼@111½; U. S. Five-Twenties of 1865, 111¾@112; U. S. Five-Twenties of 1865 consolidated, 113¼@113⅜; U. S. Five Twenties of 1867, 114@114⅛; U. S. Five-Twenties of 1868, 114@114⅛; U. S. Ten-forties at 109¼@109½; U. S. Six per cent. currency bonds, 111⅞@112.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 25.	Oct. 31.	Nov. 8.
Consols	93	93	92⅞@93
U.S. 5-20's of 1862..	90¾	91⅜	91⅜
U. S. 5-20s, 1865	90⅞	91½	91½
" 1867	92⅝	93⅛	93⅜
" 10-40s	89⅜	89½	89½
Erie.	24	....	24¼

The new Funding Five per cent. Loan was quoted in London on Wednesday at 2¼ per cent. discount.

State bonds have been in moderate demand at generally steady prices.

Railway bonds have been in very good request and the more popular of the old loans have been quite readily taken at firmer and rising prices. Central Pacific Sixes closed buoyantly at 103@103⅛, with very few bonds offering at even these figures in the open market. The inquiry for this Loan from European buyers continues quite urgent, and the tendency of the price is decidedly upward. For the Chesapeake and Ohio Sixes, an improved investment call has been noted at the established price of 93 per cent. and accrued interest.

The earnings of the Central Pacific Road in October were $1,005,475, or $177,028 more than in October 1870; and for the ten months of 1871, $7,958,827 or $1,824,915 more than for the corresponding months of 1870.

Railway and miscellaneous share property has been less active but generally quoted strong as to price though closing steady.

General business has been on a restricted scale in most kinds of Produce. Breadstuffs and Provisions closed irregularly. Middling upland cotton closed on Wednesday at 18½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 494,227 bales, against 584,038 bales same time in the preceding year; exports 189,217 bales, against 204,000 bales in the previous year; stock at the ports at latest dates, 263,100 bales, against 275,000 bales same date 1870.

At the Live Stock Markets, Beeves have been in moderate demand at from 7@12½ cts.; Veals at 5@11 cts.; Sheep at 5@6¾ cts.; Lambs at 7@8¼ cts.; Swine, inactive 4⅞@5¼ cts per lb., all live weight. The week's receipts were 7,554 Beeves, 1,600 Veal Calves, 36,470 Sheep and Lambs; and 42,632 Swine.

Foreign goods have been in light demand as a rule, but prices have been quoted about steady. The week's imports of foreign goods reached $6,926,198, including $2,459,873 of dry goods.

Ocean freights have been less active, rates have been quoted much weaker toward the close.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, special tax, 15⅛; do., Fund Act, 1868, 21¾; South Carolina 6s, new, Jan. and July, 35; do. Apl. and Oct., 34; Arkansas 6s, Fund Act, 55; N. Y. State 7s, B. Increase of through Freight over the Central Pacific Railroad.

We have just received from C. W. Smith, General Freight Agent of the Central Pacific Railroad Company, a statement of the quantities of through freight forwarded to the East over the road during the month of September, from San Francisco, San Jose, Stockton, Sacramento and Marysville. The freight business of the road was never so pressing as now. The weight of through freight shipped from California in September was the largest on record, amounting to 8,907,607 lbs, equal to 4,454 tons. The general capacity of a car is ten tons; from which it will be seen that 445 car loads of freight were sent to Eastern cities from California in September. Most of this quantity, of course, went from San Francisco—the amount shipped from there being 7,929,441 lbs, or 3,965 tons. The freight shipped from San Francisco in September embraced 200 car loads of Tea, 23 car loads of Coffee, 6 car loads of Silk, 6 car loads of Wine, 34 car loads of Wool, 6 car loads of Leather, 34 car loads of Hides and Skins, 8 car loads of Salmon, 1 car load of Hops and 74 car loads of unspecified merchandise. There were 2 car loads of Wine and 36 car loads of Fruit from San Jose, Sacramento, Stockton and Marysville, 3 car loads of Wool from Sacramento and 1 car load of Live Stock from San Jose. The following is a statement of pounds of through freight forwarded to the East over the road in September and for the first nine months of the year:

	September.	Nine Months.
Tea, lbs	4,002,581	9,672,455
Coffee	457,465	822,415
Cotton (foreign)	.....	125,420
Silk	124,522	628,388
Wool	839,020	13,449,878
Hides	673,097	711,973
Leather	115,714	1,200,749
Wine	142 295	1 835 050
Hops	21,458	142,946
Quicksilver	.....	81,900
Lumber and Shingles	.....	720,863
Glue	.....	85,052
Fish	160,799	545,559
Oil	.....	42,187
Whalebone	.....	8,649
Straw Hats	.....	8 528
Arms	.....	14,970
Shubbery	.....	20,000
Spices	.....	27,450
Base Bullion	.....	93,334
Machinery	.....	40,000
Stock, (1 car load)	20,000	260,000
Nuts	.....	13,470
Gum	.....	74,995
Fruit	728,819	1,446,245
Furs	.....	115,931
Unspecified	1,621,807	9,651,253
Totals	8,907,607	41,839,760

It will be noticed that the Tea and Coffee shipments for September were nearly as large as for the previous eight months. The monthly shipments of through freight by the above route from San Francisco and the interior cities named since January 1st, have been as follows:

	San Francisco.	Interior.	Total.
January, lbs	1,359,040	162,948	1,521,988
February	1,393,125	170,023	1,563,248
March	2,450,897	293,349	2,744,246
April	4,425,755	487,316	4,913,071
May	6,508,970	844,471	7,363,441
June	5,260,973	440,736	5.701,709
July	3,420,427	555.361	3,975,788
August	4,502 937	655,725	5,158,662
September	7,929,441	978,166	8 907,607
Totals	37,251,564	4,588,195	41,839,760

The traffic for September was 1,600,000 lbs larger than any previous month this year. There has been a steady gain since June. The month of October will probably present as good a showing as the previous month, since large quantities of Tea and Coffee are known to have passed over the road, including the cargo of the Hammonia from Shanghai.

☞ A meeting of the stockholders of the Atlantic and Great Western Railroad Company of Pennsylvania was held in Philadelphia on the 4th inst., to take action on the agreement for the consolidation of that company with the Atlantic and Great Western Railroad Company of New York. Stockholders representing the entire stock of the Pennsylvania Company were present, and voted in favor of adopting the joint agreement with the New York company owning the part of the line in that State.

☞ The Columbus, McArthur and Gallipolis Railroad company has been organized to construct a railroad from Gallipolis, in Meigs county, on the Ohio river, *via* McArthur, Vinton county, to Logan, Hocking county, where it is intended to connect with the Columbus and Hocking Valley Railway—thus giving the Capital City direct railroad connection with the inexhaustible rich coal, iron and salt veins of the extreme southern portion of Ohio.

☞ The Jacksonville, Pensacola and Mobile railroad, which is finished and in running order from Jacksonville to Quincy, Fla., a distance of 185 miles, with a branch to St. Marks, a distance of 22 miles, has been conveyed by the stockholders, by a deed of trust, to Francis H. Flagg, D. G. Ambler, and Converse L. Chase. This road received aid from the State of Florida to the amount of $4,000,000.

☞ A narrow gauge railroad has been opened to traffic between Toronto and Orangeville, in Ontario, Canada, and is doing a successful business in the transportation of freight and passengers. The gauge, three feet and a half, is found no obstacle to its efficiency for carrying freight, while the accommodations for passengers are described as entirely comfortable and satisfactory.

☞ The Bangor *Whig* learns that on and after the 13th of November a train will be run from that city to St. John, N. B., over the European and North American Railway, in the night, starting on the arrival of the Maine Central mail train from the West. The way or local mail will be carried on the night trains, while the through mails will be taken on both night and day trains.

☞ The earnings of the Toledo, Wabash and Western Railway in October, 1871, were $600,205, against $451,293 in October, 1870—an increase of $148,912.

OFFICE OF FISK & HATCH,

BANKERS AND FINANCIAL AGENTS

OF THE

CHESAPEAKE AND OHIO RAILROAD COMPANY,

No. 5 NASSAU-ST., NEW YORK.

Within a year the CHESAPEAKE AND OHIO RAILROAD will be in operation as a through line from the Atlantic to the Ohio, crossing the great iron beds of Virginia and the remarkable coal deposits of the Kanawha Valley. After its Western connections are completed, it will form a favorable and popular through route between the coast cities and Cincinnati, Louisville, Nashville, Memphis, New Orleans, St. Louis, Chicago and San Francisco.

We are now selling the last of the FIFTEEN MILLION GOLD LOAN, secured by mortgage on the whole railroad property. These bonds combine perfect safety with a fair income, and a prospective advantage in their future market value. Holders of Five-twenties, or other high-priced securities, can exchange for these bonds, and realize a handsome increase in the amount of their invested principal and their annual income, without impairing the security of their investment.

The CHESAPEAKE AND OHIO BONDS are issued in $100, $500, $1,000, either coupon or registered; interest six per cent. gold, payable May and November. Price, for the present, 93 and accrued interest from Nov. 1. We recommend them to our friends and customers with the same confidence with which we have always recommended the UNITED STATES GOVERNMENT and the CENTRAL PACIFIC BONDS.

We continue to buy and sell CENTRAL PACIFIC BONDS, and fully expect they will, in time, reach the price of Five-twenty Bonds. They are dealt in at all the principal money centres of the world. The Company have none left, and can issue no more on their main line, as the amount was fixed by act of Congress at $25,885,000. The property pledged to secure the bondholders is worth fully $100,000; the net receipts of the road for the year will be nearly three times the interest payments thereon.

We buy and sell FIVE TWENTIES, TEN-FORTIES, EIGHTY-ONES and CENTRAL or WESTERN PACIFICS, or receive them in payment for CHESAPEAKE AND OHIO BONDS at their current market price.

Deposit account of banks, bankers and others received, on which we allow four per cent. interest. Checks payable on presentation, without notice, the same as at a national bank.

FISK & HATCH.

HARVEY FISK.
A. S. HATCH.

☞ Work on the Portland and Ogdensburg extension from North Conway to Sawyer's Rock, fifteen miles below the Crawford Notch, has now commenced and will be pushed all winter. This portion of the route follows the Saco at intervals through Upper Bartlett; its accomplishment will be an earnest of the determination of the railroad company to push forward the gigantic undertaking of placing the rails along the steep sides of the great mountains in the Notch itself, which is the next step in forming a junction with this line through Vermont to the St. Lawrence at Ogdensburg.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were:

ENTERED FOR CONSUMPTION.

	1870.	1871.
Manufactures of wool.....	$2,489,830	$1,642,304

☞ The Lexington (Ky.) *Press* says that the contract for building the Lexington and Big Sandy Railroad to the mouth of the Big Sandy has been let out, as also the sub-contract for the distance from Lexington to Mt. Sterling. It may, therefore, be confidently expected that work on the road will soon be commenced.

Journal of Railroad Law.

RAILROAD COMPANIES—STANDING ON SIDE TRACK IN REAR OF "CUT OFF TRAINS" NEGLIGENCE—RULE OF LAW.

The facts in the recent case of Van Schaick, Executor of George Van Santwood, *vs.* The Hudson River Railroad Company, (43 N. Y. 527,) are fully and clearly stated in the following opinion by—

FOLGER, J.—The questions in this case arise upon the defendant's motion to nonsuit the plaintiff and dismiss the complaint. The questions are, was the defendant guilty of negligence, which caused the death of the plaintiff's testator? Was the plaintiff's testator guilty of negligence, to which contributed his death?

It seems clear to us, from the undisputed facts, that the latter query should have been solved in the affirmative. And there being no dispute as to the evidence which in our view is controlling, the question was not one of fact for the jury, but one of law for the court, and the learned justice who held the circuit erred in refusing the nonsuit and to dismiss the complaint.

Here was a person of mature years, of acute and trained mental faculties, of large experience and acquaintance with the ways of travel, and the localities over which he was then passing. He had a knowledge, got by use, of the very method and way in which he was then seeking his destination. He was taken up, he was carried, he was set down, just as and where he had before been. He started to walk north, as he had been used to do, upon the up main track, along which, cars moving southwardly toward him, could easily be seen approaching. To walk up this track was to him as to others, a customary way of passage on foot, from the round house to the ferry. The main track was, to his observation, the safe and usual track on which to walk. The side tracks were not for that purpose, but for the deposit of cars, and for the backing upon of trains for the uncoupling and deposit of cars. But at the request of an acquaintance, instead of passing along over and off the main track, and so beyond danger from the matter moving upon any of the tracks he tarried. And then of his own volition, for his own purpose, without the need put upon him by any act or arrangement of the defendant, he stepped from off the main track, which was clear and safe, upon this side track, and there placed himself between the rails behind cars there standing, and there he stopped and stood, where he could neither be seen from the north nor could himself see toward the north. While there, engaged in an act of necessity, doubtless, but a necessity of his own, the train in which he had been a passenger backed down, struck against the cars behind which he was standing, put them in motion, pushed them against and over his body, and killed him. The action of the train in backing down was to switch off and disconnect cars which were to be left from it. It was its customary and proper action on its arrival there. The track on which he stood was used for that purpose and long had been; being one of a great number thus used, lying in contiguity. It was in no sense a footway for travel or a place of stoppage for passengers arriving by that or other trains. It was neither necessary or customary for that purpose. To place himself upon it as he did, he was obliged to tarry on the roadway, and to leave the track on which passengers usually and before that passed from the caboose to the ferry. The bare statement of these facts carries with it the conclusion that the testator, from preoccupation of mind and inattention to circumstances, carelessly placed himself where harm might come to him.

Doubtless the deceased, while on the train, was a passenger in the care of the defendant. And after he left the train, still so far a passenger, as that the defendant was bound to provide him egress from their premises, safe for him to use. But he was a passenger, under such relations and circumstances as were not strange and unaccustomed to him. The facts of the case show, that had he continued in the way of egress provided for, and before that, made known to him, he would have come off in safety. He had before ridden from Schodack in the caboose, and it had before been cut off near the round-house, and he obliged to make his way on foot from that point to the ferry. And though more inconvenient than a trip by passenger train, it was still less inconvenient than not to come at all, and was, as he said, an accommodation. It appeared from the testimony, that not always could he obtain a passage in the caboose of the freight train from Schodack to the round-house, and that on this day it was especially sought for by him. He took passage, with knowledge of all the incidents of that way of passage. Can it then be said, that the contract of the defendant with him was any more than to take him up at Schodack to bear him to the round-house, to set him down there, and to find him clear foot way up the main track, and off it to the ferry, as they had heretofore done. There is no proof of any ticket sold and delivered to him, so that the contract is to be deduced from the facts as they all appear. Had he followed, and adhered to the course of travel, which they had before that afforded to him, and which he knew beforehand he must take, for aught that appears, no injury would have befallen him. For this train, to those who had used to take it, the round-house was the end of transportation. The dealings between the testator and defendant, had been such as to come to this, that the defendant had made known to him, that this train was not run especially for the conveyance of passengers, but that to accommodate them, they would on payment of fare, be taken into the caboose of the employes, and in it carried to the round-house, where the caboose would stop; and from whence they must go on foot, over the open and unobstructed main track; and that he had for this accommodation to him, paid his fare, to alight when the caboose stopped, and to finish the way on foot. It is not the ordinary case of one seeking passage to a given place, and paying fare to it, being with no previous intimation put upon a train which goes not to it. Neither is it the case, on which the manuscript opinion of the commission of Appeals has been furnished to us, of one, who though knowing that he is to take a freight train, for his paid for passage from one place to another, is compelled for the first time in his experience, to seek the train at a distance from the station, and in the way there, stumbles into pitfalls unknown to him, and of which he has had no warning. There, in ignorance on the part of the

passenger of the existence of any peculiar circumstances, the contract is to carry safely, and to afford safe way of access to the vehicle. If in that case, it had been said to the passenger, to go at this time, you must go by a freight train, not on purpose for passengers; it stands yonder; you must go to it to get on board; on the way to it there is a place dug out, over which you must pass; if under these circumstances you choose, your fare will be taken and a ticket sold to you; and he had paid and gone; it would have needed to have rendered the carrier liable, that more should have been shown, than merely that the passenger had fallen into the pit and had been hurt.

The argument of the learned counsel for the respondent seems to exclude the idea that the testator was in a way familiar to him, and that he was pursuing a mode of reaching Albany, as to which from use, he knew all. It is one too important to be dropped from the consideration of the case. He knew where he was to be set down. He knew the track he was to follow from there to the ferry. He was in familiar surroundings. Despite this, he stopped, he left the main track, where passage was usual and safe, and range of vision unobstructed; he stepped between the rails of a side track, just in the rear of cars subject to be disturbed, and there he stopped and stood.

Does it not seem clear that this was not ordinary care of self? It seems to us a self evident proposition, that no prudent man would deliberately take this stand between the rails of a railroad track, out of view, close to and behind a car, when three feet therefrom was a clear way, upon which he could see and be seen afar.

It comes to this, then, that the plaintiff's testator was a negligent contributor to the injury he suffered; or that the exercise of the ordiary care of a prudent man is excused, for that nature was so urgent that her demands were paramount. But if nature was urgent, it was an urgency which was upon him alone, and which he had no right, in his duty to others, to permit to overcome his care for himself. And it can be no excuse for the lack of prudence that the pressure of a private necessity, or the sense of delicacy in its relief, was stronger than his care for his own person. Certainly the disastrous results of so yielding to that pressure and that sense as to forget and to neglect that care, should not be visited upon those who were not instrumental in producing the necessity, and knew not of it.

The judgment of the court below should be reversed and a new trial granted, with costs to abide the event.

Judgment reversed, and a new trial ordered.

Vineland Railroad.

The Vineland Railroad, extending from Atsion, on the Atco spur of the New Jersey Southern Railroad, to Stowe Creek, on Delaware Bay, a distance of 47½ miles, has been completed, and in the course of a week trains will begin to run regularly over the entire length of the road. It requires, it is stated, only ten miles of road to be finished in Delaware to give New York a direct connection with Norfolk by way of the Delaware and Maryland Railway. A ferry company has also been organized in connection with this road under the style of the "New Jersey and Delaware Ferry Company," with William A. House as President, Charles K. Landis, Treasurer, and Edwin M. Turner, Secretary, for the purpose of running a boat from the railroad terminus to Sprnance wharf, on the opposite side of the bay in Delaware; also to run steamers *via* Chesapeake canal to Baltimore, and to the different towns along the Delaware river. The intention of this railroad and ferry company is to establish a grand freight and passenger route by canal, ferry and railroad, between the South and New York and the Eastern States.

The Public Debt Statement.

The following is a recapitulation of the public debt statement October 31, 1871:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$277,057,600 00
Six per cent. bonds	1,582,512,350 00
Total	$1,859,569,950 00
Accrued interest	44,902,399 96
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$25,690,000 00
Navy Pension fund 3 per cent	14,000,000 00
Certificates at 4 per cent	678,000 00
Total	$40,368,000 00
Interest	344,172 06
Debt on which interest has ceased since maturity	$1,798,692 26
Interest	298,322 45
DEBT BEARING NO INTEREST.	
Demand and legal tender notes	$357,592,821 25
Fractional currency	39,488,142 70
Certificates of gold deposited	16,679,900 00
Total	$413,760,863 95
Unclaimed Interest	14,442 13
Total amount outstanding	$2,315,492,506 21
Total interest	45,559,336 60
Total debt, principal and interest, to date, including interest due and unpaid	$2,361,051,842 81
AMOUNT IN TREASURY.	
Coin	$99,054,589 23
Currency	10,283,805 55
Total	$109,338,394 78
Debt less amount in Treasury	$2,251,713,448 03
Debt less amount in Treasury October 1, 1871	2,260,663,939 87
Decrease of debt during the past month	$8,950,491 84
Decrease of debt since March 1st, 1869	$273,749,811 98

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236,512	$544,730 24
Kansas Pacific	6,303,000	126,060 00
Sioux City and Pacific	1,628,320	32,566 40
Central Pacific	25,881,000	517,620 00
Central Branch Union Pacific	1,600,000	32,000 00
Western Pacific	1,970,000	39,400 00
Totals	$64,618,832	$1,292,376 64
Interest paid by United States	$12,692,475 41	
Interest repaid by transportation of mails, etc.	3,286,529 62	
Balance of interest paid by United States	9,405,945 79	

Cleveland and Pittsburg Railroad.

From the N. Y. Herald, Nov. 3.

During the day it transpired that the Cleveland and Pittsburg Railroad had been leased in perpetuity to the Pennsylvania Railroad at the rate of ten per cent. upon its present capital stock. The fact of a lease was made known in the shape of a preamble to proxies circulated by a leading brokerage firm asking endorsement of their proposition to make the capital stock ten millions and receive thereupon seven per cent. guaranteed interest, instead of ten per cent. on seven millions. The preamble at the head of these proxies reads as follows:

Whereas the Cleveland and Pittsburg Railroad Company and the Pennsylvania Railroad Company have entered into a contract or lease for a period of 999 years, from the 1st day of December, 1871, by which the Pennsylvania Railroad Company, as lessee takes possession of the Cleveland and Pittsburg Railroad, and all its property on the 1st of December, 1871, the general terms of said lease being that the Pennsylvania Railroad Company, as lessee, shall provide all moneys needful for the interest on the bonded obligations as they accrue from the said 1st day of December, and as they mature from time to time thereafter, and for the principal thereof, in the manner set forth in said lease, and also that the said Pennsylvania Railroad Company shall provide and pay to the Cleveland and Pittsburg Railroad Company a rental or dividend fund, which shall be equal to ten per cent. per annum upon the existing capital of said company, payable quarterly in the city of New York, clear of taxes, and in the manner provided and set forth in the lease of the Pittsburg, Fort Wayne and Chicago Railway to the Pennsylvania Railroad Company, said rental being equivalent to seven per cent., clear of taxes, upon $142 85 for each $100 of the existing capital stock, &c.

In other words, present holders of Pittsburg stock may elect to receive ten per cent. in quarterly dividends on their stock as it now stands, or they may vote themselves 42 85-100 shares for each 100 shares and receive seven per cent. in quarterly dividends on 142 85-100 shares of the proposed enlarged capital.

Port Royal Railroad.

The Augusta (Ga.) *Chronicle* of the 4th inst., says that since the election of the new board of directors the work on the road has been going on gradually. More iron has been bought and laid; the large bridge over Whale Branch has been completed, and but a few weeks since two fine new locomotives passed through that city for the road. On the 24 of this month there were forty consecutive miles of the road built and track laid from Port Royal towards Augusta and on the 9th instant trains will be run regularly from that point for freight and passengers connecting with the Charleston and Savannah Railroad for Charleston or Savannah, as the principal object of the Directors, recently, has been to get the road to the sea for the landing of iron and other materials, thereby saving enormous expenses at Charleston, besides freight over the Charleston and Savannah Railroad. The road hereafter will be pushed forward towards Augusta.

☞ David Hoadley, Esq., for the past eighteen years President of the Panama Railroad Company, having retired from the office, the Board of Directors, at a special meeting, unanimously elected Joseph F. Joy, Esq., late Vice-President and Secretary, to the position of President, and Mr. John Keeler to that of Secretary. Mr. Hoadley remains a member of the Board.

Virginia Valley Railroad.

The affairs of the Virginia Valley railroad have now reached a stage in which it may be realized as an actuality. The two commissioners appointed under the act of Virginia, Messrs. M. O. Harman and M. Harvey Effinger, (all the Valley stock, $1,200,000, required by the Baltimore city ordinance having been subscribed,) came to this city and opened books of subscription on Monday last, when the million authorized by the directors of the Baltimore and Ohio Railroad Company was subscribed by President Garrett, of that road, and on Tuesday, the thirty per cent. required on subscriptions by the ordinance of the Baltimore city council of September 14 1869, having been paid, the commissioners of finance of the city of Baltimore, Mayor Banks, and Messrs. R. T. Baldwin, and Charles J. Baker made the subscription of one million authorized by the city of Baltimore. In regard to the thirty per cent. cash required on subscriptions, it may be well to state that it was only required on such subscriptions as those made by the city of Staunton and the town of Lexington and individuals, and not on the county subscriptions. The Valley subscription to the road, by counties, towns, and individuals, was as follows: Rockbridge county $525,000, Botetourt county $200,000, Roanoke county $200,000, city of Staunton $150,000, town of Lexington $30,000, individuals $95,000—making the total of $1,200,000.

Two corps of engineers are now in the field surveying for the route—one at Buchanan, in Botetourt county, and one between Lexington and Staunton. Two lines are located from Harrisonburg to Staunton, and engineering work is proceeding rapidly beyond the latter point. A large portion of the line is thus ready for contract, and it depends upon the liberality of landowners as to which of the two lines will be adopted. On one, the eastern line the right of way has already been relinquished for about the distance of fifteen miles, and on the other for about seventeen miles, the whole distance between Harrisonburg and Staunton being twenty-six miles. There are also volunteered on the eastern line subscriptions to the amount of about $15,000, and on the other of about $40,000. There is also some movement among interests at Harrisonburg and Salem, (the latter on the Virginia and Tennessee road,) the two termini of the road, to establish a more direct interest in the line by local subscription on the part of those towns. It will be for the company to determine, in view of the relative merits of the respective lines from Harrisonburg to Staunton, as well as the inducements offered, which route to finally take. It may be added that the Valley road, of 116 miles, commences on a better stock basis—$3,200,000—than any, perhaps, of which we have known in all this section of country. Its importance to Baltimore, as well as the rich region which it traverses, is hardly excelled by any other connection which we have, giving us as it will, a direct new route to the great Southwest and the South.—*Balt. Sun, Nov. 2.*

New Orleans and Opelousas Railroad.

Col. Thomas Allan and his associates are energetically pushing the Iron Mountain, and Cairo and Fulton railroads to Little Rock, 340 miles from here—a point they will reach in the next year—we are gratified to find a former plan revived, that of bringing the New Orleans and Opelousas railroad in this direction from the Gulf of Mexico to meet it. This, with an intermediate road, if built, would give us a direct southern road to the sea, from St. Louis, of 760 miles. The southern terminus of this road at Berwick's Bay, is already connected with New Orleans by Morgan's Louisiana and Texas railroad, of 80 miles. From this bay the enterprising Mr. Morgan has a fleet of thirteen fine and costly steamers that distribute passengers and freights to every harbor on the gulf, as far west as the Rio Grande. If this system of roads were completed it would be difficult to overestimate its benefits to this city, the intermediate country and New Orleans.—*St. Louis Republican.*

Massachusetts Central Railroad.

At the annual meeting of the stockholders, held in West Boylston on the 1st inst., the following gentlemen was elected directors for the ensuing year; James M. Stone of Charlestown, Francis J. Parker of Newton, Joel Hayden of Haydenville, L. J. Dudley of Northampton, Francis Brigham and George Houghton of Hudson, B. H. Tripp of Rutland, Charles A. Cutting of Boston, E. B. Shattuck and Hiram Wadsworth of Barre, L. M. Hills, of Amherst, and J. Edwin Smith of Smithville.

The Directors organized by choosing James M. Stone President Francis J. Parker Treasurer, and J. M. Draper of Wayland, Clerk.

At a meeting of the directors held at Worcester on Tuesday, the treasurer stated that up to the 30th of September $133,049 of the capital stock ($3,000,000) has been paid in. The condition of affairs indicates an early beginning on the construction, which is only delayed until the remainder of the first assessment (of 20 per cent.) on the capital stock shall have been paid in. The contract has already been made with Mr. N. C. Munson, with the condition that the road shall be completed within two years. Of the twelve subscribing towns all have paid the assessment but Boylston, and that upon the individual shares has all been paid with the exception of $188. The officers of the road expect the work of construction to begin within ten days.

☞ A new railway project has been started in Montreal which may bring forth very important results to that city. Sir Hugh Allan, of the Allan Steamship Company, has been appointed president of a company to build a "Northern Colonization, railroad," running from Montreal to Ottawa, where it is to connect with the Canada Central at Pembroke. Thence a line of 180 miles is to reach Lake Nipissing, and there to connect with the net work of lines in connection with the Northern Pacific already in course of construction. A bridge is to be thrown across the St. Lawrence at the island of St. Helens. Sir Hugh Allan is reported to have gone to England, to raise funds for the construction of the road.

☞ The Denver and Colorado Narrow Gauge Railroad cost $12,500 per mile. There were 35 miles of rail laid in five weeks; the rails weighing 30 pounds per yard against 56 on the Denver Pacific. The weight of a train complete, carrying 200 passengers, is but 70 tons, against 146½ tons for a broad gauge train carrying 212 passengers. Each car weighs but eight tons against twenty on the old system. The freight cars, weighing 4,000 pounds, will carry 10,000 pounds weight, and though the engine and tender weigh but 15 tons they took an excursion train along at the rate of 25 miles an hour easily.

☞ We give elsewhere an official notice from Mr. James McHenry, stating that the trustees for foreclosure obtained possession of the above line on September 7th; that the several State organizations in connection with it were duly effected, and that the consolidation will be completed on or about the first of December proximo. In the meantime the new securities are being prepared for issue during that month, and the resumption of payments is fixed for July 1st, 1872. The revenue, under the provisional arrangement, gives signs of good development.

United Companies' Lease.

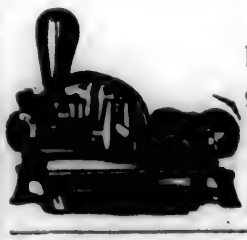
By the lease of the railroad and canal lines of the United Companies of New Jersey, the Pennsylvania Railroad Company acquires 498 miles of railroad, besides 65 miles of canal, two ferries and one bridge. The following is a list of the separate charters that pass under the lease to the Pennsylvania Railroad Company:

Camden and Amboy Railroad, 94 miles; Philadelphia and Trenton Railroad, 28 miles; New Jersey Railroad and Transportation Company, 32 miles; West Jersey Railroad, 37 miles; Salem Railroad, 17 miles; Millville and Glassboro' Railroad, 22 miles; Cape May and Millville Railroad, 41 miles; Swedesboro' Railroad, 11 miles; Belvidere Delaware Railroad, 68 miles; Flemington Railroad, 12 miles; Camden and Burlington County Railroad, 25 miles; Pemberton and Hightstown Railroad, 25 miles; Mount Holly and Medford Railroad, 6 miles; Burlington and Mount Holly Railroad, 7 miles; Vincentown Branch Railroad, 3 miles; Freehold and Jamesburg Railroad, 15 miles; Squankum and Freehold Railroad, 4 miles; Rocky Hill Railroad, 7 miles; Perth Amboy and Woodbridge Railroad, 7 miles; New Brunswick and Millstone Railroad, 7 miles; Somerset and Mercer Railroad, 18 miles; Frankford and Holmesburg Railroad, 4 miles; Connecting Railroad, 8 miles—total 498 miles. Delaware and Raritan canal and feeder, 65 miles. Jersey City Ferry Company; Camden and Philadelphia Ferry Company; Delaware Bridge Company.

☞ The Schenectady and Duanesburgh Railroad, extending from Schenectady to Duanesburgh, a point on the Albany and Susquehanna Railroad, about 24 miles from Albany, will be ready for the opening by the 1st of January. The road is about 14 miles in length.

Chesapeake & Ohio Railroad.

NOTICE TO BRIDGE BUILDERS.



SEALED PROPOSALS will be received by the undersigned at Richmond, Va., until 12 M., Dec. 6, 1871, for about 2,000 feet of IRON BRIDGING, in spans of from 20 to 130 feet.

Proposals for any part or for all will be received.

These bridges are for the extension from White Sulphur Springs to Millers Perry on New River, West Va.

Circulars containing a description of the spans, etc., can be had from

I. A. WILLIAMS'
UTICA HEAD LIGHT WORKS,
UTICA, NEW YORK.

Established 1851.

Williams' New Patent Coal Oil Head Light,

WITH BRAZED SAFETY BURNER,

Which will not take *fire* or *explode*, and is adapted to any make of Flint Light Chimney. These Head Lights are either of Cylindrical or Square Form, and of first class workmanship. The Silver Plating on the Reflectors is warranted for fifteen years. They are acknowledged by all to be the best Head Lights manufactured, and are used on nearly all principal Railroads in the country.

I. A. WILLIAMS, Patentee.

THE AMERICAN DIAMOND DRILL CO.

ARE MANUFACTURING
Under the celebrated Leschot Patents, with important improvements,

DIAMOND PROPELLED STEAM DRILLS,

ESPECIALLY ADAPTED TO
Rock Drilling
OF EVERY VARIETY.

Tunneling, Open Cut and Side Work in
RAILROAD IMPROVEMENTS.

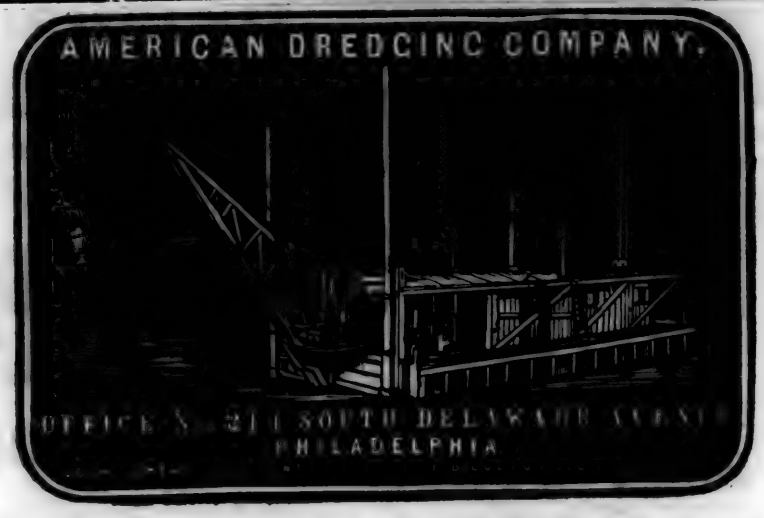
They are Driven by Compressed Air or Steam, and Bore at a Uniformly rapid rate, making a perfectly cylindrical hole, of the same size top and bottom in the hardest rock.

The economy of these Drills and their entire efficiency have been abundantly established, and the advantage of the rotary over the percussive operation very generally allowed.

NO SHARPENING REQUIRED. The Drills are also adapted (in different sizes and styles,) to *Channelling, Quarrying and Shafting*; also to *Deep Boring for testing the value of Mines and Quarries*. Catalogues sent upon application. Manufactured by

The American Diamond Drill Co.,
No. 61 LIBERTY ST.,
NEW YORK.

THE Baxter Steam-Engine,
MANUFACTURED BY
COLT'S PATENT FIRE-ARMS MF'G CO.,
HARTFORD, CONN.,



IS A SELF-CONTAINED MACHINE, COMPACT, SIMPLE, SAFE, ECONOMICAL, FULLY GUARANTEED

SIZES 2, 3, 5, 8, AND 10 HORSE POWER.

For Circular and Price List address

United Companies' Lease.

A meeting of the stockholders of the Philadelphia and Trenton Railroad Company was held in Philadelphia on the 11th inst., to pass upon the proposed lease of the New Jersey Companies to the Pennsylvania Railroad Company, the Philadelphia and Trenton being one of the roads in the control of the New Jersey Companies, and included in the lease. On the organization of the meeting, Mr. William H. Gatzmer, President *pro tem* of the company, handed the lease to the committee having charge of that document, and said:

Mr. Chairman and Gentlemen Stockholders:

Your President, because of impaired health, was advised by his physician to make his accustomed annual trip for recreation, and he is now absent in Europe, and it has devolved upon me to represent, temporarily, the official head of this company. Those who know Mr. Bradford best can say that, as president of the Philadelphia and Trenton Railroad Company, no one has been more sincerely devoted to the promotion of its true interests than he, and we hope that he may return to us restored to health.

I will read the resolutions of the Board of Directors, passed at their meeting, on the 25th of October, in reference to this meeting, covering the authority for the call of the meeting, instructions to the president in regard to the execution of the lease, and the appointment of a committee to carry into effect the resolutions:

Resolved, That the President *pro tem* is hereby instructed to call a meeting of the stockholders of this company, for the purpose of receiving their instructions in regard to the lease of the works of this company to the Pennsylvania Railroad Company, just submitted to this board—said meeting to be held at the company's office on Saturday, Nov. 11, 1871, at 12 o'clock noon.

Resolved, That if the assent of a majority in interest of the stockholders of this company be given to the proposed lease to the Pennsylvania Railroad Company, then the President *pro tem* be hereby instructed to execute the said lease, and deliver the same, when directed so to do, by the committee hereafter named.

Resolved, That Messrs. Macalester, A. J. Fish, and Welch, be said committee, and are hereby instructed to take all proper measures to carry into effect the above resolutions.

By the words of the public notice calling this meeting, you have been invited to convene together to-day to "pass upon the lease" of the Philadelphia and Trenton Railroad, and its valuable property, to the Pennsylvania Railroad Company for 999 years.

I will briefly state the action of the United Companies of New Jersey upon the lease and allude to the close relations existing between this company and the New Jersey companies.

The subject of lease has now occupied the public mind and that of the directors and stockholders of these companies for about eighteen months.

The form of lease was agreed upon and consented to by the committees of the companies constituting the lessors and lessee in May last, and on the 19th of May was reported by the special committee to the Board of Directors of the United Companies of New Jersey, on which day it was accepted by a majority vote of the United Board of Directors of the United Companies, and the presidents of the respective companies were instructed by resolution of the Board of Directors of the United Companies to execute the proposed lease when two-thirds of the stockholders in interest had consented thereto.

A committee was then appointed, with power to submit the said lease to the stockholders of the United Companies, and obtain their consent in writing, in proper form, which they proceeded to do. On the 23d of June, upon the complaint of several stockholders opposed to leasing the works of the United Companies, the Chancellor of the State of New Jersey granted a temporary injunction, restraining the officers from executing the lease, and appointed the 25th day of July following, at the Chancery room in the State House, at Trenton, for a hearing of the arguments, on which day a postponement was granted, and the arguments before the Chancellor were not made until October, and on the 18th of said month the Chancellor, by his decision, denied the injunction.

In the mean time the Lease Committee had obtained the consent in writing of two-thirds in interest of the stockholders of each of the New Jersey Companies to the execution of the lease, and had filed the same in the office of the Secretary of State of New Jersey.

On the 18th of October, at Trenton, after the decision of the Chancellor had been given, the Lease Committee held a meeting and notified the respective Presidents by preamble and resolution addressed to them, that two-thirds of the stockholders of each company (in interest) had signed their consent to the lease, and that by decision of the Chancellor, no legal impediment existed to the Presidents executing the same.

On the 19th of October the Presidents of the New Jersey Companies signed and sealed the lease.

On the same day the Board of Directors of the United Companies held a meeting, and the Chairman of the Lease Committee reported to the board that the lease had been duly executed by the Presidents.

So far as the New Jersey Companies are concerned, the lease has been executed, but as the Philadelphia and Trenton Railroad Company is a party to the lease, the execution on its part is necessary to make it a perfect instrument, and as it was deemed important by the board of directors at their meeting on the 25th ultimo that the stockholders of this company should consent to the lease before its execution, you have been called together.

Since 1835, when the joint companies of New Jersey secured a majority of the stock of this company, a contract or agreement has existed between them providing for a unity of interest. This company has since that time been so closely identified with the joint companies as to be considered and assumed as part and parcel of the joint companies of New Jersey. The stockholders of this company are mostly stockholders in the United Companies of New Jersey, and if you examine the stock list you will find that but few shares comparatively are held outside of the stock held by the United Companies of New Jersey, and by the stockholders in the New Jersey Companies. It is, therefore, apparent that the majority in interest of the stockholders of this company deem it expedient to make the lease. My views, however, are unchanged as to the inexpediency of transferring these valuable works to another company. But the stockholders who are the owners, think their interests will be better secured thereby, and they having the right and power to make the contract, their action to-day will decide the question.

In Pennsylvania, I understand, that the directors may order the execution of the lease without referring it to the stockholders, but as several members of the board of directors of this company are also members in the Board of Directors of the United Companies of New Jersey, and have there recorded their votes as opposed to the lease, it is desirable in this company, as it was in the United Companies of New Jersey (required by law), by special act, that a majority of the stockholders of the company should consent to the lease before its execution.

I do not apprehend that any discussion is expected or necessary. Every stockholder of this company is now perfectly familiar with all that can be said for or against the lease, and his mind is no doubt made up upon the question, and he will vote according to his own judgment.

In the transfer of these valuable works they will pass into the hands of the leading railroad company of this country, and by report the most extended in the world. Its managers are unequalled in capacity, of large experience, and thoroughly skilled in everything that relates to the system of railroads and canals in the United States. Our hopes are that in the future management of their great works they will continue to foster the interests of the State of their nativity, and its great city, Philadelphia; and in conducting the affairs of the public works of New Jersey that they will continue to promote the welfare of her people.

The following resolution was offered by Mr. Charles Macalester, and was unanimously agreed to:

Resolved, That for the purpose of ascertaining the views of the stockholders in regard to the proposed lease and contract, the committee be requested to remain in session until 2 o'clock, and longer if necessary, to receive the written assent or dissent of the stockholders, each share voting one vote.

There was a liberal attendance of stockholders, and the voting commenced. The entire stock of the company consists of 12,591 shares. Of these the United Companies hold 7,650 shares, all which were voted by Ashbel Welch, Esq., the President, in favor of the lease, in addition to 2,240 shares voted by individual holders, making the entire vote in favor of the lease 9,890 shares, or considerably more than three-fourths of the entire capital. The result being made known, Mr. Gatzmer, acting as the President of the company, appended his name and seal, and the lease thereupon became an accomplished fact. By this act the Pennsylvania Railroad becomes possessed of about 500 additional miles of road and 65 miles of canal. The precise action of the Pennsylvania Railroad in the premises has not yet transpired. The schedules of property of the several companies are not yet completed, though it is possible possession to the new owners may pass at once.

A Narrow Gauge Railroad.

Some of the energetic citizens of Brighton and Brookline (Mass.) will petition the Legislature next year for a charter giving them the right to build a narrow gauge railroad between the former town and Boston. It is proposed to lay the track from Warren street in Brighton through the valley on the north of Cory Hill, passing near Coolridge's Corner in Brookline, and thence to Boston across the marshes, between the location of the Boston and Albany and the Boston and Providence Railroads. The gentlemen interested in this enterprise propose to build it at once. It will open a large and desirable section of country not built over, and will afford frequent and rapid means of conveyance between Brighton and Boston. This will be the first of the many narrow gauge railroads which will on account of the low cost of construction and the moderate expense of running, become popular and useful on short routes throughout New England.—*Boston Journal.*

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JUNE 30, 1871.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines have been		£775,882
Deduct—The ordinary working expenses (being at the rate of 68.26 per cent., against 69.96 of the corresponding half of last year)	£529,636	
The renewals, &c., of the permanent way and works in the half-year debited to revenue.	66,781	
		596,417
Leaving an available balance earned in the half-year of		£179,465
Deduct—Loss on American currency		7,129
Balance		£172,336

—in comparison with £137,708 at the corresponding period of 1870.

To this sum of £172,336 has to be added the balance carried from the net revenue account of last half-year of £1,118, making a total balance of £173,454. From this, however, has to be deducted the amount of postal and military revenue due for the half-year to the postal bondholders of £17,572, leaving the balance of £155,882 applicable for the following payments, viz.:

Interest on hired cars (6 months)		£20,994
Interest, &c., paid on lands		2,585
Interest, on mortgage to bank of Upper Canada		4,424
Interest on loans, bankers' balances, promissory notes, European exchange, &c		1,485
Interest on British American Land Company's debentures		616
Interest on Montreal Seminary debentures		616
Interest on Island Pond debentures		2,700
Half-yearly instalment on Portland sinking fund		2,568
Atlantic and St. Lawrence lease (in full)	£30,239	
Detroit line lease (in full)	11,250	
Montreal and Champlain Railway Company	11,977	
Buffalo and Lake Huron	25,000	
		78,466
1st equipment bond interest		15,000
2d equipment bond interest		8 115
Balance carried forward		18,312
		£155,882

Comparing this half-year with the corresponding period of 1870, the gross receipts show an increase of £71,315, or 10.12 per cent. There was an increase in the passenger receipts of £6,318 or 2.48 per cent., and in the freight receipts of £66,612, or 14.93 per cent.; but a decrease in the receipts from "sundries" of about £1,600. The total number of passengers carried was 764,376 against 700,334, and the freight conveyed was 666,092 against 612,959 tons. The above increase in the freight receipts was due to the through traffic. The local traffic, owing to the deficient harvest in Canada last year, showed a decrease, as compared with the June half-year of 1870, of about £56,000. The through traffic having been carried during the half year at lower rates than the local traffic, there was less profit than would otherwise have been earned. The average receipt per passenger was 6s. against 6s. 5d., and per ton of freight 15s. 5d. against 14s. 6d. The following table shows a steady growth of traffic both in passengers and goods; but it will be observed that while the average rate for goods is higher than during the previous year, it is still below the rates of the two former years; and the passenger fares showed an improvement of one penny per passenger only upon the lowest average since 1862. The rates and fares are, as the Directors have frequently explained, beyond the control of the executive; and when, as in the present case, a smaller proportion than usual of local traffic is carried, not only does the gross revenue of the half-year suffer, but the per centage of working expenses is at the same time increased. The high proportion of working expenses to gross receipts for the half-year is thus partially accounted for.

	Passengers.			Freight.		
Half-year.	Nos.	Average per passenger. s.	d.	Tons.	Average per ton. s.	d.
1871, June	764,376	6	0	666,092	15	5
1870, June	700,334	6	5	612,959	14	6
1870, Dec	937,879	5	11	611,809	14	0
1869, June	655,850	6	9	520,881	16	0
1869, Dec	892,697	6	3	557,157	15	7
1868, June	619,298	6	8	505,987	16	1
1868, Dec	804,815	6	9	523,685	16	3
1867, June	623,227	6	8	489,647	15	1
1867, Dec	794,213	6	10	527,227	15	4
1866, June	638,708	7	0	497,292	15	4
1866, Dec	792,487	7	2	523,685	15	5
1865, June	596,571	6	3	477,837	16	11
1865, Dec	784,346	7	2	523,830	15	5
1864, June	523,284	6	0	430,034	16	3
1864, Dec	722,446	6	6	443,930	16	1
1863, June	395,056	6	0	339,484	17	3
1863, Dec	529,783	6	5	372,984	15	1

The expenses for the half year amounted, including renewals, to £596,417, or 76.87 per cent., as against £559,702 or 79.43 per cent. of the gross receipts for the corresponding six months of 1870. Excluding the renewals, the ordinary working expenses were 68.26 against 69.96 per cent. The increased expenditure in the half-year, amounting to £36,715, or about 51 per cent. of the increase in the gross receipts, was mainly occasioned by the extra train mileage run for the additional amount of traffic carried. The total train miles run were 3,153,891 against 2,749,045, showing an increase of 404,936 miles, and the increase in the car mileage was 6,852,914 miles. The cost per train mile was reduced in the locomotive department from 30.78 cents, at which it stood in June, 1870, to 29.06 cents for the half-year. The number of miles of permanent way relaid during the half-year was 58½ These renewals were effected with re-rolled iron rails, the English manufacturers having failed to forward the steel rails to Canada in time to admit of their being placed in the line before the 30th of June. The Directors are happy to state, however, that there will be in the track before the close of the present year nearly 120 miles of steel rails, and it may be mentioned that, should the price for old rails continue as high as it has been during the current half-year, viz., $32, or £6 11s. 6d. a ton, it will not cost more to lay down steel rails than the company is now paying for iron rails re-rolled at Toronto. Seventy miles of ballasting have been completed during the half-year, at a cost of £6,250. The receipts in American currency during the half-year amounted to £370,500, of which sum £81,885 was converted into sterling. The price of the premium on gold fluctuated during the half-year between 110¼ and118. and the loss on conversion was £7,129 against £7,157.

A table here shows the gross and net earnings from January 1862 to June 1871 inclusive, in mixed currency and gold, the expenditure in renewals, and the direct loss sustained by the company from the depreciation of American currency.

The items charged to capital during the half-year are fully explained in the accounts. The total addition is £1,284,245, of which £1,230,000 represents the share capital of the Buffalo and Lake Huron Company converted into equal parts of Grand Trunk Fourth Preference and Ordinary Stocks, and £11,685 the capitalised interest certificates issued to that company for interest for a portion of the year 1870 upon their Fourth Preference Stock. The other items, for ballasting, new works, new rolling stock, &c., amount (less a credit of £28,441 on account of the Buffalo Company) to £42,560. The works of the International Bridge over the Niagara River, between Fort Erie

and Buffalo, have been vigorously carried on. The abutment on the Canadian side, and the three first piers from that side, are finished; the two first spans of the ironwork are in their places, and the third span is nearly complete. The abutment on the Buffalo side is also finished, and the abutment on Squaw Island and the piers in the Erie Canal are so far advanced that the ironwork will be placed upon them during the winter, the ice being employed as a platform for that purpose. The superstructure from the abutment on Squaw Island to the junction with the New York Central Railway will be completed early next year. But there has been some difficulty in regard to the four piers intermediate between Squaw Island and No. 8 pier on the Canadian side, in consequence of the thickness of gravel over the rock in that part of the river. It will be necessary to take the foundations of those piers down to the rock itself; and until they have been successfully founded and constructed it is impossible to fix any precise date for the opening of the whole work for traffic. The contract provides, however, for the completion of the bridge for the purposes of the railway on or before the first day of January, 1872. The Intercolonial Railway will, it is now expected, be completed during the year 1873. The only work on that line which gives cause for any doubt as to the date of completion is the crossing of the Miramichi River; and this, again, in consequence of the difficulty of foundations for the piers of the two large bridges which have there to be constructed. The line from Riviere du Loup to Metis on the Saint Lawrence will be completed early next year, as will also the section between St. John (N. B.) and Halifax (N. S.) The intermediate portion through the Metapedia Valley will be opened later, owing to the difficulty of obtaining sufficient labor in that district. But the progress of the works generally is described as being "everywhere most satisfactory." In connection with this subject it may be added that the railway from Bangor, Maine to the New Brunswick boundary is now complete. This connection between Portland *via* Bangor, with St. John, New Brunswick, and the Lower provinces generally, will, it is believed, be found to be of considerable value to the Grand Trunk Company. The results of the half-year's working may thus be summed up:—There was a considerable increase of through traffic, but a falling off, in consequence of the deficient harvest of the previous year, of local traffic; and the rates which were obtained for the through traffic, lower than those of 1870, and considerably lower than those of 1869, left a very small margin of profit on the extra quantity carried. The working expenses have been kept as low as was consistent with the system of improvement which was so much required, and which has been acted upon of late years, in regard to the rolling stock as well as to the permanent way. In pressing forward the renewal of the latter until all the more important parts of the line have been laid with steel rails, the directors believe that they are consulting the best interests as well as the wishes of the proprietors; but they have to contend with high rates of wages in consequence of the prosecution of so many other public works in Canada. The reduction from 30.78 to 29.06 cents in the cost of locomotive working per train per mile is satisfactory, as showing, so far, that the mechanical and permanent way departments are both improving in efficiency. Great progress has been made in the reconstruction of the trucks under the freight cars so as to bring the whole into one uniform system, and much improvement has been at the same time effected in the passenger stock. The directors are in this and other respects steadily preparing the way for comparative prosperity on the return to better rates, by means of which alone success can ultimately be attained. It is encouraging to find, under these circumstances, that the prospects for the present half-year and for the ensuing year are brighter than for some time past. Since the 1st July, 1871, there has been, up to the 30th September, a gross increase of £53,000 in the receipts, to which should be added, say £6,000 for an extra day in 1870. Mr. Brydges writes on the 30th August:—"We have had during the present year a very excellent crop in Canada, and there is also a very good crop in the Western States generally. The quantity of business therefore for the next twelve months is absolutely assured, and the rise which has commenced so early in rates is satisfactory evidence that they will stand at good prices during the next twelve months." If this anticipation proves to be correct, the combination of higher rates with a greater amount of traffic, ought to yield an amount of net profit exceeding any that has previously been realised in the working of the Grand Trunk Railway. The half-yearly reports of the engineer and the mechanical superintendent are appended: as is also the list of stock and bondholders whose names are now registered in the company's books.—By order,

RICHARD POTTER, President.

London, October 12, 1871.

Manchester and Lawrence Railroad.

The earnings of this road for the year ending March 31, 1871, were as follows:

From passengers		$79,677 60
" freight		54,247 81
" express		6,651 85
" mails		2,609 14
" rents		163 00
" Concord Railroad		42,324 52
		$185,674 92
Expenses, viz:		
Operating & repair'g road	$38,378 30	
Insurance and taxes	30,857 76	
Rent of Methuen Branch	11,000 00	
Mt. Washington Railroad	405 78	
Reserved for unsettled claims and contingencies	3,641 03	
		84,282 87
Net earnings		$101,392 05
From which have been paid two dividends of five per cent each		100,000 00
Leaving a balance of		$1,392 05

This balance, added to the amount of prior unappropriated income, as stated in the report of last year, ($51,336 53) increases the present balance of that account to the sum of $52,728 58.

The report says:

During the year seven miles of new fence have been built, one hundred and forty tons of new rails have been laid in the track, six thousand seven hundred and fifty new sleepers have been put in, three hundred and ninety feet of side track have been constructed at Lawrence, Mass., three hundred and ninety feet at Pond crossing in Salem, N. H., and six hundred and fifty-four feet at Methuen, Mass. There has also been a large extent of side track constructed upon land recently purchased and owned in common by our own and the Concord Road at Manchester, for the mutual benefit of both roads. This additional track at Manchester had become absolutely indispensable for the accommodation of the large amount of freight business.

The road-bed, track, buildings and rolling stock are in good repair and condition, and, it is confidently believed, they have suffered no depreciation during the past year.

A comparison of the receipts and expenditures of the past year with those of the preceding one, will show that, as we anticipated in our last report, notwithstanding the reduction in the tariff which took place May 2, 1870, there has been no diminution of gross receipts in consequence, but a slight increase. Had the last winter been as favorable for business as that of 1869-'70, we can hardly doubt that this increase would have been quite considerable.

No change in the relations between the Manchester and Lawrence and other roads has occurred since our last report.

The continued operation of the Suncook Valley Railroad for the past year, under the lease thereof, seems to confirm the opinion expressed in our last report, that the lessees will not be likely to suffer pecuniary loss from their connection with this road, although the expense of its completion has somewhat exceeded the estimate then made. Some negotiations have been entered into with a view to the extension of the Suncook Valley road to the Concord road at Hooksett, so as to dispense with the Hooksett Branch, and, by making an independent line from Hooksett to Concord on the east side of the Merrimack, prevent the suspension of travel in case of the destruction of the Hooksett bridge; but no definite arrangement has yet been concluded.

The excessive rent of the Methuen Branch has continued to be paid to the Boston and Maine road. The suit in chancery, instituted by that road for the purpose of breaking up our contract of Dec. 27, 1860, with the Concord Railroad, is still undetermined. At the last December term of the Supreme Judicial Court for Merrimack county, orders were made for closing the testimony and filing briefs in the expectation of bringing the case to a hearing at the approaching June term; but circumstances beyond our control have rendered a compliance with those orders impossible, so that the case cannot be heard at that time.

No final settlement of any matters between the Concord Railroad and our corporation, arising under the contract of Dec. 27, 1860, has been made or attempted, for reasons fully stated in former reports. We have received from that road during the year, on account of joint earnings from joint property and joint business, the sums indicated in the statement of earnings and expenses, but no general adjustment has been made. No interruption of the harmonious relations heretofore existing between the two roads is anticipated.

The number of miles run by passenger trains during the year was 55,295; by freight trains, 21,635—total, 76,930. Number of passengers carried, 130,825, equal to 2,341,940 carried one mile each. Total tonnage, 64,963, equal to 1,332,841 tons transported one mile.

It will be seen from the foregoing that the tonnage has increased from 56,224 in 1870, to 64,963 in 1871; and the number of passengers from 115,363 in 1870, to 130,825 in 1871.

TRIAL BALANCE, March 31, 1871.

Construction	$1,000,000 00
Telegraph	4,770 35
Hooksett Branch	18,000 00
Concord, Manchester and Lawrence Railroad	82,000 00
New car account, Vermont Central Line	17,353 60
Cash on hand	34,735 99
	$1,106,859 94
Capital	$1,000,000 00
Notes payable	8,800 00
Unpaid dividends	6,497 00
Income	91,562 94
	$1,106,859 94

President.—ASA FOWLER.

Directors.—Asa Fowler, Ezekiel A. Straw, Benjamin F. Martin, Joseph T. Goss, Edward A. Abbot, George B. Chandler, William W. Stickney.

Treasurer.—E. W. HARRINGTON.

Superintendent.—JAMES R. KENDRICK.

☞ The Boston and Maine Railroad Company have finished the survey of a new road from Nashua to Plaistow, a distance of 16 miles, which will shorten the present route from Nashua to Portland 36 miles. It will undoubtedly be built early next spring.

☞ The change of the gauge of the Maine Central Railroad from Waterville to Danville Junction was completed on the 11th inst.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Years ending.	Railroad: Main Line.	Railroad: Branch Line.	Railroad: 2d Track and Sidings.	Railroad: Railroad in progress.	Rolling Stock: Engines.	Rolling Stock: Cars: Pass.	Rolling Stock: Cars: B. M. RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 18, 1871.

Stock Exchange and Money Market.

Money has been in better supply, and borrowers have been enabled to obtain the necessary aid, in a temporary form, within the modified range of 5@7 per cent. In the discount line, there is a freer movement noted, with the choicer grades of business paper quoted at from 8@12 per cent. per annum. The domestic exchanges are rather more favorable to this centre, and the local bank and treasury currency reserves are stronger, which circumstances serve to increase the easy working of the market for money. The speculative call for accommodation is less urgent, particularly from the more prominent of the street houses, whose wants are quite promptly provided for, within the quoted range. The city banks, in their latest return, show an increase of $2,055,100 of legal tender notes, $1,008,600 of specie, and of $6,848,000 of deposits; also an addition of $2,701,800 to their loan and discount averages, and a reduction of $40,600 in their item of circulation. The city bank exchanges, last week, averaged $90,229,303; and thus far, this week, 104 millions daily. The banks now hold $7,838,850 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $18,991,500, against $17,124,489 same time last year. The city bank deposits are now $214,275,400 against $196,620,987 week ending Nov. 12, 1870. The legal tender reserve amounts to $54,462,300 against $53,832,019 same time last year. The circulation now stands at $30,184,400, against $32,879,568 same time last year. The loans are now $284,672,700, against $266,176,366 at this date last year.

The U. S. Sub Treasury enlarged its currency balance $1,155,255 and reduced its coin reserve $1,546,434, as the result of the week's business. The receipts of the office were $5,196,162 in coin, and $4,688,834 in currency; payments, $6,742,598 in coin, and $3,533,579 in currency. The office received $2,268,000 in coin or its equivalent, from customs; and disbursed $3,858,000 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,990,552 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $367,702,450; and as security for deposits of public money, United States bonds for $15,279,000. The aggregate of the outstanding circulation of the National Banks of the country is $324,946,862.

Government revenues have been yielding moderately since our last. The excises yielded last week about three millions, and thus far since July 1, about 51 millions. The customs at the port of New York, last week were $2,182,552; and at the outports, equal to about $750,000 more, all in coin, or coin certificates.

The receipts from customs at San Francisco, since Jan. 1, have been $6,661,000, against $7,104 000 same time in 1870.

Under the Treasury programme for November, Government proposes to sell Gold as follows; Thursday, Nov. 16—One Million. Wednesday, Nov. 22—Two Millions. Wednesday, Nov. 29—One Million. And to buy in Five-Twenties as follows: Tuesday, Nov. 21—One Million. Tuesday, Nov. 28—One Million.

The Gold speculation has been less active, and the price has been depressed, under increased offerings, in part because of the apprehension having been entertained in some quarters that large amounts of Government gold would soon come on the market, in connection with the final settlements on account of the new funding loan. But this source of supply, it is generally believed, will not add materially to the floating stock in any event. The customs and export call has been quite moderate. The range of the price during the week, has been from 111@111⅞ and the closing quotation on Wednesday was 111⅜ against 112⅞ the preceding Wednesday. The specie outflow, last week, was $368,846; on Tuesday of this week, $75,000; and on Wednesday $123,124. The Gold Exchange Bank clearances have been as follows: Nov. 9, $58.790,000; Nov. 10, $55 166,000; Nov. 11, $48,217,000; Nov. 13, $21,982,000; Nov. 14. $38,385,000; Nov. 15, $31,838,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Nov. 11th, 1871, $76,585,052, against $78,569,047 same time in 1870.

The export drain of specie was $368,846 last

week, against $410,135, same week preceding year. The shipments since January 1, 1871, have been $60,507,890, against $55,276,538 same time in 1870.

The specie exports by steam and rail from San Francisco, from Jan. 1, to Nov. 3, were $14,492, 565, and through the Post Office $10,993,181.

The customs demand for Gold last week, averaged $378,000 a day; thus far, this week, it has averaged $686,500 a day, or equal to a weekly aggregate of $4,119,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $546, and since Jan. 1, 1871, $8,403,063 against $11,204,528 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $139,205,617 against $126,629,705 same time in 1870.

Foreign exchange has been quoted stronger, on a very moderate offering of prime bills, and a rather better inquiry. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109¾@110.

The produce exports from this port, week ending with Nov. 14, were to the currency value of $4,793,905.

Government securities have been in much more confident request for home and foreign investment purposes at firmer prices, with unusually small offerings reported of all issues. The proposals to sell to the Treasury office on Wednesday were generally above par in gold, and, therefore unacceptable.

On Wednesday, Government bought in only $21,100 of Five-Twenties at 111 10@111 24 nett. The amount of bonds offered was $1,397,600 at from 111 10@111 85.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117½@117⅝; U. S. Five-Twenties of 1862, 111⅛@111¼; U.S. Five-Twenties of 1864 at 111⅜@111⅝; U. S. Five-Twenties of 1865, 111¾@111⅞; U. S. Five-Twenties of 1865 consolidated, 114⅛@114¼; U. S. Five Twenties of 1867, 114¾@114⅞; U. S. Five-Twenties of 1868, 114¾@115; U. S. Ten-forties at 109¾@110; U. S. Six per cent. currency bonds, 118⅜@118⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

The new Funding Five per cent. Loan was not quoted in London on Wednesday.

State bonds have been in fair demand but irregular as to price, South Carolina bonds, decidedly lower, under reports of the probable postponement of the payment of interest.

Railway and miscellaneous share property has been quoted stronger as to price though not active.

Railway bonds have been in fairly active request through the commission houses, and the favorites of the older issues have been firm and buoyant in price, with no considerable amounts offering. Central Pacific Sixes have been in good demand at 103@103¼. The offerings of this loan are in very small lots, and are quickly taken by purchasers at the current figures. For the Chesapeake and Ohio Sixes there has been a fair investment call, at the ruling price of 93 per cent. and accrued interest.

General business has been on a fair average scale for the season, with values pretty well supported for domestic produce. Middling upland cotton closed on Wednesday at 18⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 621,088 bales, against 720,995 bales same time in the preceding year; exports 216,000 bales, against 277,800 bales in the previous year; stock at the ports at latest dates, 301,600 bales, against 314,500 bales same date 1870.

At the Live Stock Markets, Beeves have been in less demand at from 7@13 cts.; Veals at 5@10½ cts.; Sheep at 4¾@6½ cts.; Lambs at 6½@8 cts.; Swine, in active at 4⅞@5¼ cts. per lb., all live weight. The week's receipts were 7,986 Beeves, 1,706 Veal Calves, 43,815 Sheep and Lambs; and 55,056 Swine.

Foreign goods have been in quite moderate demand and prices have been quoted less firm, in most instances. Metals and Sugars, stronger. The week's imports of foreign goods reached $6,323,017, including $1,838,445 of dry goods.

Ocean freights have been comparatively quiet, but rates have been quoted steadier toward the close.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Completion of another Railroad.

The Chicago, Danville and Vincennes Railroad Company have completed their road from Chicago to Danville, and the Evansville and Terre Haute Company have also completed their line North to Danville, thus forming a new and almost air line route from Chicago to the Ohio River, and thence by the Henderson line to Nashville and all points South.

The striking feature of this important work is that it places the Indiana block coal fields in direct connection with Chicago and the North West.

The Chicago, Danville and Vincennes Company are prepared to open their line with a large equipment, and (in connection with the E. & T. H. Co.) will at once place six hundred cars in the coal traffic alone.

The iron mills and other manufactures already established at Chicago require of this coal fully five hundred thousand tons per annum, which will be cheapened by the opening of this road more than one dollar per ton.

The road runs for its entire length through one of the most fertile sections of the State of Illinois, We also learn that it has been built with unusual thoroughness in all respects; and from its location as the shortest through route from the Lakes to the South, and especially in its advantages for the coal traffic, it must at an early day take rank with the best lines terminating at Chicago.

Railroad Progress in San Joaquin Valley.

The San Joaquin Valley branch of the Central Pacific road is being constructed at the rate of half a mile a day, southerly towards Bear Creek, which is within 90 miles of Visalia. The completion of the road to Bear Creek will change the current of both passenger and freight traffic between San Francisco and the southern and southeastern counties of the state. Passengers for Visalia, Bakersfield and intermediate points in the San Joaquin Valley, and mining districts in the mountains, now take stage at Gilroy, from which town to Visalia is a distance of 140 miles. The Pacheco mountain is crossed by this route and the road over it is very rough, dangerous, steep and very exhaustive to horse flesh. The distance over the mountain is 20 miles. When the road to Bear Creek is finished, passengers will be carried to that town, and there connect with stages for Visalia and other points. Fifty miles in distance will then be saved, and a perfectly level stage road will be had. The stages and stock of the stage line, via Gilroy, have been purchased and will be used on the new route via Bear Creek.

Freight to and from Kern county and the mining districts of Owens' river, Lone Pine, Kernville, Havilah, Sageland and Kelso, has heretofor gone by sea to Los Angeles, and been carried thence by teams, over several ranges of mountains, to Bakersfield and other points. The distance from Los Angeles to Bakersville is 150 miles; from Bear Creek to Bakersville is 160 miles. There are three mountains to cross by the former route, and high tolls are paid, while by the latter the road is free and runs over a dead level country. The importance of the mining districts named is little understood here. One fact, however, will give the public an idea of its extent. A Frenchman in Los Angeles owns 1,200 mules, which he keeps constantly engaged in carrying goods in, and bullion or ores out of the Owens' river country. In fact, one of the main sources of the prosperity of Los Angeles has lain in its being the shipping point for the majority of those mining districts.

There are now 34 families here who are going down to settle on Government land in Kern river valley. The owner of the stage line between Visalia and Bakersfield has for their benefit reduced the fare from $10 to $2 each, and an effort is now being made to have the railroad and stage company between this city and Visalia display equal liberality. The extension of railroads, the settlement of Government lands, the building of irrigating canals, and the passage of a no fence law, will revolutionise the face of nature in the San Joaquin Valley, which is yet destined, and that quickly, too, to be one of the richest and most reliable agricultural sections of the entire state.—*San Francisco Bulletin, Nov. 4.*

☞ The West Wisconsin Railway, which forms the chief link in the new and short through route from Chicago to St. Paul and the great North-West, will be completed, equipped, and in running order by the middle of November. The iron is down to within 10 miles of Hudson, and is being laid at the rate of a mile a day, and the grading throughout is finished. One hundred and twenty miles have been in operation for a year, and had a large and profitable local business, and a still larger amount awaits its completion through St. Croix County to the shore of the lake. The lumber traffic this winter will be very heavy. Immense quantities are already piled up at the mills on the line of the road awaiting the completion of the connection with St. Paul when it will be distributed over the treeless prairies of Minnesota and Iowa. Besides this local business the West Wisconsin will get a large share of the traffic between St. Paul and the North-West and the Lakes. It is a hundred miles shorter than the present line, and has direct connections with Chicago. The road has a valuable Land Grant of 1,000,000 acres in the best part of Wisconsin. This grant with the Road itself, is pledged in support of the First Mortgage 7 per cent. Gold bonds which may be bought at 90 and accrued interest in currency of White, Morris & Co., No. 18 Wall-st., and Gwynne, Johnson & Day, No. 16 Wall-st., Agents to the Company.

☞ The receipts of the Chesapeake and Ohio Canal Company for the month of October were $52,816 20; and the expenses, $15,025—leaving net earnings, $37,791 20. An appropriation of $75,000 was made to pay unfunded coupons accrued prior to July, 1854. This series is now the first lien on net tolls and revenues of the canal.

☞ The double track of the Flushing and North Side Railroad has nearly reached Woodside. Work will be pushed on the additional track until it reaches Flushing.

☞ The extension of the Bangor and Piscataquis Railroad from Foxcraft to Guilford was formally opened on the 10th inst.

Office of Fisk & Hatch, BANKERS AND FINANCIAL AGENTS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, No. 5 Nassau-st., New York.

We are now selling the last of the Chesapeake and Ohio Fifteen Million Gold Loan, secured by mortgage on the whole railroad property. These bonds combine perfect safety with a fair income, and a prospective advantage in their future market value. Holders of Five-twenties, or other Government securities, can exchange for these bonds, and realize a handsome increase in the amount of their invested principal and their annual income, without impairing the security of their investment. They are issued in $100, $500, $1,000, either coupon or registered; interest six per cent. gold, payable May and November. Price, for the present, 93 and accrued interest from Nov. 1. We recommend them to our friends and customers with the same confidence with which we have always recommended the United States Government and the Central Pacific Bonds.

We continue to buy and sell Central Pacific Bonds, and fully expect they will, in time, reach the price of Five-twenty Bonds. They are dealt in at all the principal money centres of the world. The Company have none left, and can issue no more on their main line, as the amount was fixed by act of Congress at $25,885,000. The property pledged to secure the bondholders is worth fully one hundred million dollars; the net receipts of the road for the year will be nearly three times the interest payments thereon.

We buy and sell Five Twenties, Ten-forties, Eighty-ones and Central or Western Pacifics, or receive them in payment for Chesapeake and Ohio Bonds at their current market price.

Deposit account of banks, bankers and others received, on which we allow four per cent. interest. Checks payable on presentation, without notice, the same as at a national bank.

FISK & HATCH.

Harvey Fisk.
A. S. Hatch.

☞ The new branch of the Connecticut River Railroad, from Mount Tom station to Easthampton, is so nearly completed, that a locomotive passed over the entire length on Tuesday evening. Trains will not be run regularly, however, for ten days yet.

☞ Messrs Wolf, Carpenter & Co. have bought at sheriff's sale the road bed, depot grounds and franchises generally of the St. Louis and Cedar Rapids Railroad from Ottumwa to Sigourney, for $50,000.

☞ Mr. William H. Turner has been appointed superintendent of the Portland and Rochester Railroad, and has accepted.

☞ Nathaniel G. White Esq., of Lawrence, Mass., has been unanimously elected President of the Boston and Maine Railroad Company.

☞ The track of the first passenger railway in Camden, N. J., will be completed this week as far as Kaighn's Point.

☞ A charter will be applied for, at the next Legislature, to build a railroad from Bridgeton to Millville, New Jersey.

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—CARRIAGE OF GOODS BY SEVERAL CONNECTING LINES—GUARANTY BY FIRST COMPANY AS TO TOTAL COST—RIGHTS OF SUBSEQUENT CARRIERS.

The facts in the recent case of Schneider *vs.* Evans, (25 Wisc., 241,) are fully and clearly stated in the following opinion by—

PAINE, J.—There can be no doubt that the contract between the plaintiff and the Pittsburg, Fort Wayne and Chicago Railway Company was not what is called a through contract. That company did not undertake to carry the goods to Hudson; on the contrary, it expressly restricted its liability as a carrier to its own route. It did, however, guaranty, on its behalf, and in behalf of the other companies and carriers constituting the entire route, that the through freight should not exceed a certain sum. But it is a stipulated fact in the case, that each of the companies acted independently, and that did not form a continuous line, interested together in the transportation over the whole route. It is clear, therefore, that each of the succeeding carriers, after the first, had the right to charge its usual rates, without regard to the guaranty of the first company, even if this had been known. This is not disputed. But the respondent's counsel very ingeniously and forcibly urges, that although this was so, yet, when the succeeding companies decided to change their usual rates, that diminished, by the amount of the excess over the guaranteed rate thereby caused, the sum which the first company was entitled to; and that, therefore, the Chicago and Northwestern Company ought to have deducted the amount of such excess from the back charges which it paid to the Pittsburg, Fort Wayne and Chicago Company; and that it could not, by improperly paying over that amount to the first company, acquire any lien on the property as against the plaintiff for that sum, nor transmit any such lien to the succeeding carrier, who might receive it, paying also the same sum as a part of the back charges.

If the guaranty of the first company had been known to the others, the question would have been more difficult. But it is not entirely clear to my mind that even then the position of the respondent's counsel would have been correct. If it could be assumed that the Chicago and Northwestern Company, which received the property from the first company, could have known or readily ascertained the exact amount which the first company might ultimately be entitled to, after complying with its guaranty, there would be more force in the argument; but this could scarcely be assumed. There were several succeeding carriers after the Chicago and Northwestern. It might not have known what their usual rates would be. If it had known this, it might not know whether they would all charge their usual rates, or whether some of them might choose to conform to the rate guaranteed by the first company. It would seem impossible, therefore, for it to be liable to adjust the controversy between the plaintiff and the first company, that might arise on the guaranty. Yet it would be evident on the face of the contract that the plaintiff desired the property to be transported, and that he contemplated the employment of the succeeding carriers on the route for that purpose. This the Chicago and Northwestern Company would have had the right to assume, even if it had known the exact terms of the contract. It would also have had the right to assume that the plaintiff knew the general custom among carriers so situated, of receiving goods from each other and paying back charges. And under such circumstances it seems to me extremely questionable whether it would not be reasonable to say that the second carrier would have the right to receive the goods, paying the back charges demanded by the first, as though its guaranty was to be complied with by the other companies, leaving the plaintiff to resort to his contract to recover whatever he might be entitled to, when the fact should be ultimately ascertained. But as this question is not presented, I will not pursue it further. It is conceded here that the other companies, after the first, had no knowledge of the contract between the first and the plaintiff. Upon these facts, it seems to me clear that the carriers who have acted in accordance with the usual general custom, which the plaintiff is presumed to have known, and probably did well know, in fact, ought to have their lien for the ordinary back charges paid by them. It would be unreasonable, where nothing accompanies the goods to notify them of the fact, to require them to ascertain at their peril whether there are any secret stipulations between the owner and some prior carrier from whom they have been received, which may ultimately prevent him from being entitled to the ordinary rates.

It is not like the case of goods being delivered to a carrier by a person having no authority to deliver them, and then the carrier claiming a lien for the charges as against the true owner. Some cases have held that there the carrier has no lien, because the owner's title cannot be thus divested or incumbered. It is not a case where the goods have been diverted from their true destination; on the contrary, the goods have been transported over the whole route, exactly in accordance with the authority and intention of the owner. It is a mere question, where the owner has taken a guaranty from the first carrier that the through rate shall not exceed a certain sum, whether the others, having no knowledge of it, are not entitled to act upon the general custom. It seems to me that they are, and that it is more reasonable to impose on the owner, who, knowing the custom, causes the goods to be delivered to the carriers, without notifying them of his secret contract, the burden of resorting to the company with which he contracted, than to impose on the carriers the burden of ascertaining at their peril all the secret agreements between the shipper and prior carriers from whom the goods are received, affecting their right to receive the ordinary freights.

The custom under which these carriers acted is more for convenience of shippers than of the carriers. It enables property to be transported over long routes, composed of many distinct companies and lines, with great safety and dispatch, and without the necessity of employing any intermediate agents other than the carriers themselves. If, therefore, the risk is to be imposed on each, to ascertain at its peril whether there are any secret agreements affecting the liability of goods received in the ordinary course of business to the ordinary freights, this liability must result in breaking up the custom, and thus tend greatly to the public inconvenience. Upon the facts found, the defendants were entitled to their lien for the back charges.

The judgment should be reversed, and the cause remanded with directions to enter judgment for the defendants.

So ordered.

Delhi and Middleburgh Railroad.

At a recent meeting of citizens of the counties of Albany, Schoharie and Delaware favoring the construction of a railroad from Delhi through Middleburgh, and thence to this city, held at Stamford, the report of the preliminary survey of the route from Middleburgh to Clarksville in this county, by John J. Way, Chief Engineer, was presented. The remainder of the survey to this city, it is expected, will soon be completed. The report of the survey from Stamford, Delaware county, to Middleburgh, was also read. The feasibility of the project was favorably discussed by a number of gentlemen present, and the following committee appointed in the towns in this county interested, to canvass them as to what they will do in the way of bonding for the proposed railroad: New Scotland, Rushmore Bennett, Philip Hotaling, Hiram Crounse; Bethlehem. William Snyder, Henry Mead, Jurian Winne; Berne, Z. Dyer, Harvey Brownell, Harvey Warner. Henry Crounse was also appointed to confer with the citizens of Albany and ascertain the assistance they will probably give to the enterprise. The meeting was then adjourned until the 20th of December next, to meet at the Atchison House, Middleburgh.—*Albany Journal.*

Indianapolis, Cincinnati and Lafayette R. R.

The annual meeting of the stockholders of this company was held at Indianapolis on the 4th inst. J. A. Pomeroy of Cincinnati in the chair. The minutes of the preceding meeting were read and approved, after which an el ction for nine directors was held. Before the result of the balloting was announced, Mr. Ingalls was called upon for the report of the receivers, which he presented and read, as follows:

To the Stockholders of the Indianapolis, Cincinnati and Lafayette Railroad Company:

Your road during the past year has been in the hands of the undersigned, as officers of the court, and it is proper that we should give you some statement of what it has earned and how its income has been spent.

When the company and its affairs were put into the control of the court, on the 26th of October, 1870, it was operating its own line and also what was known as the Cincinnati and Martinsville Railroad and the Whitewater Valley Railroads.

We continued to operated the Whitewater Valley Railroad until May 1, 1871, when they went into the hands of the Whitewater Valley Railroad Company. By the terms of settlement we obtained the release to the Indianapolis, Cincinnati and Lafayette Company of $85,000 due their company for past rent, and also made an arrangement by which we utilized and made a source of future income, $27,000 of Harrison Branch stocks, and $50,000 of Hagerstown certificates. We also made a running arrangement with those roads, which thus far has worked satisfactorily to both parties.

We have operated and are still operating the Cincinnati and Martinsville Railroad. It will be seen that its earnings are small, but during the last six months they have steadily increased. We have spent and are still spending money in improving its track, &c.

This division has been under the management of Gen. John C. McQueston, a careful and faithful officer,

From the 26th of October, 1870, to the 1st of November, 1871, our receipts and expenditures have been as follows:

Earnings from October 26, 1870, to November 1 1871, Main Line....	$1,636,138 06	
Earnings from October 26, 1870, to May 1, 1871 Whitewater Valley Railroad....	98,457 65	
Earnings from October 26, 1870, to November 1, 1871, Cincinnati and Martinsville Railroad.....	81,564 64	
Net income from C. and I. rents...	16,663 61	
Total from all sources.....	$1,827,823 96	
Operating expenses from October 26, 1870, to November 1, 1871, (including taxes and $110,000 spent in extraordinary repairs and renewals)...	$1,205,510 53	
Bond interest accruing per annum....	558,040 00	
	1,763,550 53	
Net earnings after paying operating expenses, taxes and bond interest.	$64,273 43	

Of the $558,040 bond interest mentioned above, $223,020 remains unpaid, a portion of the receipts having been used in payment of debts on account of old company, which are as follows, viz:

Taxes....	$26,681 95
Rents....	23,567 91
Sundry debts, due employees, &c....	103,228 32
Am. Merch. Union Express Co.....	27,550 36
Appropriated to B. & O. R. R. by M. & C. R. R., on account of rents....	45,000 00
Total....	$226,028 54
Add bond interest paid and chargeable to old company....	26,562 50
Total payments on account old company....	$252,591 04

It will be seen that our operating expenses have been large, but this is due in a measure to the condition in which we found the road and equipment.

For two years previous to the receivership the financial condition was such that nothing was done that could by any possibility be avoided. Consequently the iron and rolling stock was very much dilapidated.

Accompanying this report will be found reports in details from our master machinist and master of road and engineers.

By them it will be seen that we have thoroughly overhauled every engine on the road, that a large number of freight cars have received extensive repairs, that the whole passenger equipment has been kept in first class order. In addition to repairs and rebuilding, we have built one new first class passenger coach, two new baggage and mail cars and sixteen coal cars.

We have added new equipments worth at least $25,000, and we have spent over $30,000 over over and above what would be needed for ordinary repairs and renewals if the rolling stock had been in good order.

We have bought, under the direction of the court, three new freight locomotives, to be delivered this month.

With these, and the expenditure of $50,000 during the next year upon our locomotives and cars, over and above what will be required for ordinary repairs and renewals, the equipments will be in first class order.

In the road department, extensive repairs and improvments have been made.

On the 179 miles of road from Cincinnati to Lafayette 2,510 tons of iron have been laid and 82,500 ties.

One new bridge has been built to replace one burned, and two have been built in place of old ones.

A large sum of money has been spent upon water stations and depots in renewing and improving them.

Nearly a mile of new sidings have been laid, at an expense of over $5,000.

At least $50,000 has been spent in this department over and above what would have been required for renewals and ordinary repairs if the road had been in good order when we took it. It will require next year for new rails and bridges about $50,000 over and above the ordinary repairs, to place the road, stations and bridges in first class order.

Our relations with connecting roads are all friendly. The business of the road is steadily increasing.

Our trains are running with great regularity, and without accident.

The employees of the road, as a class, are far above the average, and are working diligently and faithfully for its interests.

It will be seen that the income of the road from rents from real estate the past year has been something over $16,000.

During the year we have leased various portions of the real estate of the company unoccupied, at such rates that the income from this source next year will be over $60,000, and there will be a saving besides in taxes which the lessees pay, of about $10,000, making a gain to the company of over $50,000 over last year; and also a reduction in depot expenses and repairs, by admitting other roads to their use. If the contract with the Ohio and Mississippi Railroad, which has been partially made, should be ratified, it will increase this sum $15,000 per annum.

The Cincinnati and Springfield Railroad Company (an extension of the Cleveland, Lake Shore and New York Central line), is building a road into Cincinnati, and have leased a portion of our grounds and depot. This will undoubtedly give a large increase of business. At Lafayette, the other end of the road, the Lafayette and Bloomington and the Cincinnati, Lafayette and Chicago Railroads are about completing their roads, and they also rent our grounds and depots. These are very valuable connections with Chicago and the West. We have been able to prevent the sacrifice of any of the collaterals of the company thus far, and all the secured creditors are charging a moderate rate of interest, not exceeding eight per cent. in any case, and in nearly all seven.

We owe no debts as receivers, except for current expenses of the month just ended, a large portion of which has been paid or the money drawn for.

The financial condition of the company, as near as we have been able to get at it, is as follows;

Bonded debt authorized....	$8,400,000
Bonds actually sold (most of the balance being out as collateral).....	7,972,000
Coupons unpaid (about).....	400,000
Debts secured by bonds, real estate, &c.	450,000
Preferred debts.....	50 000
Claims in litigation.....	50 000
Unsecured debt (about).....	740,000
Indianapolis, Cin. and Lafayette stock	5,685,490
Cincinnati and Indiana stock outstanding actually sold.....	43,000

The agreement for reorganization having been signed by more than two thirds of the holders of unsecured debts and of the bonds of 1869, we hope the legal complications of the company will be speedily settled, and the property placed in your hands.

From the business of the past year and the prospects of the future, in our judgment the property can earn interest upon all its bonded debt, and leave a surplus sufficient in a few years to pay off all its floating depts. You will then have a very valuable property in the stock.

T. A. MORRIS,
M. E. INGALLS.
Cincinnati, Nov. 4, 1871. Receivers.

On motion of Mr. Broadwell, the report was received, and the course of the receivers approved.

Judge Hoadly suggested that the plan of reorganization be read for information. He afterwards moved the following, which was adopted unanimously.

Resolved, That the stockholders of the Indianapolis, Cincinnati and Lafayette Railroad Company approve the plan of reorganization signed by more than two-thirds of the holders of the bonds of 1869 and floating debt creditors of the company, and hereby authorize the board of directors to file in the name of the company a voluntary petition in bankruptcy, or to submit to an adjudication of bankruptcy now pending upon the petition of Joel F. Richardson and others, and upon any other petition that has been or may be filed, or to consent to a sale under proceedings for foreclosure as said board may deem best and in case of a sale of the whole or any part of the property or franchise of said company, under any of said proceedings or otherwise, the stockholders hereby authorize the said board to convey such property and franchises so sold to the purchaser, by way of further assurance, or otherwise, as said board may deem best.

The judges of election reported the following as duly elected to serve as directors for one year; Geo. H. Chapman, Indianapolis; Augustus S. Winslow, S. G. Broadwell, J. A. Bates, Joseph C. Butler, Cincinnati; William A. Booth, George Bliss, John S. Kennedy, New York; Thomas H. Perkins Boston.

The whole number of shares is 113,667, of which 63,526 were represented in the election.

Immediately after the meeting of stockholders, the directors met for organization, with the following result: Wm. A. Booth, President; A. S. Winslow, Vice President; Chas. H. Booth, New York, Secretary.

Atchison, Topeka and Santa Fe Railroad.

The road bed on the connecting link between Topeka and Atchison is so far completed that it is expected the road will be in running condition within ninety days. The road is now open from Topeka to Newton, a distance of 137 miles, and in October the gross earnings were $57,000, net earnings $27,000. This road is to be extended, and the Kansas State Record says:

Mr. Peter, the General Manager of the Atchison, Topeka and Santa Fe Railroad, has just received a report from Engineer Ellenwood. It is known that Mr. Ellenwood with the necessary outfit has for some time been surveying the proposed extension of that road Southwest. He has been accompanied by a Government escort. The party has just returned to Fort Dodge, having surveyed the line to Fort Union, New Mexico, and finds the route a practicable one. As soon as he returned to Fort Dodge he dispatched a party under charge of Gen. Strickler, to survey a route South to Rock Salt, which is at nearly the Southern line of the State on the Osage lands.

Mr. Ellenwood himself is now running the line West up the Arkansas River, and if not stopped by heavy snows will complete the survey to Pueblo, New Mexico, before he returns. It will be seen that this Company are pushing ahead with great energy. The time is not far distant when trains will be running from Topeka to Santa Fe,

Kentucky and Great Eastern Railroad.

We have been shown a letter from the president of the Kentucky and Great Eastern Railroad Company stating that arrangements have been perfected in New York city for putting the whole line of that road, from Newport to the Big Sandy, under contract so soon as the requisite subscriptions shall be made by the other counties along the line. Immediately after the counties make a favorable response the surveys will be made, and the work will be commenced all along the line. The grade of the entire road will probably be completed before any of the iron will be laid, and the people of all the counties will have an irreversible guarantee of the completion of the road in all its length before they will be asked for a dollar of their bonds.—*Maysville Eagle.*

☞ Col. John E. Gowen has entered into a contract to build and equip the Newburyport and Amesbury Railroad—a distance of six and one-half miles—and will commence the work forthwith.

Riviere du Loup Railway.

The Government of New Brunswick has ratified a contract with a company, composed of E. R. Burbee, I. Burbee, C. H. Fairweather, Bois Devebor, Alex. Jardine and John Boyd, each of whom subscribe $15,000, twenty-five per cent. of which is paid down, to build the Riviere du Loup Railway, under the Provincial act of 1870. The company are to commence operations during the present month at St. Mary's, on the side of the St. John river, opposite Fredericton, and are, by the terms of the act, allowed till 1879 to complete the road to Edmunston Little Falls, a distance of 180 miles. They, however, of their own motion agree to complete the first forty miles before the expiration of next year. This road is to be on the east side of the St. John river all the way to Edmunston, with a branch to Woodstock, about four miles long, including a bridge over the St. John at that place which will connect with the New Brunswick and Canada Railway, and from it with the Houlton Branch and European and North American Railway. The main line, however, will lead to Fredericton from the upper country, and over the branch railway from that city to the European and North American Railway, which runs to St. John. The Government is to give a subsidy of 10,000 acres of land per mile, the land being on the east side of the St. John, in the counties of York, Carleton and Victoria, and the aid in money voted by those counties already amounts to $250,000, besides stock to the amount of $25,000 already subscribed by the New Brunswick and Nova Scotia Land Company, and aid from the city of Fredericton. St. Stephen railroad men will aid the enterprise.

Cohoes and Waterford Railroad.

Articles of Association of the New Cohoes and Waterford Railroad Company have been filed in the office of the Secretary of State. This road commences at a point near the Canal bridge on Broad street, in the city of Cohoes, and terminates in the village of Waterford, at a point hereafter to be determined; and the road will be constructed entirely within the counties of Albany and Saratoga. The length is two miles, and the capital stock $25,000. The number of the directors is thirteen, as follows: Chas. H. Adams, David J. Johnston, Henry S. Bogne, Murry Hubbard, Earl L. Stimpston, James E. Crawford, Henry Brockway, Jehial W. Himes, James B. McKee, Norman W. Frost, Chas. F. North and John Wakeman, all of the city of Cohoes; and Abner J. Griffin of the town of Waterford.

A Narrow Gauge Railroad to the East.

If the sensible reader will examine a table of exports by railroad for the past ten months of this year and note the comparison of figures there given with those for the same months of 1870, it will become at once apparent that one of the greatest needs of the hour *now* is an important increase in our railroad service Eastward. The present service has been so crowded with our business as to find it necessary several times to advance the rate of freight to a prohibitory price; even then the demand for cars was far beyond their capacity to supply. There is a certain class of trade which *must always go by rail* from this city, no matter how the river is, and this class of trade is so rapidly upon the increase, and our present rail facilities Eastward are so poor and uncertain, that the building of a new line, to be run for the especial benefit of this city, is imperatively demanded. A three foot six inch gauge, double track, equipped with six thousand freight cars, is what we want. This question is receiving much attention now, and we intend devoting such space and time to its further development as the matter seems to warrant. Every proposition must have a beginning and we may as well accept the present moment as an auspicious time for planting the seed of this important enterprise.—*St. Louis Democrat.*

Illinois Central Railroad.

The statement of this Company for the month of October, 1871, is as follows:

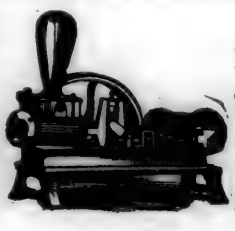
LAND DEPARTMENT.

Acres Construction Lands Sold	1,701.76 for	$17,411 84
Acres Int. Fund Lands sold	..... for	.....
Acres Free Lands sold	40.00 for	836.00
Total sales during month of October, 1871	1,741.76 for	$18,247 84
To which add Town Lot Sales		205 00
Total of all	1,741.76 for	$18,542 84
Cash collected in October, 1871		$94,913 20

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 402 Miles.	Total. 1109 Miles.
Freight	$400,450 00	$99,806 00	$500,256 00
Passengers	138,934 00	43,899 55	182,833 55
Mails	6,375 00	3,059 33	9,434 33
Other sources	65,500 00	2 940 67	69,440 67
Tot. Oct., '71	$612,259 00	$149,705 55	$761,964 55
Tot. act'l earn'gs, Oct., '70	$734,363 66	$168,861 77	$903,225 43

☞ The following gentlemen have been elected directors of the Hannibal and St Joseph Railroad Company: Jacob S. Rogers, E. S. Higgins, A M. Ramsdell, A. B. Baylis, Henry Smith, John P. Acker, George Bolton Alley, J. M. Whitcomb and Daniel S. Miller. President, Henry N. Smith; Vice President, Benjamin F. Carver; Fiscal Agent, John P. Acher. The office of the company is to be transferred from Boston to New York.



☞ The Tuckerton (N. J.) Railroad, extending from Whiting's Station on the New Jersey Southern Railroad to Tuckerton, a distance of 29 miles, will be opened for travel on the 20th inst.

HOME
INSURANCE COMPANY,
No. 135 Broadway,
Branch Office, No. 586 6th-av.

The Officers and Directors invite the attention of the public to the following Certificate of the Superintendent of the Insurance Department, showing the condition of the company on the 1st November, 1871.

CHAS. J. MARTIN, Pres.
J. H. WASHBURN, Sec.

INSURANCE DEPARTMENT,
ALBANY, N. Y. Nov. 10, 1871.

Having at the request of the officers, made an examination of the affairs of the Home Insurance Company, of New York, I find that company had, on the 1st day of November, 1871, of well-invested and available assets,

$4,813,560 94.

LIABILITIES WERE:

Chicago Losses, deducting amount reinsured	$2,139,213 00
Other Liabilities	291,326 79
	$2,430,539 79
Amount required to reinsure all Outstanding Risks	1,375,000 00
	$3,805,539 79

Amount of Assets over all Liabilities, except capital,

$1,008,021 15.

The Capital Stock of the Company is

$2,500,000.

THE OFFICERS HAVE THIS DAY BEEN DIRECTED TO REQUIRE THE STOCKHOLDERS TO PAY UP THE DEFICIENCY, OR **SIXTY** PER CENT. OF SAID CAPITAL STOCK WITHIN FORTY DAYS.

THE PRESENT ASSETS AND THE PROSPECT OF A SPEEDY REPAIRMENT OF THE CAPITAL STOCK OF THE COMPANY ARE QUITE SUFFICIENT, IN THE OPINION OF THE SUPERINTENDENT, TO JUSTIFY THE CONTINUANCE OF PUBLIC CONFIDENCE.

GEO. W. MILLER, Superintendent.

Chesapeake & Ohio Railroad.

NOTICE TO BRIDGE BUILDERS.

SEALED PROPOSALS will be received by the undersigned at Richmond, Va., until 12 M., Dec. 6, 1871, for about 2,000 feet of IRON BRIDGING, in spans of from 20 to 130 feet.

Proposals for any part or for all will be received.

These bridges are for the extension from White Sulphur Springs to Millers Ferry on New River, West Va.

Circulars containing a description of the spans, etc., can be had from

H. D. WHITCOMB,

United Companies' Lease.

On reviewing the lease of the "United Companies," in which the Camden and Amboy is included, we find that the consideration is ten per cent. per annum on the capital stock of the several companies, which is payable by the Pennsylvania Railroad Company, the lessees, to the officers of the "United Companies," the lessors, in a round sum, at each quarterly period, the lessors paying it out to their respective shareholders. This being the case, the stockholders may, without consulting the Pennsylvania Railroad Company, increase their number of shares at pleasure, and if they prefer, as they probably will, may so add to the number as that at 7 per cent. per annum it will evenly absorb the aggregate sum now required to cover 10 per cent. on the present amount of capital—that is, adding 4 shares to every 10 or 40 to every 100 shares. This is considered an advantage to the stockholders, and we are informed that the larger holders, and especially those at New York, are in favor of such an augmentation of the number of shares. There is another consideration favorably affecting the value of the shares of the "United Companies," which the holders before parting with them should duly consider, namely, that there is now nearly due 7 per cent. on the stock—2 per cent. from the July dividend, 2½ per cent. due in October, and 2½ per cent. to become due in January, now less than a month and a half off. We note these facts that all parties, buyers and sellers, may be duly advised in the premises.—*Philadelphia Ledger.*

Bochumer Verein fur Bergbau und Gusstahl-fabrication. Bochum in Westphalien.

The above is the German name for the Bochum Mining and Cast Steel Manufacturing Company, in Bochum, province of Westphalia, Prussia, represented in this country by Messrs. H. Boker & Co., in New York, whose card will be found in our advertising columns. With all due deference to the Teutonic taste for euphony in language, it scarcely can be considered a matter of doubt whether Herr Krupp's name would have become so familiar to the Anglo-Saxon race as to be almost a household word, if its pronunciation were as difficult as the correct rendering of the above title must appear to most of our readers. However, the name of the Bochum Company is closely linked to Krupp's in the history of the development of that vast industry which, in our era of railways, steamboats, and steel cannon wars, has become second to none in importance,—the manufacture of so-called machinery cast-steel.

Without further reference to Krupp's doings, with which our readers are more or less acquainted we propose to give some particulars about Bochum, which we take from the printed catalogue of the company, issued at the time of the Paris exhibition of 1867, at which the display of Bochum steel created great sensation. Among other articles were exhibited—

4 cast steel bells, the largest weighing 32,500lbs. or about 15 tons.
1 cast steel fly-wheel shaft, weighing 6,000lbs.
2 sets steel car-wheels.
1 set cast steel locomotive driving-wheels, 5½ ft. diameter, cast full size, with tread and flanges on.
22 cast steel wheel discs, cast in one block, weighing about ten tons.
1 cast steel press cylinder, weight 6 tons, for hydraulic press.
1 cast steel locomotive cylinder, complete, cast in one piece.

The Bochum Company received, among other awards, the great gold medal of honor at the International Exhibition of Paris in 1855; three prize medals at the London Exhibition of 1862; and a gold medal at the Paris Exhibition of 1867.

Continuing to extract from the catalogue, we note that the Bochum Cast Steel Works, now the second largest in the world, were founded twenty-five years ago, and were purchased fourteen years ago by the present company. The principal products are cast steel wheels, axles, tyres, springs, church bells, cannon and Bessemer rails. In the cast steel works 2,500 workmen are employed. The company also owns coal and iron mines and blast furnaces.

The process of casting steel in moulds—as especially used in the casting of bells—was invented some twenty years ago, by Mr. Jacob Mayer, cofounder of the establishment, and yet at present its technical director. The right of using this invention has been granted to Messrs. Jacob Holtzer & Co., at Unieux, France, and to Vickers, Son, & Co., of Sheffield.

The total production of Bochum in some articles up to the date of the catalogue is given in round numbers as follows:

Cast Steel Car Axles, 40,000. Beside, several thousand locomotive axles are mentioned, as also a large number of cast steel steamship shafts, the latter mostly of the Rhine steamers.

Cast Steel Springs, 150,000. Of which were delivered to the

Berg-Mark Railway	33,000
Cologne-Minden	15,000
Nether-Silesia-Mark	10,000
Hannover	8,000
Prussian Eastern	6,600
Nassau	4,500
Rhenish	3,500
Westphalia	3,700
Aix la Chapelle-Dusseldorf	3,000
Magdeburg-Leipzig	3,500

Cast Steel Tyres, 40,000. Delivered to—

A. Borsig Locomotive Works Berlin	3,700
Prussian Eastern Railway	3,000
Austrian State	2,000
Hannover	2,000
Grande Societe Russian	1,700
Berg-Mark	1,000
Nether-Silesia-Mark	1,000
Cologne-Minden	600
Rhenish	500
Swiss Central	500
Prussian Saarbrucken	800
Berlin-Stettin	500
Sundry French Railways	700

Cast Steel Wheels (production for 7 years), 20,000. Delivered to—

Hannover State Railways, and 1,400 to deliver.	3,000
Cologne-Minden	2,500
Nether-Silesia-Mark, and 500 to deliver.	3,000
Prussian Eastern, and 570 to deliver.	800
Berg-Mark	550
Berlin, Potsdam-Magdeburg	550
Grand Societe Russian Railways	500

The Eastern Prussian Railway also received 200 cast steel locomotive driving wheels.

Bells. The Bochum Company manufacture steel church bells, from 14 inch to 10 feet in di-

ameter, weighing from 60 pounds to 15 tons each. Its catalogue mentions 397 churches all over Europe, to which in all 844 steel bells have been delivered. The company has also made about 1,500 smaller bells and gongs for railways, schools, and industrial establishments.

Cannon. The first Bochum steel gun—a 3 lb. muzzle-loader, French system—was made by Mr Jacob Mayer, in 1847, and a few cast steel guns were delivered since 1859 to the governments of Italy, Wurtemberg, Prussia, and Great Britain. However, this specialty, which for a term of years was nearly monopolized by Krupp in Essen, has only been developed at Bochum in later years.

From the last printed report of the stockholders' meeting, held September 1st, 1871, we see that the Bochum Company has made remarkable progress since the above details were published. At present 8,000 workmen are employed in the cast steel works, and 400 men in the coal mines. In spite of the adverse influences during and consequent to the late war, the value of the cast steel production of the fiscal year is estimated to reach the sum of three and a half to four million thalers.

The wheel factory now turns out 60 cast steel wheels per day. Of cast steel cannon, 150 breech-loaders, ordered by the Turkish government, are now in process of construction. A cast steel marine gun 8 inch bore (21 centimetres) has just been experimented upon by the Prussian Ordnance Commission, and, with a test of five hundred rounds, has given very satisfactory results. The United States Ordnance Department have also recently completed tests with a Bochum cast steel block, 2 feet in diameter (under supervision of the late Gen. Rodman at Rock Island arsenal), which are very creditable to the Bochum steel for its tensile strength and elasticity, the most desirable qualities for heavy ordnance.

At the last meeting, the company declared a dividend of ten per cent. on the stock, and an issue of half a million thalers additional stock at a premium of thirty per cent. was resolved upon.—*Am. Railway Times.*

The Viaduct Railway and Mr. William Butler Duncan.

To the Editor of the New York Times:

DEAR SIR: I have thus far resisted your efforts during the past Summer to provoke from me a reply to your insinuations regarding the Viaduct Railway Company, especially connecting my name therein with the names which have lately become so disgracefully prominent; and nothing would now tempt me to address you, except that if I do not at once pronounce the statements in your issue of this date to be incorrect, the public might have a right to regard silence as giving consent thereto.

I have been for years interested in and occupied with the several schemes for providing rapid transit from one end of this island to the other—in which, however, I have had no personal interest to serve beyond that which I regard as the duty of every one interested in the future of this city, to which I have been willing to devote a good deal of time. I have never thought it possible to accomplish the fulfillment of any of these projects except with the hearty consent and good will of the city authorities, and therefore, when the viaduct charter was submitted to me, after its passage by the Legislature (having never seen it before), I saw in it the elements of success.

I have believed, whatever principle may have governed some of the directors in their other operations, that in this they intended to unitedly work for the accomplishment of this project in its integrity and with all possible economy, and that the direction controlling this organization contained a majority of those who would effectually prevent any other course being pursued.

Immediately after the formation of the board the statements of the public press, calling attention to specific acts of certain members of the same, rendered it clear that until these charges were disposed of no progress could be made. Shortly thereafter I left for Europe, and only returned in the latter part of September.

The meeting of yesterday was called somewhat at my instigation, not as you incorrectly state, for the purpose of preaching a "funeral sermon," nor for congratulations that the concern "had realized the fondest hopes" of its projectors, but for reorganization of the company and the completion of the work; the latter depending, first and foremost, upon the former. Your statement of the remarks made by me is incorrect in every particular. The resolutions offered by me and passed unanimously, all looked to the securing of a reorganization which would command public confidence, which I suppose to be the object of your comments, unless, indeed that object be to destroy the possible chance of availing of this valuable charter for the construction of a rapid transit through this city.

Respectfully yours,
W. BUTLER DUNCAN,

New York, Thursday, Nov. 16, 1871.

Mobile and Montgomery Railroad.

The receipts from operations of this road for the years ending April 30, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$227,528 27	$222,356 00
" freight.....	312,008 72	376,942 06
" express	21,545 49	20,750 98
" mail.....	18,600 00	18,600 00
	$579,682 48	$638,649 04
Expenses, viz:		
Conducting transp....	$181,344 83	$197,226 31
Motive power	108,670 56	116,485 03
Maintenance of way...	158,169 72	145,718 76
Maintenance of cars...	44,346 41	34,863 72
	$492,531 52	$494,293 82
Leaving net income...	$87,150 96	$144,355 22

It will be seen that the gross earnings for the year ending April 30, 1871, were $638,649 04, and the expenses of working the road and keeping up the outfit were $494,293 82, leaving net income $144,355 22, which has provided for interest on all of the debts of the company, and for interest on money borrowed on the hypothecation of bonds—the whole of which amounted to $144,064 86—leaving a surplus of net income over and above its expenses and interest of $290 56, which has been passed to the credit of earnings due preferred stock. The president in his report says:

The earnings of the road for the year are encouraging, notwithstanding the heavy loss sustained by the prevalence of yellow fever in Mobile, which cannot be estimated at much less than $50,000. They show an increase over the previous year of $58,966 56, and would no doubt have shown an increase of not less than $100,000, but for the loss of business referred to.

The result of the operations of the road for the past year will, it is hoped, quiet the apprehension which has existed to some extent with the public, that the road could not earn enough to pay the interest on its debt.

With only the same gross income, when the road is operated to the city of Mobile, the net income will fully provide for interest on the $2,500,000 of first mortgage bonds endorsed by the State of Alabama.

The net earnings of the road have been....	$144,355 22
And as the expenses of the boat service and Tensas Station will be saved as soon as the road is opened to the city, and which is reported by the superintendent to be	87,000 00
A net income of....	$231,355 22

will be realized from the same gross income of $638,649 04, providing fully for the interest on the debt of the company and leaving a surplus. With the extension opened for use by the first of January, 1872, and our boat service abandoned, if an average crop of cotton is made on the line of the road, and no epidemic prevails in the Gulf ports to interfere with trade and travel, the board will be very much disappointed if they are not enabled to report a gross income for the next fiscal year of at least $800,000, and a net income, over and above all expenses and interest, large enough to declare a dividend on the preferred stock of the company.

The road and outfit are in very much better condition than at any previous time. Both the Alabama and Florida and Mobile and Great Northern Roads were built without the means to make them first class in track and equipment, but they struggled on under great embarrassment, disappointing the public, and causing anxiety and mortification to all connected with them. Since the consolidation they have steadily improved. Within the past two years about 25 miles of the worst track has been relaid with heavy fish bar rail, and the outfit of cars and engines increased to such an extent as to do promptly the work required. Although much has been done, a great deal more is yet to do, to make the road first class in track and equipment. To compete, with any chance of success, with the several lines of road which are to contend with yours for trade and travel to and from the Gulf ports, the entire track of the road must be brought up to such a condition as will enable your passenger trains to run safely and regularly a schedule of not less than twenty miles an hour—and the outfit of cars must be equal to those in use on other great passenger lines. Passenger and freight depot buildings will have to be erected in Mobile and Montgomery, so as to afford every facility for the care and movement of freights and the comfort of passengers. To do all of which will require heavy expenditures; but the history of all railroad companies, contending for po[illegible] and business, will show that the only way to success is to meet at once the demand for speed and comfort on passenger trains, and the prompt movement and delivery of freights.

The work of extending the road from Tensas to the city of Mobile is progressing very satisfactorily. The report of your Chief Engineer, G. Jordan, Esq., who is superintending it with great energy and success, which is herewith submitted, will give you all the details of the work and its progress; and unless delayed by some cause not now apprehended, we will no doubt run our trains through to Mobile by the first of January. The opinion expressed when the consolidation of the roads was first proposed has been daily strengthened, that the line would be a failure without the extension to Mobile, and the board feel satisfied that the value of this important work, although it will have cost so large a sum—not less than one million of dollars—will, when you again meet in annual convention, be satisfactorily demonstrated by increased receipts and reduced expenses. Up to the present time, about $500,000 has been expended. After very full consideration and a careful examination of almost every location deemed suitable for our depots in Mobile, purchases were made of property at the North end of Commerce street, giving to the company very extensive wharf privileges, and securing a close connection with other railroads terminating in that city.

The financial condition of the company on the 30th of April, the close of the fiscal year, up to which time the books of the company are balanced, will be shown by the condensed statement, herewith submitted.

The company held on that day $1,494,000 of the first mortgage bonds endorsed by the State, on which had been borrowed about $900,000. In consequence of the failure of the Alabama and Chattanooga Railroad Company to pay the interest on their bonds endorsed by the State, which became due on the first of January, it was found impossible to dispose of our bonds. Our agents, Messrs. Soutter & Co., continued to advance as we required money, and thereby saved the company from great loss. If they had refused to advance as our necessities required it, our bonds must

have been thrown on the market and sacrificed—or we must have suspended work on the extension—either of which would have been disastrous to the Company. After the payment of interest by the State on the Alabama and Chattanooga Railroad Bonds, the value of all the Alabama Railroad Bonds endorsed by the State began to improve, and I sold, early in May, $200,000 of our bonds at 90 cents, and near the close of the month our agents closed the sale of the remainder in Europe upon very satisfactory terms.

Upon reference to the last Annual Report you will find that there was outstanding on the 30th April, 1870, debts in the name of the Alabama and Florida Railroad Company amounting to $126,800
And in the name of the Mobile and G. R. R. Co. 27,000

Making a total of $153,800

All the obligations of the Mobile and Great Northern Railroad Company have been taken up and cancelled. And there are now outstanding the following described bonds of the Alabama and Florida Railroad Company:

First mortgage	$2,500
Second mortgage	23,500
Bonds not secured	36,700
Making a total of	$62,700

Every effort has been made to find out who are the holders of them, but so far without success.

It is made the duty of the president and directors to reserve from sale an amount of the first mortgage bonds endorsed by the State equal in amount to bonds previously issued, and which were a lien on the road.

The bonds now outstanding, which are a prior lien on the road and outfit to the bonds endorsed by the State, are as follows:

The Mobile and Montgomery R. R. Co. issued first mortgage bonds amounting to	$1,250,000
The company has taken up and cancelled	1,209,000
Leaving yet outstanding	$41,000
There are outstanding—	
First and second mortgage bonds of Ala. and Fla. R. R. Co., as before described, amounting to	26,000
Making a total of	$67,000

The company have left in the hands of their agents in New York on special deposit, only to be used in exchange for the first mortgage bonds above described, $41,000 of the bonds endorsed by the State; and the president is made the custodian of $26,000, the proceeds of which, or the bonds, are to be held and applied only to the settlement of the bonds of the Ala. and Fla. R. R. Co. It is hoped that by the close of the present fiscal year of the company all of these bonds will be taken up.

Within the year the land agent of the company has sold 4,081 acres for the sum of $5,658 23, which has been accounted for to the Treasurer. The titles for lands sold by the agent are prepared by the Treasurer, numbered and registered before they leave his office. The company yet holds of the land granted by Congress 319,528 acres, located as follows: In Lowndes county, 3,291 acres; in Butler county, 59,792 acres; in Conecuh county, 118,713 acres: in Monroe county 2,133 acres; in Covington county, 4,524 acres; and in Escambia county, 131,075 acres.

The company have 30 locomotives, 6 first-class and 5 second class passenger cars, 4 baggage and mail, 3 express, 12 freight, 178 box, 77 platform, 2 ditching, 4 wood, 7 shanty, 2 pole and 3 crank cars. Miles run by passenger trains, 118,478, by freight trains, 162,163, by other trains, 70,798—total, 351,439.

The financial condition of the company April 30, 1871, was as follows:

LIABILITIES.

Capital stock Mobile and M. R. R.		$1,148,300 00
In name of Ala. and Fla. R. R. not exchanged		86,500 00
In name of Mobile and G. N. R. R. not exchanged		27,800 00
		$1,262,600 00
Preferred 8 per cent. stock		1,771,700 00
Bonded Debt of Company:		
First mort. bonds Ala. and Fla. R. R. Co.	$2,500 00	
Second mort. bonds Ala. and Fla. R. R. Co.	23,500 00

Cash on hand	19,741 63	
		1,615,751 89
Total		$6,704,961 29

President.—CHARLES T. POLLARD.
Chief Eng. & Gen'l Sup't.—G. JORDAN.
Auditor.—JOHN S. POLLARD.

☞ A meeting was held at Portland, Oregon, on the 11th inst., at which a memorial to Congress was adopted, asking for the usual grant of land to be made to the Portland, Dalles and Salt Lake Railroad, already incorporated. The line of the proposed road lies east from Portland along the south side of Columbia river 145 miles; thence to Monument Point, on the Central Pacific Road, 588 miles; thence to Fort Granger, on the Union Pacific Road, 680 miles—making the distance from Portland to Omaha 1,700 miles.

☞ The Michigan Central Railroad Company has voted to issue one share of new stock at par for every six shares of stock held by stockholders of record at the close of business on the 18th inst. The new stock will not be entitled to the next dividend.

Railway Iron.

The railway iron exported from the United Kingdom during the month of September last amounted to 93,529 tons, against 103,985 tons in September 1870, and 76,987 tons in September 1869. The decrease in the exports of September would have been still greater than shown in the above figures had not the American demand been so extensive. The clearances effected to the United States in September amounted to no less than 54,373 tons, as compared with 33,794 tons in September 1870, and 14,941 tons in September 1869. To Russia the exports showed a falling off in September to 3,764 tons, against 30,109 tons in September 1870, and 37,622 tons in September 1869. In the nine months ending September 30 this year the aggregate exports of railway iron from the United Kingdom were 756,370 tons, as compared with 862,218 tons in the corresponding period of 1870, and 697,175 tons in the corresponding period of 1869. In these totals the United States figured for 389,535 tons, against 313,410 tons in the corresponding period of 1870, and 244,086 tons in the corresponding period of 1869; Russia for 69,398 tons against 193,809 tons and 196,671 tons; and British America for 56,709 tons against 29,912 tons and 28,669 tons. The exports have increased this year to Sweden, France, Egypt, Brazil, Peru, British America, and Australia; but they have decreased to Russia, Germany, Holland, Spain, Austria, the Spanish West Indies, Chili, and British India. The value of the railway iron exported in September was 771,482*l.*, against 877,348*l.* in September 1870, and 637,296*l.* in September 1869; and in the nine months ending September 30 this year 6,111,781*l.*, against 7,057,730*l.* in the corresponding period of 1870, and 5,678,447*l.* in the first nine months of 1869.—*London Railway Times.*

☞ Articles of incorporation of the Denver and Salt Lake Railroad were filed for record at Denver, Col., on the 11th inst. The proposed route is along the South Platte to Middle Park, thence by the most feasible route to Salt Lake. The route will be of the same gauge as the Denver and Rio Grande and Leavenworth and Denver Railroads, and will pass through the best timbered region of the Rocky Mountains. It is believed the route will shorten the distance between Denver and Salt Lake 200 miles. The incorporators are W. S. Jackson, C. B. Lamborn, and A. C. Hunt.

☞ A petition to the common council of Richmond, Va., has been signed by a large number of leading business firms, manufacturing interests and taxpayers, requesting that $200,000 in 6 per cent. city bonds be presented to the Chesapeake and Ohio Railroad Company, conditioned upon its tunneling Church Hill, and running its main line through the city, and agreeing "never to discriminate against Richmond" in the transportation of freight or passengers.

☞ The earnings of the Port Huron and Lake Michigan Railroad for the year ending October 31, 1871, were $140,407 83; and the operating expenses, $56,244 70—leaving the net earnings for the fiscal year $84,244 70. About 38 miles of road were operated to the 1st of June last; since then 47 miles have been operated. It is probable that track laying will be completed to Flint, 66 miles from Port Huron, the present week. The earnings for the month of October were $19,586 88.

☞ The directors of the Lamoille Valley (Vt.) Railroad expect to have the road completed to South Hardwick on the 20th inst., and will soon have the cars running to that point, which is about twenty-six miles from St. Johnsbury.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, November 25, 1871.

Stock Exchange and Money Market.

The supply of Money available in a temporary form has been quite liberally augmented, during the week, without any corresponding increase in the demand, and, consequently, call loan rates have been working steadily in favor of borrowers, the range having been from 4@7, with the bulk of the negotiations reported at 5@6 per cent. per annum. The speculative call for funds, for use at the Stock and Gold Boards, has been comparatively moderate, and, in no prominent instance, urgent. The large dealers in Government securities have had their wants promptly met at the minimum rates of 4@5 per cent. mostly at the latter figure; and none of the leading Stock houses have had to pay over 6 per cent. for the necessary aid. In view of the sluggishness and depression in the call loan line, there has been a livelier inquiry for the best grades of commercial paper, which have been rated at from 7@8½ per cent. per annum, and much more freely discounted within this reduced range. The offerings of the favorite names have been on a restricted scale. The bank movement has been decidedly conservative and re-assuring of late, notably so, during the past week. The city banks, in their latest return, show an increase of $719,200 of legal tender notes, $2,247,800 of specie, and $4,911,500 of deposits; also an addition of $1,581,800 to their loan and discount averages, and a reduction of $45,800 in their item of circulation. The city bank exchanges, last week, averaged $94,972,357; and thus far, this week, 100 millions daily. The banks now hold $9,089,425 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $16,239,300, against $17,580,225 same time last year. The city bank deposits are now $219,186,900 against $194,900,406 week ending Nov. 19, 1870. The legal tender reserve amounts to $55,181,500 against $52,716,778 same time last year. The circulation now stands at $30,138,600, against $32,301,222 same time last year. The loans are now $286,204,500, against $264,609,216 at this date last year.

The U. S. Sub-Treasury enlarged its currency balance $1,216,799 and reduced its coin reserve $814,782, as the result of the week's business. The receipts of the office were $3,519,289 in coin, and $3,310,874 in currency; payments, $4,334,072 in coin, and $2,041,575 in currency. The office received $2,694,000 in coin or its equivalent, from customs; and disbursed $2,248,233 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,277,559 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $367,948,950; and as security for deposits of public money, United States bonds for $15,279,000. The aggregate of the outstanding circulation of the National Banks of the country is $325,834,497.

Government revenues have been yielding less liberally since our last. The excises yielded last week about 1¾ millions, and thus far since July 1. $52,974,588. The customs at the port of New York, last week were $2,498,559; and at the outports, equal to about $750,000 more, all in coin, or coin certificates.

Under the Treasury programme for November, Government proposes to sell Gold as follows; Wednesday, Nov. 22—Two Millions. Wednesday, Nov. 29—One Million. And to buy in Five-Twenties as follows: Tuesday, Nov. 28—One Million.

The Gold movement has been on a restricted scale, and the speculation has been weak and hesitating, with the offerings for prompt delivery on the increase. The customs call has been up to a moderate average; while the export drain has been light. The range of the price during the week, has been from 110⅝@111⅜ and the closing quotation on Wednesday was 110⅝@110¾ against 111⅜ the preceding Wednesday. The specie outflow, last week, was $629,666; on Tuesday of this week, $57,980; and on Wednesday $179,000. The Gold Exchange Bank clearances have been as follows: Nov. 16, $27,061,000; Nov. 17, $29,489,000; Nov. 18, $33,875,000; Nov. 20, $27,557,000; Nov. 21. $42,462,000; Nov. 22, $44,421,000.

Government accepted on Wednesday, proposals for two millions of Gold at 110 63½@110 77 out of bids for an aggregate of $6,657,000.

Government disbursed through the U. S. Sub-

Treasury here, on account of the coin interest on the public debt from Jan. 1, to Nov. 18th, 1871 $78,833,285, against $80,830,324 same time in 1870.

The export drain of specie was $629,666 last week, against $655,078, same week preceding year. The shipments since January 1, 1871, have been $61,137,556, against $55,931,616 same time in 1870.

The customs demand for Gold last week, averaged $449,000 a day; thus far, this week, it has averaged $365,000 a day, or equal to a weekly aggregate of $2,190,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $6,255, and since Jan. 1, 1871, $8,294,659 against $11,216,018 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $141,902,942 against $128,812,540 same time in 1870.

Foreign exchange has been more actively sought after and quoted higher. Bankers' sixty day bills on London closed on Wednesday at 109¼@109⅜; sight bills on London, 110@110¼.

The produce exports from this port, week ending with Nov. 21, were to the currency value of $5,059,208.

Government securities have been in more general request, and the later issues of the coin bearing bonds have been quoted stronger in price, on very limited offerings.

On Tuesday, Government bought in only a million of Five-Twenties at 110 61@110 74 nett. The amount of bonds offered was $1,302,100 at from 110 61@110 99.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117¾@118; U. S. Five-Twenties of 1862, (other than the bonds called in) 111⅝@111¾; U. S. Five-Twenties of 1864 at 111⅝@111¾; U. S. Five-Twenties of 1865, 111¾@112; U. S. Five-Twenties of 1865 consolidated, 114@114⅛; U. S. Five Twenties of 1867, 114⅞@115; U. S. Five-Twenties of 1868, 114⅞@115⅛; U. S. Ten-forties at 109¾@110; U. S. Six per cent. currency bonds, 118¼@118½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 8.	Nov. 15.	Nov. 22.
Consols	92⅞@93	93⅝	93⅜
U.S. 5-20's of 1862..	91⅜	91¼	92
U. S. 5-20s, 1865....	91½	91¾	92¼
" 1867	93⅜	94⅜	94¾
" 10-40s	89½	90⅛	90¼
Erie.	24¼	26	25⅝

The new Funding Five per cent. Loan was quoted in London on Wednesday at 1 5/16 per cent. discount.

State bonds have been in moderate investment demand at, however, irregular prices, closing rather heavily on nearly all the Southern issues.

Railway bonds have been in generally very good request especially through the commission houses, and the favorites of the old loans have been quoted firmer. Central Pacific Sixes have been in active demand, largely on European account, and with remarkably light offerings of the bonds, prices closed strong, on the basis of 103¼@103½. Chesapeake and Ohio Sixes have been more inquired for investment purposes, and the price has been advanced by Messrs. Fisk & Hatch, the bankers of the Company, to 94 per cent, and accrued interest, under instructions from Mr. C. P. Huntington, the President of the Company.

Railway and miscellaneous share property has been rather moderately dealt in and has been quite variable in price.

General business has been less active in the line of domestic produce, with values quoted more favorable to purchasers. Middling upland cotton closed on Wednesday at 18¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 719,276 bales, against 865,932 bales same time in the preceding year; exports 269,616 bales, against 373,687 bales in the previous year; stock at the ports at latest dates, 327,284 bales, against 336,803 bales same date 1870.

At the Live Stock Markets, Beeves have been in rather more demand at from 8½@13cts.; Veals in moderate request at 5@10½ cts.; Sheep at 4@6¼ cts.; Lambs at 5¾@7¾ cts.; Swine, in active at 5@5½ cts. per lb., all live weight. The week's receipts were 9,199 Beeves, 841 Veal Calves, 35,373 Sheep and Lambs; and 57,060 Swine.

Foreign goods have been in less demand as a rule and prices have been quoted in favor of buyers, in most instances. Sugars have been exceptionally stronger. The week's imports of foreign goods reached $4,653,682, including $1,605,733 of dry goods.

Ocean freights continue comparatively quiet, with rates quoted irregular.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Texas 10s, 1876, 91; South Carolina 6s, old, 70½; do., 6s, new, Jan. and July, 28; do., Apl and Oct., 26; N. Y. State 7s, B. L. reg., 109⅜; North Carolina 6s, special tax, 15½; do. New York (Viaduct) Railway.

An adjourned meeting of the directors of this company was held on the 22d inst., Mr. August Belmont presiding. The sub-committee of five appointed at the last meeting presented a financial report, and resignations were received from the following directors: A. Oakey Hall, Richard O'Gorman, Hugh Smith, Peter B. Sweeny, William M. Tweed, John J. Bradley, Henry Hilton, John Taylor Johnston, John Jacob Astor, Charles A. Lamont, William T. Blodgett, J. F. D. Lanier, August Belmont, A. T. Stewart, E. B. Wesley, Franklin Osgood, William Butler Duncan, W. R. Traverse, Charles L. Tiffany, Levi P. Morton, Joseph Seligman, J. F. Navarro.

The resignations were accepted, and the meeting proceeded to elect a new Board, when the following gentlemen were chosen:

Alexander T. Stewart, Sidney Dillon, August Belmont, Charles A. Lamont, Jas. F. D. Lanier, Franklin Osgood, Wm. Butler Duncan, Oswald Ottendorfer, Charles L. Tiffany, Wm. R. Travers, Wm. B. Ogden, John Jacob Astor, Abraham S. Hewitt, Levi P. Morton, S. D. Babcock, William Blodgett, James B. Colgate, Jose F. Navarro, Edward B. Wesley, John Taylor Johnston, Andrew H. Green, Wm. H. Appleton and Jos. Seligman.

John Taylor Johnston was elected president. The secretary Edward P. Parker, and the treasurer Wm. Butler Duncan, retain their positions.

☞ The Pittsburg, Port Wayne and Chicago Railroad Company will issue on and after December 21, 1871, 20,000 shares of new stock, to be designated as "Special Improvement Stock." In making this announcement to the N. Y. Stock Exchange on the 22d inst., the president of the company says:

This issue is made in conformity with article 16 of the lease of the railway of this company to the Pennsylvania Railroad Company, and represents actual cash values of property placed upon the railway by the lessee, the title to which property is now in this company.

The shares are to be one hundred dollars each, entitled to dividends of seven per cent. per annum, payable quarterly, free of all taxes, from the means provided by the Pennsylvania Railroad Company, as stipulated in an agreement of said company, a certified copy of which is indorsed on each certificate; but this issue is in all respect subject to the original or guarantied stock to have distributed to it in quarterly instalments an annual dividend fund of $1,380,000 free of all taxes.

☞ Track laying was commenced on the extension of the Canada Central Railway to Renfrew on the 29th of October.

Chesapeake and Ohio Railroad.

The following letter of the President of the Chesapeake and Ohio Railroad Company gives some interesting and late information concerning the progress of the main line of road now building:

OFFICE CHESAPEAKE AND OHIO RAILROAD CO.
54 William Street, New York,
NOVEMBER 18, 1871.

Messrs. FISK & HATCH,
Bankers and Financial Agents
C. & O. R. R. Co:

Gentlemen:

The Western Division of the Chesapeake and Ohio Railroad, comprising the 95 miles between Huntington, on the Ohio River, and the mouth of New River (above the Falls of Kanawha), is now substantially completed, and will, in a few days, be ready to do the immense coal and other business that is awaiting its completion. The Eastern Division, comprising 227 miles, between White Sulphur Springs and Richmond, is now in complete order and successful operation. The grading and masonry on eleven of the 102 miles, between the mouth of New River and White Sulphur Springs, is complete, and the work on the remaining 91 miles is so far advanced that tracklaying will be commenced on this portion of the road in May next, and continue without interruption until the whole line is completed.

In view of these facts, you are hereby directed to make no further sales of the Bonds of said Company at a less price than 94 and accrued interest, at which price you will continue to sell until further orders.

Very respectfully yours,
C. P. HUNTINGTON, President.

☞ The WEST WISCONSIN RAILWAY, which forms the chief link in the new and short through route from Chicago to St. Paul and the great North-West, will be completed, equipped, and in running order by the middle of November. The iron is down to within 10 miles of Hudson, and is being laid at the rate of a mile a day, and the grading throughout is finished. One hundred and twenty miles have been in operation for a year, and had a large and profitable local business, and a still larger amount awaits its completion through St. Croix County to the shore of the lake. The lumber traffic this winter will be very heavy. Immense quantities are already piled up at the mills on the line of the road awaiting the completion of the connection with St. Paul when it will be distributed over the treeless prairies of Minnesota and Iowa. Besides this local business the West Wisconsin will get a large share of the traffic between St. Paul and the North-West and the Lakes. It is a hundred miles shorter than the present line, and has direct connections with Chicago. The road has a valuable Land Grant of 1,000,000 acres in the best part of Wisconsin. This grant with the Road itself, is pledged in support of the First Mortgage 7 per cent. Gold bonds which may be bought at 90 and accrued interest in currency of WHITE, MORRIS & Co., No. 18 Wall-st., and GWYNNE, JOHNSON & DAY, No. 16 Wall-st., Agents to the Company.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 20th inst.

On motion of Mr. Johns Hopkins, Mr. Miles White was chosen chairman, and Mr. W. H. Ijams, secretary.

John W. Garrett, Esq., president of the company, presented the forty-fifth annual report of the president and directors to the stockholders for the fiscal year ended on the 30th of September, 1871. The report having been read and no other business being presented, the meeting, on motion, proceeded to the election of twelve directors on the part of the stockholders, to serve for the ensuing year, Messrs. Miles White, Wm. J. Albert and Horatio L. Whitridge acting as judges. On counting the ballots the following gentlemen were found to be unanimously elected by a vote of 34,591 shares, viz: Messrs. Johns Hopkins, Samuel W. Smith, Francis Burns, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Galloway Cheston, William W. Taylor, Samuel Kirby, Allen A. Chapman and John King, jr.

The members elected are the same as for the preceding year, except that Mr. John King, jr., fills the place of the late Mr. Albert Schumacher.

The report shows that the revenues of the Baltimore and Ohio and its branches for the fiscal year were $12 557,529 42: being an increase over the previous year of $1,717,158 94. The full report is being printed in pamphlet form, and will be ready for distribution at an early day.

HARVEY FISK. A. S. HATCH.

FISK & HATCH, Bankers.
No. 5 NASSAU-ST., NEW YORK,
Nov. 20, 1871.

In compliance with instructions from the Company, the price of the CHESAPEAKE AND OHIO BONDS, from this date until further orders, will be 94 and accrued interest.

The scarcity of, and demand for, really desirable *six per cent. gold* bonds for solid and permanent investments, are evinced by the fact that

FIVE-TWENTY BONDS of 1867 are selling at....115
CENTRAL PACIFIC BONDS are selling at.....103
CHESAPEAKE AND OHIO BONDS are selling at.. 94

These bonds all pay both principal and interest in New-York City, in UNITED STATES gold coin, and are equally safe for investment.

The reason why FIVE-TWENTY BONDS are so high is because no more can be issued, and the outstanding amount is being rapidly decreased by purchases by the Government from their surplus revenues.

The reason why we think CENTRAL PACIFIC Bonds will in time advance to the price of FIVE-twenties is because no more can be issued; while the operation of their Sinking Fund will soon commence to decrease the amount.

The reason why CHESAPEAKE AND OHIO BONDS are selling so low, comparatively, while equally safe, is because the Company are selling Bonds to complete the road. They will all be sold in a short time, and in a few months the road will be finished, when we have no doubt the same result will follow as with FIVE-TWENTY and CENTRAL PACIFIC BONDS. The sinking fund of the Chesapeake and Ohio must go into effect within one year after the completion of the road.

The CHESAPEAKE AND OHIO BONDS are issued either coupon or registered—the denominations are as follows:

$100, which cost to-day.... ....$94 31
$500, which cost to-day.... .... 471 56
$1,000, which cost to-day..... .... 943 12

We buy and sell Government and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS.

Accounts of Banks, Bankers and others received on which we allow interest at the rate of four per cent. per annum.

FISK & HATCH.

☞ Truro has voted the credit of the town to the amount of five per cent. on its valuation, in aid of the railroad from Wellfleet to Provincetown. The amount will be nearly $15,000.

Journal of Railroad Law.

RAILROAD COMPANIES—INSURANCE POLICIES—WHEN THE INSURED BECOMES RESPONSIBLE.

The facts in the late case of George Northup, Administrator, &c., of Lucilla Northup, deceased, *vs.* The Railway Passenger Assurance Company (2 Lansing 166) are fully and clearly stated in the following opinion by

J. C. SMITH, J.—By the terms of the contract in this case, the defendant undertook to insure the plaintiff, against personal injury "caused by any accident while traveling by public or private conveyance provided for the transportation of passengers," &c.

The contract was expressed in an insurance policy or ticket, which was issued to the plaintiff, by the agent of the defendant, at Rathbone, Steuben County, and which the plaintiff procured with the intent of setting out on the same day, to travel by public conveyance to the county of Madison.

Immediately after procuring the ticket, the plaintiff entered upon the intended journey, in company with her husband and others, and the party traveled by cars on the Erie Railway to Elmira, and thence by cars on the Canandaigua and Elmira road to Watkins at the head of Seneca Lake. From Watkins they went by steamboat on said lake to Geneva, where they arrived about eight o'clock in the evening. On landing at the steamboat wharf, the party started on foot, to go to the station of the New York Central Railroad Company, about seventy rods from the wharf, in further prosecution of their journey, and on the way from the wharf to the station, the plaintiff's intestate slipped and fell upon the side-walk, and thereby received injuries of which she died in a few days.

It appears from the statement of facts submitted to the court, that persons arriving on the steamboat generally pass from the wharf to the railroad station through the public streets of Geneva; and that upon the arrival of the steamboat, on the occasion above referred to, there were public hacks for hire at the wharf, for the purpose of conveying passengers, if hired to do so, to any part of said village, or to the railroad station.

Without undertaking to lay down any general rule, or to do anything more than to decide the particular case before us, we are of opinion, upon the facts submitted, that the accident referred to was not within the terms of the policy. The accident occurred to the plaintiff "while traveling," and that too, while traveling on the very journey which she had in view when she procured the ticket; but at the time when the accident occurred, the plaintiff was not traveling by any "public or private conveyance for the transportation of passengers," but was voluntarily pursuing her jurney on foot, although there were conveyances at hand, which she might have employed, if she had chosen to do so. The defendant insured only against the perils of traveling by conveyance; and if the plaintiff had gone "by conveyance" from the wharf to the station, the accident in question could not have occurred.

The counsel for the plaintiff argues that the risk assumed by the defendant, is not confined to accidents occurring during the very act of riding, but that it covers every accident happening while doing an act necessary or proper to be done, during the making of the journey included in the present case, the passing from the steamboat wharf to the railroad station, in any usual and proper mode. Accidents may be supposed, which though not occurring in the very act of riding in a conveyance, would be covered by the defendant's contract. The case of Theobald *vs.* Railway Passenger Assurance Company (26 Eng. L. & Eq. R., 432), cited by the plaintiff's counsel, presents an instance of that kind. In that case, the train had stopped at a station where a change of cars took place, and the plaintiff, while stepping out of the car, met with an injury without any negligence on his part, and in consequence of the step of the car being accidentally slippery. There as was said by Pollock, C. B. "though, at the time of the accident, the plaintiff's journey had in one sense terminated by the carriage having stopped, he had not ceased to be connected with the carriage, for he was still on it. The accident also happened without negligence on his part, and while doing an act, which as a passenger must get into the carriage and get out of it when his journey is at an end, and cannot be considered as disconnected from the machinery of motion until the time he has, as it were, safely landed from the carriage and got upon the platform. The accident is attributable to his being a passenger on the railway, and it arises out of an act immediately connected with his being such a passenger." The policy in that case insured against injuries "happening to the assured from railway accidents whilst traveling in any class carriage on any line of railway," &c., and it was held that the accident was within the meaning of the policy. But that case does not go to the extent of holding that the policy covered every accident happening to the assured while doing any act necessary or proper to be done, during the making of the journey.

The distinction between that case and the one before us, is obvious. There the assured was injured while yet on the carriage in which he had made his journey, and while in the act of getting out of it, which as a passenger, he must necessarily have done. Here the assured when injured was not in, on, or in any way connected with any conveyance, and she was pursuing a part of her journey on foot, she having voluntarily chosen to walk, in preference to taking a carriage.

Judgment should be given for defendant.

Judgment for defendant.

Railway into Nubia.

While people are talking of a railway to India direct, to accomplish the passage from London to Calcutta in five days, the Viceroy of Egypt has actually commenced one of the most gigantic undertakings ever attempted in his territory—that of connecting Upper and Lower Egypt by rail. At the terminal point of all ancient and modern conquest, where the mighty Persian and Roman invaders found the desert an impassable barrier, the Khedive, assisted by an army of English engineers and navvies, will, unless stopped by the jealousy of the Sultan, drive an iron road and a team of iron horses, not only to the very confines of Nubia, but into the heart of Africa, opening up new fields of commerce, and perhaps bringing home Livingstone first-class. Twenty of the engineers for the above undertaking passed through Malta a few days ago on their way, and will be followed by the remainder of the staff in a short time. When it is considered that the line, commencing at the second cataract, is to be 600 miles long, some idea may be formed of the amount of labor required to complete the work—*Malta Times.*

A Railroad to the North.

We have been anxiously awaiting the time when we should be able to announce to our readers a fair prospect for the construction of a railroad line through the northern portion of this state, with its terminus at this point; and this week we are pleased to be able to state that there is a good prospect for its early completion. During the past few weeks a party have been employed between Whitehall and Port Henry, and so far as they have proceeded, we understand a very feasible route has been discovered, so much so that we are assured that the road will be at once put under contract for its early completion. To the Delaware and Hudson Canal Company are we indebted for this hope of, at an early day, 'getting out of the woods.' From a business standpoint we can hardly estimate the value of a continuous line of road through this northern region, and we trust the road will be pushed to a speedy completion.—*Whitehall Times.*

☞ Certain taxpayers of Berkeley county, West Virginia, lately brought suit for an injunction to restrain the county supervisors from laying a tax on account of the bonds heretofore issued by them in aid of the Martinsburg and Potomac railroad, which injunction was on the 11th inst., refused by Judge Melvin and the validity of the bonds affirmed. This railroad connects at Williamsport with the Chesapeake and Ohio canal, will connect with the Western Maryland railroad when it is finished, and with the Cumberland Valley Railroad, which thus gives a direct communication with the North.

☞ At a meeting of the stockholders of the Atlantic Mail Steamship Company on the 14th inst., the following gentlemen were elected directors for the year ensuing:—Samuel G. Wheeler, Jr., Edward Jordan, Loyal S. Pond, Charles F. Davenport, George P. Smith, Archibald M. Smith and Anthony M. Bliss. At a subsequent meeting of the directors the present officers of the company were re-elected, as follows: A. W. Dimock, President; Charles F. Davenport, Vice President; H. J. Quinard, Treasurer; J. O. Baker, Secretary.

☞ The stockholders of the Savannah, Griffin and North Alabama Railroad have elected A. J. White president, and W. A. Huff, of Macon, and Messrs, Boynton, Chapman, and Stewart, of Griffin; Whitaker, of Fayette; Wilkinson and Smith of Newnan; and Camp and Long, of Carrolton, directors. The work will be pushed ahead.

☞ An extension of the Nova Scotia and New Brunswick Railway, to the cities of Halifax and St. John, is stated to be engaging the attention of the Government. The plans and specifications are ready.

☞ The grading on the Wellington, Grey and Bruce Railway is completed to Paisley, and work on the fourth and last section will soon be commenced.

☞ The opening of the Buffalo, New York and Philadelphia Railroad to Arcadia was celebrated on the 15th inst.

☞ The construction of the Bridgeton and Port Norris Railroad is being rapidly prosecuted.

☞ The St. Paul and Sioux City Railroad is finished to Okabena, in Noble County, Minnesota.

Euphrates Valley Railway.

So far as the select committee of the Euphrates Valley Railway have carried their labors, Mr. W. P. Andrew may congratulate himself on the result. Nearly all the witnesses hitherto examined agree in recommending a railway from Scanedroon, Sueida, or some other point on the Mediterranean to some point at the head of the Persian Gulf. General Chesney, who explored the whole line of country several times, pronounces decidedly in favor of the Euphrates route, with a preference for Suedia as the starting point. Mr. Ainsworth who traveled with him, declares that a line from the Bay of Antioch to the Euphrates and down the Euphrates is "at once the most feasible and the most economical;" but his starting point he fixes at the foot of Mount Casius, a little to the south-west of the mouth of the Orontes. Sir John Macneill, who surveyed the Euphrates route about 15 years ago, is "quite prepared to say" that the projected line over the Beilan Pass to the Euphrates "can be executed with perfect ease and perfect certainty, for a certain specific sum." His son, Mr. Talford Macneill, would start from Scanderoon—the ancient Alexandretta—which is "a natural harbor, safe at all times, and of great extent," equal in short to any in the world. Carrying his line by easy gradients over the Beilan Pass, he would leave Antioch about twenty miles off, and passing through Aleppo would cross the Euphrates at Belis following the left bank of the river to a place called Grain on the Persian Gulf. Such a line with the sea at either end of it, would, in his opinion, tend more to England's advantage than to any other, and would be cheaper and easier to make than any of the projected lines from Constantinople.—*Allen's Indian Mail.*

☞ The St. Louis *Republican* publishes what it regards as "a full and complete showing of the necessity of a new railway directly east, with a map of the proposed route, a list of the counties it is to pass through, their area, population, productions, &c. It will be seen that if the population is taken as the basis of ability to subscribe stock in these counties, over $16,000,000 can be raised for the road, which, with what St. Louis can subscribe, will be ample to build and equip it with 10,000 freight cars." It is mentioned that the shipment eastward from St. Louis by rail of corn alone has increased from 904,776 bushels in all 1870 to 1,560,500 bushels in the first ten months of 1871.

☞ Bibb & Co., of Virginia, late contractors on the Chesapeake and Ohio Railroad, have taken the contract to build the Big Sandy road from Lexington to Mt. Sterling. The contractors are men of energy and integrity, and work will be begun as soon as the hands and implements can be gotten together. The road is to be completed and in running order to that place by the first of next July, or as much sooner as the work can be accomplished.

☞ The Northern and Southern West Virginia Railroad Company was organized at Clarksburg, W. Va., on the 31st ult., with Albert L. Catlin, of Boston, as president. Stock to the amount of $300,000 was taken, mostly by New York capitalists, and engineers are making a survey from Fairchance to Morgantown, under the direction of the Pennsylvania Railroad Company. Efforts to obtain subscriptions along the line of the proposed route are now making.

☞ The Richmond (Va.) City Council have appropriated $200,000 for tunneling Church Hill, in that city, in order to bring the eastern terminus of the Chesapeake and Ohio Railroad to tide-water on the James River.

The Viaduct Railway.

Mr. W. B. Duncan's letter, printed in another column, denying that the Board of Directors of the Viaduct Railway had concluded to abandon the project of furnishing the means of journeying between the two ends of Manhattan Island in a shorter time than is required at present, will meet with the hearty sympathy of the whole business community of the city. We have always regarded the connection of certain Tammany magnates with that scheme as one of the most unfortunate things that has befallen New York. The confidence which such names as Judge Hilton, W. B. Duncan, A. T. Stewart, L. P. Morton, and other well-known citizens, naturally gives, was almost entirely swamped by those of the Tammany Ring. The weeding out of these last will, we have not the least doubt, carry the project of rapid transit rapidly forward.

The lamentable lack of decent traveling facilities in this city and in Brooklyn is so universally recognized that we are confident the next Legislature—elected in the interest of the people as it is—will do all in its power to push on the work of building this road and such others as may be required. The citizens of New York and vicinity are heartily tired of the antiquated, uncomfortable means of transit now at their service, and they demand the most vigorous exertions on the part of their law-givers to remedy the present state of things.

The commercial metropolis of America wants, and will have, such legislation as will aid, and not retard its growth. It must have some means provided for it by which a citizen can reach his place of business in a much shorter space of time than is required now. In this busy age time is money, and a man cannot afford to waste two or three hours every day journeying between his home and his office. The Viaduct Railway and the Brooklyn bridge are two steps forward in the march of the prosperity of this city. They must be built quickly, so that New York and Brooklyn may really become what nature intended them to be—one city.—*N. Y. Times.*

Peach Bottom Railway.

Mr. Hood, of Maryland, a civil engineer of very considerable ability, has been engaged by the directors to make the survey and location of the Peach Bottom Railway. The work will commence immediately. The survey will begin at the Susquehanna, at Peach Bottom, and will be made by way of Delta, Muddy Creek, Neff's Summit and the foot of Dunker Valley, striking the Northern Central near the tunnel, about five or six miles south of York Borough. One hundred and fifty thousand dollars has been subscribed towards the construction of the road, and the canvass for additional funds will be vigorously pushed during the winter, the board having determined not to attempt the construction of the road unless there be a sufficient sum raised to grade and bridge the entire line, which sum, it is hoped, will be raised by the early spring.—*Lancaster Intelligencer, Nov.* 11.

☞ The Holyoke and Westfield Branch of the New Haven and Northampton Railroad was formally opened on the 14th inst. The new Branch cost about $40,000 a mile. Holyoke takes $165,000 worth of the bonds, and the New Haven and Northampton $200,000; the remainder is held by private parties.

☞ Of the forty-eight and a half miles of the Dayton Short Line Railroad, between Ludlow Station and Dayton, forty-five miles have been graded and will be ready for iron by the 30th of November. The remainder will be completed by the 1st of February.

☞ The Lake Shore and Tuscarawas Valley Railroad was opened to Medina, Ohio, on the 15th inst.

Boston, Nashua and Acton Railroad.

At the annual meeting of the stockholders of this company, held at Dunstable, Mass., on the 14th inst., the following gentlemen were elected directors for the ensuing year: Peter B. Brigham of Boston, Cyrus Wakefield of Wakefield, Mass., Joseph B. Clark of Manchester, Charles C. Pearson of Concord, E. H. Spalding, Henry Parkinson, Benj. Saunders, C. N. Dearborn, of Nashua, Jas. E. Burnap of Dunstable, Mass., Chas. G. Sargent of Graniteville, Mass., Capt. Jacob Smith of Westford, Mass., John Fletcher, Jr., Daniel Wetherbee, of Acton, Mass. At a subsequent meeting of the directors the following officers were chosen: Peter B. Brigham of Boston President, E. H. Spalding of Nashua Vice President, and John B. Goodrich of Boston, Clerk. E. H. Spalding, Henry Parkinson and J. E. Burnap were appointed a committee to locate and construct depots, side tracks, &c. Mr. Woods of Croton has the contract for the construction of the road.

☞ The Winchester (Va.) *News* says that Judge Turner, of the Frederick Circuit Court, has rendered a decree in the cause of the Orange, Alexandra and Manassas Railroad Company, vs. the Winchester and Potomac road. The suit was instituted for the value of iron removed from the Manassas road by the Federal government and laid down on the Winchester and Potomac road during the war. The judge rendered a decision allowing the Manassas Company 2,086 tons of iron at $55 per ton and 14 tons at $4 per cwt., the whole amounting to $115,850 in money, with interest for five years.

☞ The Cumberland (Md.) *News*, 3d inst., learns by parties from the line of the Salisbury and Baltimore Railroad, now in course of construction from Myer's Mills to Salisbury, in Somerset county, Pa., that the work is progressing towards completion quite rapidly. All the grading and masonry, it is expected, will be completed this month, and by the holidays it is hoped the entire road will be completed to Salisbury.

☞ The census returns for 1871, show the total population of the Dominion of Canada to be 3,484,924, an average increase of about 12½ per cent. since 1861. The present population of Ontario is 1,628,042, of Quebec 1,190,505, of New Brunswick 285,777, and of Nova Scotia 387,800. The percentage of increase in the last ten years is: Ontario 16 1-10, Quebec 7 1-5, New Brunswick 18 1-3 Nova Scotia 17 1-5.

☞ The Massachusetts Central Railroad Company filed a certificate on the 14th inst. in the office of the secretary of state that all the capital stock of the road had been subscribed and 20 per cent. paid in. This allows them to commence business at once, and ground will probably be broken very soon. Mr. N. C. Munson has the contract for building the entire road.

☞ The F-street Railway Company, Washington, will soon begin the contemplated extension of the road from the Capitol eastward to the Anacostia river, and from Seventeenth street westward to the Georgetown Convent.

☞ The Ohio State debt has been decreased this year $785,115. The whole debt is now $8,945,511.

Peat Fuel for Railway Engines.

For many years the managers of European and American railways have been searching for a substitute for anthracite and bituminous coals which would answer all the requirements of coal, be furnished at a less cost, and in sufficient quantities. In France certain railways are using a compound of coal dust and coal tar for fuel, but its disagreeable odor and large quantities of smoke and soot thrown off during combustion render its use annoying to passengers and engineers. In this country many experiments have been made with crude petroleum and its gases, led directly into the furnaces, and with coal siftings compressed with bitumen. Still, there remained something better to be sought, and recent developments show that the investigators have not been idle. Along the lines of nearly all the American railways are enormous peat bogs, some of great depth, nearly all of good quality, and containing enough peat, if properly manufactured, to supply the railways for many years.

Erroneous methods of manipulation and the imperfect machinery used by former experimentors seemed to have warned capitalists from embarking in the peat manufacture, until about two years ago, when Mr. E. L. Hurlbert purchased the Berlin Bog, about seventy-five acres in extent, located at the side of the Hartford and New Haven Railway, and midway between Meriden and Berlin, Conn. Improved machinery of the Auben patent was set up, and the manufacture of American peat fuel commenced on a large scale. The former plan of compressing the peat was discarded.

Machinery was made to take the place of hand labor wherever it was possible. The peat is dug and raised by a steam dredge lifting one ton at a time, deposited in iron tubs having perforated bottoms through which the excess of water drained while the tubs were being moved to the grinding machine. The latter consists of a wooden platform 18 feet high, about 12 feet wide and 15 feet long. On it are two boom derricks, which raise the tubs and swing them over the platform upon which they are emptied. The bright yellow peat then falls through openings in the platform upon an archimedean screw revolving beneath, and is fed into a peculiarly-constructed mill, where revolving knives convert the peat fibre and the water not drained off into a thick paste of a very dark brown color. The paste, or peat jelly, flows from the knives into a hopper beneath. Under the hopper is a shallow wooden box, the bottom having ridges rising from it nearly to the upper edge of the sides. The box or mould rests on a wooden tramway, the machinery of which is so arranged that when one mould has been filled an empty mould is pushed behind it, the full mould thrust forward over the tramway and the empty one left beneath the hopper. Under this tramway and at right angles with it are three other tracks with small cars. The workmen stand at the side of the upper tramway, and when the full moulds are opposite them the machinery slides the mould from the tramway and on a shelf at its side. The men lift the mould from the shelf, place it on the car, and continue the operation until the car is loaded. It is then moved off over the track to the drying ground. There each mould is overturned on the grass, and the moulded peat left to dry.

The ridges in the bottom of the mould have left deep grooves in the now upturned surface of the peat, facilitating the operations of drying and of breaking up the peat when hard and dry. After an exposure of 48 hours neither rain or frost will damage it. It soon dries hard, and is then ready for use or storage. Peat made in this manner does not deteriorate with age, will not crumble as the compressed peat is liable to do, is clean and good as a fuel. It was used in one engine on the Hartford and New Haven Railroad constantly for five months, the engine doing its regular work with freight and passenger trains between those points with very satisfactory results. It burns, the fire doors being shut, with clear, full, bright flame, makes no smoke, does not clinker, and the ash is an impalpable powder. In reversing the engine there is no grinding of boxes by gritty particles. Another point in its favor is that it is easily kindled and burns entirely away. No alteration in grate bars or other parts of the engine is required, and the engineers who have tested it on the road say that one ton of this peat will do the same work as one ton of the best anthracite coal. The peat of the Berlin bog is not superior to that found throughout the country, but depends upon the machinery by which it is manufactured for its excellence. The New York and New Haven Railroad Companies have signified their willingness to contract for all the peat made at this bog, it being close to their track and much easier handled than coal. The machinery at this point is capable of turning out one hundred tons of peat a day, which can be disposed of at $5 a ton, leaving a handsome profit for the manufacturers, who have invented the machinery and formed themselves as a company under the name of "The American Peat Fuel Company." There seems little doubt that the immense bogs on our railroad lines can now be utilized. The peat has been tested in the manufacture of steel, and produced some of the best yet made in this country.

☞ At a recent meeting of the corporators of the Bonny Eagle Branch Railroad at West Buxton, Me., a board of directors was elected with A. K. P. Lord as president. The road, the construction of which is to be immediately commenced, is to run from a point on the Portland and Rochester Railroad in Buxton to Bonny Eagle Falls, along the course of the Saco River and through a very level country.

☞ The New Orleans *Republican* says intelligence has been received from New York announcing the cheering fact that the New Orleans, Mobile and Texas Railroad Company has succeeded in placing nearly all its bonds, and that all its financial and other difficulties will be terminated at once. The work along the whole line, including the branch from Vermilionville to Shreveport, will now be prosecuted with vigor.

☞ The Secretary of State for Ohio has made his annual report, which shows that during the year six railroads have been incorporated, with an aggregate capital of $10,500,000. A number of important consolidations have taken place, first among which is that of the Baltimore, Pittsburg and Continental with the Celina extension, forming the Baltimore, Pittsburg and Chicago Railroad.

☞ Buenos Ayries advices to October 1st, via Brazil, are to the effect that Congress has passed the law authorizing construction of the Teunman Railway (three hundred and thirty-seven miles) on the narrow gauge system, at a cost of eight and a half million hard dollars, instead of fourteen millions, as contemplated when making the recent loan in London.

☞ The Vermont Central Railroad Company has leased the New London Northern Railroad from New London to Grout's Corner, near Greenfield, for which they pay $240,000 per annum. This gives the Vermont Central a New York connection. The lease includes the three boats running from New London to New York, which are owned by the company.
